## **FORWARD-LOOKING STATEMENTS**

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified with words such as “believe,” “expect,” “anticipate,” “estimate,” “intend,” “project,” “forecast,” “target,” “outlook,” “may,” “should,” “could,” and similar expressions, as well as statements written in the future tense. These statements, as well as any other written or oral forward-looking statements we may make from time to time in other SEC filings or other public communications are intended to qualify for the “safe harbor” from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements include those related to the Company’s current assumptions regarding future business and financial performance. Forwardlooking statements are based on management’s expectations, estimates and projections, are made solely as of the date these statements are made, and are subject to both known and unknown risks and uncertainties that may cause the actual results and occurrences discussed in these forward-looking statements to differ materially from those referenced or implied in the forward-looking statements contained in this presentation. The most significant of these known risks and uncertainties are described in the Company’s Form 10-K, Form 10-Q, and Form 8-K reports (including all amendments to those reports). The Company does not undertake any obligation to update its forward-looking statements.

# COMPANY PROFILE

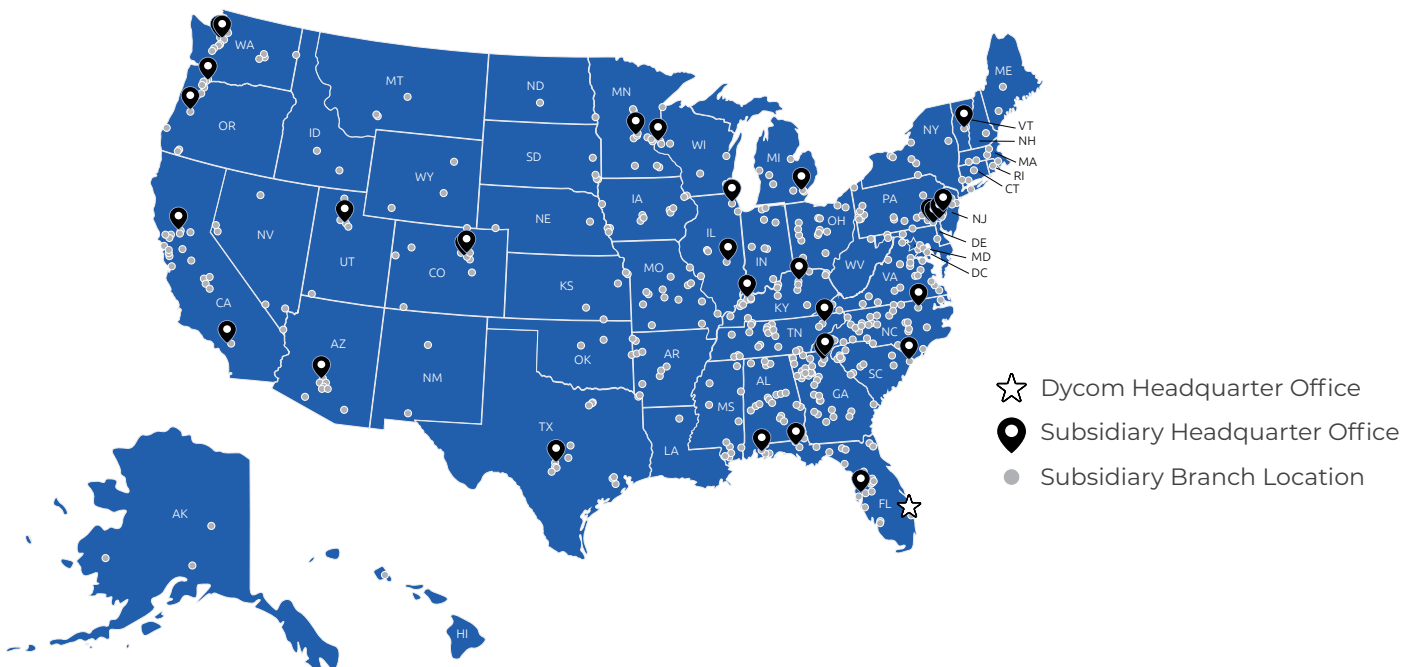

**Dycom Industries, Inc.** is a leading provider of specialty contracting services focused on the digital infrastructure, telecommunications and utilities industries throughout the United States. Since our incorporation in the State of Florida in 1969, we have expanded our scope and service offerings organically and through strategic acquisitions.

## DYCOM'S NATIONWIDE PRESENCE

Today, Dycom is made up of 38 operating companies that serve a diverse customer base across all 50 states from hundreds of field offices. Our deep industry knowledge, strong customer relationships, broad geographic presence, and robust skilled workforce of over 19,500 employees provide the scale needed to execute quickly on opportunities to service existing and new customers throughout urban, suburban, and rural America.

## A STRATEGIC LABOR ADVANTAGE

As the demand for digital infrastructure continues to grow, so does the need for a highly skilled workforce to build it. Our disciplined and strategic workforce management ensures we can meet our customers' needs with unmatched safety and quality. Through our training programs and facilities, including our recently announced flagship immersive training center outside of Atlanta, we provide hands-on training in real-world environments. This commitment to developing talent allows us to consistently deliver, ensuring a scaled, high-quality workforce required to lead this generational deployment.

# The People Connecting America<sup>®</sup>

## FAMILY OF COMPANIES

Our national presence, with hundreds of field offices and deep local knowledge, is the engine that drives Dycom. This powerful combination of scale and local expertise allows us to seamlessly execute increasingly large and complex infrastructure projects. While our subsidiaries operate independently, we are a unified family of companies, sharing a commitment to safety, quality and technical excellence that ensures we deliver everywhere we operate.

# CEO LETTER

APRIL 2026

## POSITIONED AT THE CENTER OF DATA

### Dear Fellow Shareholders,

Fiscal 2026 was a pivotal year for Dycom. We set records across nearly every financial metric and meaningfully enhanced our internal operations. We expanded our services through the acquisition of Power Solutions, establishing a new Building Systems segment to complement our core Communications capabilities and broadening our reach within the digital infrastructure space. We grew our backlog with high-quality, diversified work, ending the year at more than \$9.5 billion. Dycom's position has never been stronger, and we enter fiscal 2027 ready to capitalize on that momentum.

### FY2026 ACCOMPLISHMENTS

#### FINANCIAL METRICS

This year, Dycom delivered all-time record revenue of \$5.55 billion. We delivered Non-GAAP Adjusted EBITDA of \$737.7 million, or 13.3% of total contract revenues, and we grew Non-GAAP Adjusted Diluted EPS to \$11.97. **Notably, we more than doubled Free Cash Flow to \$435.3 million**, a significant achievement against historical free cash flow norms. We are very pleased with these strong results and believe we are well positioned for continued performance gains across nearly all metrics in the year ahead.

**18%**

TOTAL REVENUE GROWTH

**105 bps**

ADJUSTED EBITDA MARGIN GROWTH

**30%**

ADJUSTED DILUTED EPS GROWTH

Non-GAAP Reconciliations begin on page 108.

## COMMUNICATIONS SEGMENT

Demand drivers across Communications remain robust. In fiscal 2026, Fiber-to-the-Home (FTTH) led in our overall growth and our customers continued to affirm or increase their homes passed goals. We were well positioned to meet this growing demand during the year delivering millions of passings for our customers while expanding into key new markets and further increasing our footprint.

Consolidation continues across our customer set, a trend we expect to persist. **Customer mergers and acquisitions are positive for Dycom as they generally include an infusion of capital and supply chain consolidation.** This supply chain consolidation tends to favor larger, scaled partnerships and Dycom has consistently capitalized on these opportunities. This is a competitive advantage that we are confident will become more pronounced as the industry continues to evolve.

Our service and maintenance capabilities are core to our strategy, and during the fiscal year we delivered over 50% of total Communications revenue through our service and maintenance business. While the growth rate for maintenance naturally trails our

high-velocity build programs as it scales with new plant installations and geographic expansion, we are pleased that fiscal 2026 included expansion into key new markets and increased footprints across many customers.

Strong demand combined with our successful execution resulted in margin growth in this segment even as we reinvested for the future. Our book-to-bill ratio ended the year at 1.2x, which we believe positions us well for continued momentum.

## BUILDING SYSTEMS SEGMENT

In fiscal 2026 we acquired Power Solutions, a milestone transaction that further strengthened Dycom's position at the center of digital infrastructure and expanded our platform to meet the growing needs of hyperscalers and technology firms. We continue to be impressed by the leadership and organizational strength of the Power Solutions team. The integration of this business is on track, and we are investing in growth opportunities for both Power Solutions and our new Building Systems segment as a whole.

Dycom serves as the indispensable backbone, providing the skilled workforce to build the infrastructure that computes and transmits this data.

## BUILDING ON OUR SUCCESS

Over the past five years, Dycom's revenue grew by approximately 73%, Non-GAAP Adjusted EBITDA margin is up over 350 basis points, and Non-GAAP Adjusted EPS has increased by approximately 298%. We have extended our footprint to all 50 states and, more recently, moved "inside the walls" of the data center market.

**This positions our skilled workforce, nearly 20,000 strong, at the center of data and digital infrastructure.** Our strategy is built on a simple reality: data creation and consumption have grown annually for over three decades. As we transition from the "Zettabyte" to the "Yottabyte" era, current industry projections suggest data may scale exponentially. In fact, some experts project that the world will create more data over the next three years than throughout all prior history<sup>1</sup>. Dycom serves as the indispensable backbone, providing the skilled workforce to build the infrastructure that computes and transmits this data. The enormous infrastructure demand ahead gives Dycom a broadly diversified pipeline of opportunities spanning multiple demand drivers, with a timeline that exceeds a decade.

## OUR MARKET-LEADING CAPABILITIES

### PEOPLE

Our scale, breadth and capability set across digital infrastructure is unmatched and it's our skilled workforce that differentiates Dycom every day. It starts with safety, and our team's steadfast commitment to ensuring everyone goes home the same way they showed up each day is readily seen in the disciplines of our Headway® program, and in our strong results, including maintaining a TRIR below 1.0 again this year. Coupled with our Rightway™ quality program, our team is committed to raising the bar for our customers and communities.

### TRAINING

Core to our mission of delivering at the highest level is our unwillingness to be satisfied; we are always working to improve every facet of our enterprise and execution. This requires a continuous investment in our people and our training programs are key to this endeavor.

Our training programs allow our employees to build lifelong careers; notably, the vast majority of our operational leadership started in the field.

We recently announced our flagship training facility outside of Atlanta which will take our already strong curriculum to the next level, providing hands-on

training in real world environments. Complemented by dozens of our existing regional and local training facilities around the country, Dycom is strategically positioned to grow our workforce in front of our customers' accelerating and diverse build programs.

### INNOVATION

Delivering value to our workforce and customers requires constant innovation and our culture of invention through investment has placed Dycom at the cutting edge. Our proprietary technologies and tools streamline information flow and enhance customer interaction. We've deployed numerous AI tools centered around making our teams safer and more efficient. Through these innovations, we have driven enhanced margins and importantly, built durable efficiencies that create further margin growth opportunities.

Our training programs allow our employees to build lifelong careers; notably, the vast majority of our operational leadership started in the field.

As we continue our growth trajectory, we remain committed to our disciplined capital allocation strategy with a focus on funding organic growth and then balancing M&A opportunities with share repurchases.

## INVESTING IN OUR FUTURE FROM A POSITION OF STRENGTH

As we continue our growth trajectory, we remain committed to our disciplined capital allocation strategy with a focus on funding organic growth and then balancing M&A opportunities with share repurchases. Within Communications, we operate in all 50 states and work across hundreds of customers, and as such, we are prioritizing and investing in organic growth opportunities. **In the Building Systems segment, we plan to evaluate further investments in M&A as opportunities that meet our strategic criteria arise, with a focus on long-term shareholder value creation.** As in the past, we remain committed to a conservative leverage profile as we invest, with a long-term goal of staying near 2.0x net leverage.

We are pursuing our strategy from a position of financial strength. We ended fiscal 2026 with over \$1.45 billion of liquidity, positioning us well to support future growth. During fiscal 2026, we upsized our credit agreement, extended its maturity and successfully issued new 7-year term loan B debt as part of our acquisition financing. Pro forma net leverage at the end of the quarter was already reduced to 2.3x Adjusted EBITDA and we see a clear path to deliver further to approximately 2.0x net leverage over the next 12 months, maintaining our financial flexibility for continued strategic growth and investment.

# THANK YOU

In closing, I would like to thank the men and women of Dycom for working safely, for their dedication and for delivering the highest level of quality. You are what makes Dycom great, and the future has never been brighter. To our customers, thank you for your continued trust and partnership—we work every day to raise the bar in our delivery, execution, and relationships.

I would also like to thank our retiring board members, Laurie Thomsen and Luis Avila-Marco, for their support and stewardship.

And to our shareholders—thank you for your continued support as we pursue our vision to be the people connecting America.

Sincerely,

**Dan Peyovich**  
President and  
Chief Executive Officer

### DEMAND DRIVERS

We are strategically positioned to capitalize on a diverse set of long-term drivers that are fueling record investment in digital infrastructure:

- **Fiber-to-the-Home (FTTH):** Capitalizing on multi-year commitments to expand high-speed broadband
- **Fiber Infrastructure Backbone:** Increasing demand for long-haul, middle mile and inside-the-fence fiber infrastructure to support cloud and AI-enabled data center growth
- **Data Center Building Systems:** Unprecedented surge in demand for data center building systems, including electrical, driven by explosive growth of cloud compute and AI
- **Government Programs:** Continued state and federal program spending to bridge the digital divide across all 50 states
- **Wireless:** Wireless network modernization to meet increasing digital demands for ultra-high speed wireless
- **Service and Maintenance:** Foundational Core Maintenance and Operations Services provide operational resiliency and a persistent source of recurring revenue

# OUR SEGMENTS

As of Q4 2026, the Company reports its business in two reportable segments: **Communications** and **Building Systems**. This new segment reporting reflects how Dycom's business is managed and the positioning of the Company's strategies and expanding platform to provide comprehensive solutions as we address the growing demands for digital infrastructure.

## COMMUNICATIONS

**\$5.450B**

FY 26 TOTAL CONTRACT REVENUES

**\$726.6M**

FY 26 ADJUSTED EBITDA

**\$8.333B**

FY 26 TOTAL BACKLOG<sup>4</sup>

The Communications segment provides specialty contracting services, including program management, planning; engineering and design; aerial, underground, and wireless construction; maintenance; and fulfillment services for telecommunications providers. The Communications segment also provides underground facility locating services for various utilities, including telecommunications providers, as well as other construction and maintenance services for electric and gas utilities. In fiscal 2026, this segment achieved record results fueled by an intensifying demand for high-capacity connectivity. Performance was led by continued strong demand from FTTH programs, long-haul and middle mile fiber infrastructure deployments, growing inside the fence opportunities and maintenance and operations services.

## BUILDING SYSTEMS

**\$95.8M**

FY 26 TOTAL CONTRACT REVENUES

**\$11.1M**

FY 26 ADJUSTED EBITDA

**\$1.209B**

FY 26 TOTAL BACKLOG<sup>4</sup>

The Building Systems segment provides comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities. This segment includes the results of Power Solutions following the closing of the acquisition on December 23, 2025. This strategic expansion builds upon our 'inside-the-fence' fiber work in the Communications segment, extending our expertise inside the data center itself and broadening our platform for long-term growth. We are already leveraging significant cross-selling opportunities between our segments to meet the complex, end-to-end digital infrastructure needs of hyperscalers and network operators.

---

# EXECUTING OUR STRATEGY

Dycom's strategic roadmap is built on a foundation of disciplined execution and a relentless commitment to safety and quality. We leverage our differentiated scale and deep local knowledge to solve the most complex challenges in digital infrastructure. By aligning our national reach with local credibility, we provide a strategic, scaled partnership to the world's leading carriers and hyperscalers.

## OUR STRATEGIC OBJECTIVES

To drive long-term value for our shareholders and provide unparalleled opportunities for our people, we are focused on three core objectives:

- **Capitalize on Secular Growth:** Partnering with customers to meet intensifying demand across diverse infrastructure drivers.
- **Drive Margin Expansion:** Improving profitability through operating leverage, field efficiency, and high-grading our pipeline.
- **Maximize Returns:** Deploying capital to ensure long-term value creation through organic investment and strategic M&A.

## OUR STRATEGIC PRIORITIES

We execute our objectives through a resilient operating model that transforms industry complexity into a competitive advantage. As we look toward fiscal 2027, Dycom is focused on four strategic priorities. By leveraging our scale and technical expertise, we continue to drive the operational excellence that delivers long-term value for our customers and shareholders.

1. **Talent and Workforce Development** – With a workforce exceeding 19,500, we are investing strategically to meet intensifying customer demand and ensure our teams deliver the safety and quality synonymous with the Dycom brand. These broader investments in the training and development of our people, paired with significant enhancements to our benefits package, further our efforts to remain the employer of choice in our space.
2. **Segment Expansion** – We are focused on the strategic expansion of our Building Systems segment, utilizing Power Solutions as a foundation for both organic growth and disciplined, complementary acquisitions. Our expansion strategy remains rooted in strict investment criteria and a steadfast commitment to our long-term net leverage targets.

- 3. Margin Expansion** – We continue to drive margin improvement through productivity gains and operating leverage. Our commitment to field efficiency is unwavering, grounded in a disciplined approach to safety, quality, and financial performance.
- 4. Cash Flow & Fleet Optimization** – We continue to strengthen our cash position by refining internal processes, sharpening our conversion cycle, and identifying new opportunities to enhance cash flow. This includes capturing meaningful efficiencies within our capital expenditures from a data-driven approach that allows us to optimize fleet usage and maintenance, sustaining high performance with a lower capital footprint.

## THE DYCOM STANDARD

Dycom’s strength is rooted in the expertise of our workforce and our proven ability to raise the bar for our customers. In striving to deliver at the highest possible level, we are setting the industry standard for focused, scaled and high-quality execution.

### Cautionary Note Concerning Forward-Looking Statements

This Annual Report on Form 10-K, including any documents that may be incorporated by reference, may contain forward-looking statements. Forward looking statements can be identified with words such as “believe,” “expect,” “anticipate,” “estimate,” “intend,” “project,” “forecast,” “target,” “outlook,” “may,” “should,” “could,” and similar expressions, as well as statements written in the future tense. These statements, as well as any other written or oral forward-looking statements we may make from time to time in other SEC filings or other public communications are intended to qualify for the “safe harbor” from liability established by the Private Securities Litigation Reform Act of 1995. You should not consider forward-looking statements as guarantees of future performance or results. When made, forward-looking statements are based on information known to management at such time and/or management’s good faith belief with respect to future events. Such statements are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in our forward-looking statements. Important factors, assumptions, uncertainties, and risks that could cause such differences include, but are not limited to:

- projections of revenues, income or loss, or capital expenditures;
- future economic conditions and trends in the industries we serve;
- changes in government policies and laws affecting our business, including related to funding for infrastructure projects, trade restrictions and tariff policies;
- our highly concentrated customer base;
- the competitive environment in which we operate;
- customer capital budgets and spending priorities;
- our plans for future operations, growth and services, including contract backlog;
- our plans for future acquisitions, dispositions, or financial needs;
- expected benefits and synergies of businesses acquired and future opportunities for the combined businesses;
- our significant accounts receivable and contract assets;
- availability of capital;
- restrictions imposed by our senior notes and credit agreement;
- use of our cash flow to service our debt;
- the effect of changes in tax law;
- potential liabilities and other adverse effects arising from occupational health, safety, and other regulatory matters;
- potential exposure to environmental liabilities;
- our potential exposure to litigation, indemnity claims, warranty claims, and other liabilities and disputes;
- determinations as to whether the carrying value of our assets is impaired;
- duration and severity of public health emergencies and their ultimate impact across our business;
- the impact of seasonality and adverse weather conditions on demand for our services;
- the impact of technological change on our customers’ spending and our ability to keep pace with technological developments;
- our ability to attract and retain qualified employees and subcontractors;

- the impact of a failure, outage or cybersecurity breach of our technology or information technology systems or those of third-party providers;
- other risks outlined in our periodic filings with the SEC; and
- other factors that are discussed within Item 1. *Business*, Item 1A. *Risk Factors* and Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations* of this Annual Report on Form 10-K.

Our forward-looking statements are expressly qualified in their entirety by this cautionary statement. We do not undertake to update or revise forward-looking statements to reflect events or circumstances arising after the date of those statements or to reflect the occurrence of anticipated or unanticipated events.

## **PART I**

### **Item 1. *Business*.**

Dycom Industries, Inc. (“Dycom,” the “Company,” “we,” or “us”) is a leading provider of specialty contracting services focused on the digital infrastructure, telecommunications and utilities industries throughout the United States. Since our incorporation in the State of Florida in 1969, we have expanded our scope and service offerings organically and through acquisitions. Today, Dycom is made up of 38 operating companies that serve a diverse customer base across all 50 states from hundreds of field offices. Our deep industry knowledge, strong customer relationships, broad geographic presence and skilled workforce provide the scale needed to quickly execute on opportunities to service existing and new customers throughout urban and rural America.

Dycom’s operating companies provide a comprehensive portfolio of specialty services, including program management, planning, engineering and design; aerial, underground, and wireless construction; maintenance; and fulfillment services. We also provide underground facility locating services for various utilities, including telecommunications providers, as well as other construction and maintenance services for electric and gas utilities. Additionally, with the acquisition of Power Solutions, LLC (“Power Solutions”) in the fourth quarter of fiscal 2026, we provide comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities. Dycom supplies the expertise, labor, equipment, and tools necessary to provide services to our customers.

### **Reportable Segments**

The Company’s operations are organized in two reportable segments: Communications and Building Systems.

#### *Communications Segment*

The Communications segment is comprised of multiple operating segments which are managed on a decentralized basis, where each operating segment consists of a subsidiary (or in certain instances, the combination of two or more subsidiaries), and have been aggregated into one reportable segment based on their similar economic characteristics, nature of services and production processes, type of customers, and service distribution methods. The Communications operating segments’ results are regularly reviewed by the Company’s Chief Executive Officer, who serves as the Company’s chief operating decision maker (CODM), to assess performance and allocate resources.

The Communications segment provides a range of construction, maintenance, and installation services, including the placement and splicing of fiber, copper, and coaxial cables. We excavate trenches to place these cables; place related structures, such as poles, anchors, conduits, manholes, cabinets, and closures; place drop lines from main distribution lines to a consumer's home or business; and maintain and remove these facilities. We provide these services for both telephone companies and cable multiple system operators in connection with the deployment, expansion, or maintenance of new and existing networks. We also provide tower construction, lines and antenna installation, foundation and equipment pad construction, small cell site placement for wireless carriers, and equipment installation and material fabrication and site testing services. Additionally, we provide underground facility locating services for various utility companies, including telecommunications providers. Our underground facility locating services include locating telephone, cable television, power, water, sewer, and gas lines. In addition, we install and maintain customer premise equipment. We also perform construction and maintenance services for electric and gas utilities and other customers. In addition, the Communications segment provides engineering services to telecommunications providers, including the planning and design of aerial, underground, and buried fiber optic, copper, and coaxial cable systems that extend from the telephone company hub location, or cable operator headend, to a consumer's home or business. We also plan and design wireless networks in connection with the deployment of new and enhanced macro cell and new small cell sites. Additionally, we obtain rights of way and permits in support of our engineering activities and those of our customers and provide program and project management and inspection personnel in conjunction with engineering services or on a stand-alone basis.

### *Building Systems Segment*

During fiscal 2026, following the acquisition of Power Solutions, the CODM reevaluated the Company's reportable segments, which resulted in the addition of the Building Systems segment as a component of management's internal financial information used for operational decision-making. Beginning in fiscal 2026, the Company reports the results of the Building Systems segment separately as a reportable segment. The Building Systems segment specializes in providing comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities.

### **Business Strategy**

*Capitalize on Long-Term Growth Drivers.* We are well-positioned to benefit from the increased demand for network telecommunications bandwidth that is necessary to ensure reliable video, voice, and data services. Demand for high-speed and low-latency connectivity is expanding, driven by data-intensive applications and mobile usage, necessitating extensive wireline network upgrades and extensions, new and expanding fiber and electrical infrastructure for data centers to meet the current and future needs of cloud compute and artificial intelligence ("AI"), and advanced wireless network deployments. This widespread need for expanded and enhanced connectivity fuels significant opportunities within the digital infrastructure industry. Our customers will benefit from our expanded capabilities to support data center development by combining our Communications segment's expertise in fiber and our Building Systems segment's leadership in electrical, two of the most critical elements in digital infrastructure. Developments in consumer and business applications within the telecommunications industry, including advanced digital and video service offerings, continue to increase demand for greater wireline and wireless network capacity and reliability. Telecommunications network operators are increasingly deploying fiber optic cable technology deeper into their networks and closer to consumers and businesses in order to respond to consumer demand, competitive realities, and public policy support. Additionally, wireless carriers are upgrading their networks and contemplating next generation mobile solutions in response to the significant demand for wireless broadband, driven by the proliferation of smart phones, mobile data devices and other advances in technology. Increasing wireless data traffic and emerging wireless technologies are driving wireline deployments in many regions of the United States. Furthermore, significant consolidation and merger activity among telecommunications providers could also provide increased demand for our services as networks are integrated.

*Selectively Increase Market Share.* We believe our expertise, breadth of service offerings and reputation for providing high quality services and the ability to provide those services nationally creates opportunities to expand market share. Our operating structure and multiple points of contact within customer organizations positions us favorably to win new opportunities and maintain strong relationships with our customers. We are able to address larger customer opportunities due to our significant financial resources that some of our comparatively more capital-constrained competitors may be unable to take on.

*Pursue Disciplined Financial and Operating Strategies.* We manage the financial aspects of our business by centralizing certain activities that allow us to leverage our scope and scale and reduce costs. We have centralized functions, such as information technology, legal, risk management, treasury, tax, the approval of capital equipment procurements, and the design and administration of employee benefit plans. In contrast, we decentralize the recording of transactions and the financial reporting necessary for timely operational decisions. This operating structure promotes greater accountability for business outcomes by our local managers. Our local managers are responsible for marketing, field operations, and ongoing customer

service, and are empowered to capture new business and execute contracts on a timely and cost-effective basis. Executive management supports the local marketing efforts while also marketing at a national level. This operating structure enables us to benefit from our scale while retaining the organizational agility necessary to compete with smaller, regional and privately owned competitors.

*Pursue Selective Acquisitions.* We pursue acquisitions that are operationally and financially beneficial for the Company as they provide incremental revenue, geographic and service offering diversification, and complement existing operations. We generally target companies for acquisition that have defensible leadership positions in their market niches, the opportunity to generate profitability that meets or exceeds industry averages, proven operating histories, sound management and certain clearly identifiable cost synergies.

## **Fiscal Year**

Our fiscal year ends on the last Saturday in January. As a result, each fiscal year consists of either 52 weeks or 53 weeks of operations (with the additional week of operations occurring in the fourth quarter). Fiscal 2026 consisted of 53 weeks while fiscal 2025 and fiscal 2024 each consisted of 52 weeks of operations.

## **Customer Relationships**

We have established relationships with many leading telecommunications providers, including telephone companies, cable multiple system operators, wireless carriers, telecommunication equipment and infrastructure providers, as well as electric and gas utilities. Additionally, we have expanded our footprint with the Power Solutions acquisition, where we maintain strategic relationships with several leading general contractors specializing in data center construction. We supply the labor, tools, and equipment necessary to provide these essential services to our diverse customer base.

Our customer base is highly concentrated. During fiscal 2026, we derived approximately 25.4% of our total contract revenues from AT&T Inc., 14.0% from Verizon Communications, Inc. and 10.8% from Lumen Technologies Inc. Revenues for Verizon Communications, Inc. includes revenue attributable to Frontier Communications Corporation retrospectively for all periods presented as a result of its acquisition by Verizon Communications, Inc. on January 20, 2026. On February 2, 2026, AT&T Inc. completed its acquisition of substantially all of the mass markets fiber business from Lumen Technologies Inc. Since this transaction occurred subsequent to fiscal 2026, we have continued to report revenues for the mass markets fiber business under Lumen Technologies Inc. We believe that a substantial portion of our total contract revenues and operating income will continue to be generated from a concentrated group of customers and that the identity and proportion of our contract revenues arising from our work for our top customers will fluctuate.

We serve our markets locally through dedicated and experienced personnel. Our sales and marketing efforts are the responsibility of the management teams of our operating companies. These teams possess intimate knowledge of their particular markets, allowing us to be responsive to customer needs. Executive management supports these efforts, both at the local and national levels, focusing on contacts with the appropriate personnel within our customers' organizations.

We perform a significant amount of our services under master service agreements and other contracts that contain customer-specified service requirements. These agreements include discrete pricing for individual tasks. We generally possess multiple agreements with each of our significant customers. To the extent that such agreements specify exclusivity, there are often exceptions, including the ability of the customer to issue work orders valued above a specified dollar amount to other service providers, the performance of work with the customer's own employees, and the use of other service providers when jointly placing facilities with another utility. In most cases, a customer may terminate an agreement for convenience. Historically, multi-year master service agreements have been awarded primarily through a competitive bidding process; however, occasionally we are able to negotiate extensions to these agreements. We provide the remainder of our services pursuant to contracts for specific projects. These contracts may be long-term (with terms greater than one year) or short-term (with terms less than one year) and often include customary retainage provisions under which the customer may withhold 5% to 10% of the invoiced amounts pending project completion and closeout.

## **Cyclical and Seasonality**

The cyclical nature of the industries we serve affects demand for our services. The capital expenditure and maintenance budgets of our customers, and the related timing of approvals and seasonal spending patterns, influence our contract revenues and results of operations. Factors affecting our customers and their capital expenditure budgets include, but are not limited to, overall economic conditions, including the cost of capital, the introduction of new technologies, our customers' debt levels and capital structures, our customers' financial performance, and our customers' positioning and strategic plans. Other factors that

may affect our customers and their capital expenditure budgets include new regulations or regulatory actions impacting our customers' businesses, merger or acquisition activity involving our customers, and the physical maintenance needs of our customers' infrastructure.

Our contract revenues and results of operations exhibit seasonality and are impacted by adverse weather changes as we perform a significant portion of our Communications segment work outside. Consequently, adverse weather, which is more likely to occur with greater frequency, severity, and duration during the winter, as well as reduced daylight hours, impact our operations during the fiscal quarters ending in January and April. Additionally, extreme weather conditions such as major or extended winter storms, droughts and tornados, wildfires, and natural disasters, such as floods, hurricanes, tropical storms, whether as a result of climate change or otherwise, could also impact the demand for our services, or impact our ability to perform our services. Also, several holidays fall within the fiscal quarter ending in January, which decreases the number of available workdays in this fiscal quarter. Because of these factors, we are most likely to experience reduced revenue and profitability or losses during the fiscal quarters ending in January and April compared to the fiscal quarters ending in July and October.

## Backlog

Our backlog is an estimate of the uncompleted portion of services to be performed under contractual agreements with our customers. The following table sets forth our backlog as of January 31, 2026 and January 25, 2025 (dollars in millions):

	<b>Fiscal Year Ended</b>			
	<b>January 31, 2026</b>		<b>January 25, 2025</b>	
	<b>Total Backlog</b>	<b>Next 12 Months (included in Total Backlog)</b>	<b>Total Backlog</b>	<b>Next 12 Months (included in Total Backlog)</b>
Communications	\$ 8,333.5	\$ 5,249.6	\$ 7,759.9	\$ 4,642.5
Building Systems	1,208.5	1,108.4	—	—
<b>Total</b>	<b>\$ 9,542.0</b>	<b>\$ 6,358.0</b>	<b>\$ 7,759.9</b>	<b>\$ 4,642.5</b>

Our backlog represents an estimate of services to be performed pursuant to master service agreements and other contractual agreements over their terms. These estimates are based on contract terms and evaluations regarding the timing of the services to be provided. In the case of master service agreements which are commonly used within our Communications segment, backlog is estimated based on the work performed in the preceding 12-month period, when applicable. When estimating backlog for newly initiated master service agreements and other long and short-term contracts, we also consider the anticipated scope of the contract and information received from the customer during the procurement process and, where applicable, other ancillary information. Building Systems segment backlog represents management's estimate of contract revenues expected to be realized related to remaining performance obligations from the portion of firm orders under fixed price and modified fixed-price contracts not yet completed or for which work has not yet begun. The majority of our backlog comprises services under master service agreements and other long-term contracts.

Generally, our customers are not contractually committed to procure specific volumes of services. Contract revenue estimates reflected in our backlog can be subject to change due to a number of factors, including contract cancellations or changes in the amount of work we expect to be performed under a contract. In addition, contract revenues reflected in our backlog may be realized in different periods from those previously anticipated due to these factors as well as project accelerations or delays due to various reasons, including, but not limited to, changes in customer spending priorities, project cancellations, regulatory interruptions, scheduling changes, commercial issues, such as permitting, engineering revisions, job site conditions and adverse weather. The amount or timing of our backlog can also be impacted by the merger or acquisition activity of our customers. All of our contracts may be cancelled by our customers, and work previously awarded to us pursuant to these contracts may be cancelled, regardless of whether or not we are in default. Historically, the amount of backlog related to uncompleted projects in which a provision for estimated losses was recorded has not been material.

Backlog is not a measure defined by United States generally accepted accounting principles ("GAAP") and should be considered in addition to, but not as a substitute for information provided in accordance with GAAP. Participants in our industry also disclose a calculation of their backlog; however, our methodology for determining backlog may not be comparable to the methodologies used by others. We utilize our calculation of backlog to assist in measuring aggregate awards under existing contractual relationships with our customers. We believe our backlog disclosures will assist investors in better

understanding this estimate of the services to be performed pursuant to awards by our customers under existing contractual relationships.

## **Competition**

The specialty contracting services industry in which we operate is highly fragmented and includes a large number of participants. We compete with several large multinational corporations and numerous regional and privately owned companies. In addition, a portion of our customers directly perform many of the same services that we provide. Relatively few barriers to entry exist in the markets in which we operate. As a result, any organization that has adequate financial resources, access to technical expertise, and the necessary equipment may become a competitor and the degree to which an existing competitor participates in the markets that we operate may increase rapidly. The principal competitive factors for our services include geographic presence, quality of service, worker and general public safety, price, breadth of service offerings, and industry reputation. We believe that we compare favorably to our competitors when evaluated against these factors.

## **Human Capital Resources**

We employed approximately 19,556 persons as of January 31, 2026. We focus significant attention on attracting and retaining talented and experienced individuals to manage and support our operations. We offer our employees a broad range of company-paid benefits, and we believe our compensation package and benefits are competitive with others in our industry. We are committed to hiring, developing and supporting a workforce that consists of well-trained and highly motivated employees.

Each employee, officer and director of the Company must adhere to the highest standards of business ethics when dealing with each other and with customers, suppliers and all other persons as outlined in our Code of Business Conduct and Ethics and our Code of Ethics for Senior Financial Officers (collectively, the “Code of Conduct”). The Code of Conduct requires all employees to conduct all business dealings with honesty and candor and with respect for the law and the highest standard of ethical behavior. Personal integrity, good faith and fair dealing, the respectful treatment of others, and all other attributes of good behavior are essential for our employees, but special responsibility to uphold these values rests on our officers, managers and supervisors as they establish the climate for all other employees. Officers, managers and supervisors are required to create a work environment that encourages employees to discuss concerns without fear of retaliation. Should potential violations of the Code of Conduct or the law occur, employees are encouraged to voice concerns promptly and are reminded that retaliation against anyone who reports a potential violation in good faith will not be tolerated. All employees are required to complete the training on the Code of Conduct and Ethics, and we report material matters related to the Code of Conduct to the Audit Committee of our Board.

Our work is highly specialized and many of our employees receive training in, and possess, specialized technical skills that are necessary to operate our business. We are committed to instilling safe work habits through proper training and supervision of our employees and expect adherence to safety practices that ensure a safe work environment. Our safety programs require employees to participate both in safety training required by law and training that is specifically relevant to the work they perform. Safety directors review incidents, examine trends, and implement changes in procedures to address safety issues.

Our Board of Directors, through our Compensation Committee and our Corporate Governance Committee, provides oversight on employee matters. The Compensation Committee receives updates on activities, strategies and initiatives related to the compensation and retention of our employees, and our Corporate Governance Committee oversees environmental, social and human capital matters, as well as the development and succession planning of senior management.

## **Subcontractors and Materials**

We contract with subcontractors to perform a significant amount of our work and to manage fluctuations in work volumes and to reduce the amount we expend on fixed assets and working capital. These subcontractors are typically small, privately owned companies that provide their own employees, vehicles, tools and insurance coverage. No individual subcontractor is financially significant to the Company.

For a majority of the contract services we perform, we are provided most of the required materials by our customers. Because our customers retain the financial and performance risk associated with materials they provide, we do not include the costs associated with those materials in our contract revenues or costs of earned revenues. Under contracts that require us to supply part or all of the required materials, we typically do not depend upon any one source for those materials.

## Risk Management and Insurance

Claims arising in our business generally include workers' compensation claims, various general liability and damage claims, and claims related to motor vehicle collisions, including personal injury and property damage. For claims within our insurance program, we retain the risk of loss, up to certain limits, for matters related to automobile liability, general liability (including damages associated with underground facility locating services), workers' compensation, and employee group health. Additionally, within our aggregate coverage limits and above our base layer of third-party insurance coverage, we have retained the risk of loss at certain levels of exposure. Our Building Systems segment is fully insured for these risks through third-party insurance policies, and we do not retain the risk of loss for claims related to those operations.

We carefully monitor claims and actively participate with our insurers and our third-party claims administrator in determining claims estimates and adjustments. We accrue the estimated costs of claims as liabilities, and include estimates for claims incurred but not reported. Due to fluctuations in our loss experience from year to year, insurance accruals have varied and can affect our operating margins. Our business could be materially and adversely affected if we experience an increase of insurance claims at certain amounts, or in excess of our coverage limits. See Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*, and Note 11, *Accrued Insurance Claims*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K.

## Regulation

We are subject to various federal, state, and local government regulations, including laws and regulations relating to environmental protection, work-place safety, and other business requirements.

*Environmental.* A significant portion of the work performed by our Communications segment is associated with the underground networks of our customers and we often operate in close proximity to pipelines or underground storage tanks that may contain hazardous substances. We could be subject to potential material liabilities in the event we fail to comply with environmental laws or regulations or if we cause or are responsible for the release of hazardous substances or cause other environmental damages. In addition, failure to comply with environmental laws and regulations could result in significant costs including remediation costs, fines, third-party claims for property damage, loss of use, or personal injury, and, in extreme cases, criminal sanctions.

*Workplace Safety.* We are subject to the requirements of the federal Occupational Safety and Health Act ("OSHA") and comparable state statutes that regulate the protection of the health and safety of workers. Our failure to comply with OSHA or other workplace safety requirements could result in significant liabilities, fines, penalties, or other enforcement actions and affect our ability to perform the services that we have been contracted to provide to our customers.

*Business.* We are subject to a number of state and federal laws and regulations, including those related to utility oversight contractor licensing and the operation of our fleet. If we are not in compliance with these laws and regulations, we may be unable to perform services for our customers and may also be subject to fines, penalties, and the suspension or revocation of our licenses.

## Information About Our Executive Officers

The following table sets forth certain information concerning the Company's executive officers as of January 31, 2026, all of whom serve at the pleasure of the Board of Directors.

<u>Name</u>	<u>Age</u>	<u>Office</u>	<u>Executive Officer Since</u>
Daniel S. Peyovich	50	President and Chief Executive Officer	January 6, 2021
Kevin M. Wetherington	57	Executive Vice President and Chief Operating Officer	October 7, 2024
H. Andrew DeFerrari	57	Senior Vice President and Chief Financial Officer	November 22, 2005
Jill L. Ramshaw	48	Vice President and Chief Human Resources Officer	February 17, 2025
Ryan F. Urness	53	Senior Vice President, General Counsel and Corporate Secretary	May 21, 2019

There are no arrangements or understandings between any executive officer of the Company and any other person pursuant to which any executive officer was selected as an officer of the Company. There are no family relationships among the Company's executive officers.

*Daniel S. Peyovich* has been the Company's President and Chief Executive Officer since November 2024. Prior to that, Mr. Peyovich was the Company's President since October 2024, its President and Chief Operating Officer from June 2024 to October 2024, and the Company's Executive Vice President and Chief Operating Officer from May 2021 to June 2024. Upon joining the Company in January 2021 until May 2021, he was the Company's Executive Vice President of Operations. Before joining the Company in January 2021, Mr. Peyovich spent 21 years in various leadership and management roles at Balfour Beatty Construction, including serving as President of its Northwest Division from 2014 to 2021.

*Kevin M. Wetherington* has been the Company's Executive Vice President and Chief Operating Officer since October 2024. Before joining the Company, Mr. Wetherington was Chief Health, Safety, Environment and Security and Quality Officer for Baker Hughes Company, a global energy technology company. Mr. Wetherington held various other senior positions with Baker Hughes Company starting in 2010. Prior to that, Mr. Wetherington served in senior positions with Weatherford International plc, a multinational oil services company from 2005 to 2010.

*H. Andrew DeFerrari* has been the Company's Senior Vice President and Chief Financial Officer since April 2008. Prior to that, Mr. DeFerrari was the Company's Vice President and Chief Accounting Officer since November 2005 and was the Company's Financial Controller from July 2004 through November 2005. Mr. DeFerrari was previously a senior audit manager with Ernst & Young Americas, LLC.

*Jill L. Ramshaw* has been the Company's Vice President and Chief Human Resources Officer since February 2025. Before joining the Company, Ms. Ramshaw was employed as the Senior Vice President of Human Resources for Marathon Oil Corporation, a leading energy company focused on exploration and production. Ms. Ramshaw holds a Master's degree in Psychology from the University of Aberdeen, UK and a Human Resources Management diploma from Robert Gordon University in Aberdeen, UK.

*Ryan F. Urness* has been the Company's Senior Vice President and General Counsel since April 2025 and the Company's Vice President and General Counsel from October 2018 to April 2025. Mr. Urness has been the Company's Corporate Secretary since May 2019. Prior to that, from May 2016 through October 2018, Mr. Urness was General Counsel and Corporate Secretary of USI Building Solutions, a provider of installation and distribution services to commercial and residential construction markets. From 2003 until May 2016, Mr. Urness was General Counsel and Corporate Secretary of Speed Commerce, Inc., a provider of e-commerce technology and fulfillment services.

## **Item 1A. Risk Factors.**

*Our business is subject to a variety of risks and uncertainties, including, but not limited to, the risks and uncertainties described below. You should read the following risk factors carefully in connection with evaluating our business and the forward-looking information contained in this Annual Report on Form 10-K. If any of the risks described below, or elsewhere in this Annual Report on Form 10-K were to occur, our financial condition and results of operations could suffer and the trading price of our common stock could decline. Additionally, if other risks not presently known to us, or that we do not currently believe to be significant, occur or become significant, our financial condition and results of operations could suffer and the trading price of our common stock could decline.*

### **Risks Related to Financial Performance or General Economic Conditions**

*Economic downturns, uncertain economic conditions, and capital market fluctuations may affect our customers' spending on the services we provide.* Macroeconomic conditions, including inflation, slower growth or recessionary conditions, changes to fiscal and monetary policy, wars or other geopolitical tensions, availability of credit, and fluctuations in interest rates could adversely affect demand for our services and the availability and cost of the materials and equipment we need to deliver our services. During periods of elevated and prolonged economic uncertainty our customers may delay, reduce or eliminate their spending on the services we provide. In addition, volatility in the debt or equity markets may impact our customers' access to capital and result in the reduction or elimination of spending on the services we provide. Our vendors, suppliers and subcontractors may also be adversely affected by these conditions. These conditions, which can develop rapidly, could adversely affect our revenues, results of operations, and liquidity.

*Trade restrictions could be imposed on goods, materials or component parts used in our business that we import from other countries, which could have an adverse effect on our results of operations.* Our industry could be impacted by the imposition, or the threat of the imposition of, tariffs placed on products imported from foreign countries that we use in our business, including steel, aluminum, fuel and motor vehicles or their component parts, fiber cable and other components that we utilize to build networks, or any resulting impacts from escalating trade hostilities with the countries from where we import products. There is an ongoing risk of new or additional tariffs being placed on goods, materials or components used in our business that could dramatically increase our costs, require us to increase prices to our customers or, if we are unable to do so, result in lower gross margins. Any escalation of trade tensions, including new or increased tariffs or a "trade war," or any global supply chain disruption, could have a significant adverse effect on U.S. or world trade, as well as on our results of operations.

*We derive a significant portion of our revenues from a small number of customers, and the loss of one or more of these customers could adversely affect our revenues, results of operations, and liquidity.* Our customer base is highly concentrated. Our industry is highly competitive and the revenue we expect from an existing customer in any market could fail to be realized if competitors who offer comparable services to our customers do so on more favorable terms or have a better relationship with a customer. We also continue to expand our opportunities with hyperscaler and data center customers, who are also highly concentrated, as a result of our acquisition of Power Solutions, LLC. Additionally, the continued consolidation of the telecommunications industry could result in the loss of a customer if, as a result of a merger or acquisition involving one or more of our customers, the surviving entity chooses to use one of our competitors for the services we currently provide. Our failure to adequately predict customer demand or otherwise optimize opportunities with our traditional telecommunications customers and our new hyperscaler and data center customers could adversely impact our revenues, backlog and financial condition.

*The capital and operating expenditure budgets and seasonal spending patterns of our customers affect demand for our services and the addition of new customers with differing behaviors may adversely impact our business.* Generally, our customers have no obligation to assign specific amounts of work to us. Customers decide to engage us to provide services based on, among other things, the amount of capital they have available and their spending priorities. Our customers' capital budgets may change for reasons over which we have no control. These changes may occur quickly and without advance notice. Any fluctuation in the capital or operating expenditure budgets and priorities of our customers could adversely affect our revenues, results of operations, and liquidity. Further, if we continue to broaden our customer base, we may become subject to different customer requirements or characteristics, including less advantageous contractual requirements, customers with financial or operational instability or increased contract terminations or project cancellations. Our failure or inability to anticipate or adapt to a changing customer base and shifting business models could have an adverse effect on our competitive position business or results of operations.

*Pandemics and public health emergencies could materially disrupt our business and negatively impact our operating results, cash flows and financial condition.* Pandemics and public health emergencies may impact our operating results,

cash flows and financial condition in ways that are uncertain, unpredictable and outside of our control. The extent of the impact of such an event depends on the severity and duration of the public health emergency or pandemic, as well as the nature and duration of federal, state and local laws, orders, rules, emergency temporary standards, regulations and mandates, together with protocols and contractual requirements implemented by our customers, that may be enacted or newly enforced in response. Additionally, our ability to perform our work during such an event may be dependent on the governmental or societal responses to these circumstances in the markets in which we operate. A pandemic or public health emergency is likely to heighten and exacerbate the risks described herein.

*Seasonality and adverse weather conditions affect demand for our services.* Our contract revenues and results of operations exhibit seasonality and are impacted by adverse weather changes as we perform a significant portion of our Communications segment work outside. Consequently, adverse weather, which is more likely to occur with greater frequency, severity, and duration during the winter, as well as reduced daylight hours, impact our operations during the fiscal quarters ending in January and April. Additionally, extreme weather conditions such as major or extended winter storms, droughts and tornados, wildfires, and natural disasters, such as floods, hurricanes, tropical storms, whether as a result of climate change or otherwise, could also impact the demand for our services, or impact our ability to perform our services. Also, several holidays fall within the fiscal quarter ending in January, which decreases the number of available workdays in this fiscal quarter. Because of these factors, we are most likely to experience reduced revenue and profitability or losses during the fiscal quarters ending in January and April compared to the fiscal quarters ending in July and October.

*We derive a significant portion of our revenues from multi-year master service agreements and other long-term contracts which our customers may cancel at any time or may reschedule or modify previously assigned work.* The majority of our long-term contracts are cancellable by our customers with little or no advance notice and for any, or no, reason. Our customers may also have the right to cancel or remove assigned work without canceling the contract or to reschedule or modify previously assigned work. We may also experience difficulty in managing and timely executing on long-term contracts due to the complex nature of the projects and changes in customer needs and priorities may adversely impact of the profitability of these contracts. In addition, these contracts typically include a fixed term that is subject to renewal or rebid on a periodic basis. We may be unsuccessful in securing contracts when their fixed terms expire. Our projected revenues assume that definitive work orders have been, or will be, issued by our customer, and that the work will be completed. The potential loss of work under master service agreements and other long-term contracts, or the rescheduling or modification of previously assigned work by a customer, could adversely affect our results of operations, cash flows, and liquidity, as well as any projections we provide.

*Our contracts contain provisions that may require us to pay damages or incur costs if we fail to meet our contractual obligations.* If we do not meet our contractual obligations our customers may look to us to pay damages or pursue other remedies, including, in some instances, the payment of liquidated damages. Additionally, if we fail to meet our contractual obligations, or if our customer anticipates that we cannot meet our contractual obligations, our customers may, in certain circumstances, seek reimbursement from us to cover the incremental cost of having a third party complete or remediate our work. Our results of operations could be adversely affected if we are required to pay damages or incur costs as a result of a failure to meet our contractual obligations.

*Our backlog is subject to reduction or cancellation, and revenues may be realized in different periods than initially reflected in our backlog.* Our backlog includes the estimated uncompleted portion of services to be performed under master services agreements and other contractual agreements with our customers. These estimates are based on, among other things, contract terms and projections regarding the timing of the services to be provided. In the case of master service agreements, backlog is calculated using as an input the amount of work performed in the preceding 12-month period, when applicable. Backlog for newly initiated master service agreements and other long and short-term contracts is estimated using the anticipated scope of the contract and information received from the customer in the procurement process.

Generally, our customers are not contractually committed to procure specific volumes of services. Contract revenue estimates reflected in our backlog can be subject to change due to a number of factors, including contract cancellations or changes in the amount of work we expect to be performed under a contract. In addition, contract revenues reflected in our backlog may be realized in different periods from those previously anticipated due to these factors as well as project accelerations or delays due to various reasons, including, but not limited to, changes in customer spending priorities, project cancellations, regulatory interruptions, scheduling changes, commercial issues, such as permitting, engineering revisions, job site conditions and adverse weather. The amount or timing of our backlog can also be impacted by the merger or acquisition activity of our customers. Our estimates of our customers' requirements during a future period may prove to be inaccurate. As a result, our backlog as of any particular date is an uncertain estimate of the amount and timing of future revenues and earnings.

*We have a significant amount of accounts receivable and contract assets, which could become uncollectible.* We extend credit to our customers because we perform work under contracts prior to being able to bill for that work. Deteriorating conditions in the industries we serve, bankruptcies, or financial difficulties of a customer or within the telecommunications sector generally may impair the financial condition of one or more of our customers and hinder their ability to pay us on a timely basis or at all. In addition, although in some instances we may have the right to file liens for certain projects, we may not be successful in enforcing those liens. The failure or delay in payment by one or more of our customers could reduce our cash flows and adversely affect our liquidity and results of operations.

*Our profitability is based on delivering services within the estimated costs established when we price our contracts.* A significant portion of our services are provided under contracts that have discrete pricing for individual tasks. Due to the fixed price nature of the tasks, our profitability could decline if our actual cost to complete each task exceeds our original estimates, as pricing under these contracts is determined based on estimated costs established when we enter into the contracts. A variety of factors could negatively impact the actual cost we incur in performing our work, such as changes made by our customers to the scope and extent of the services that we are to provide under a contract, delays resulting from weather and any pandemic or public health emergency, conditions at work sites differing materially from those anticipated at the time we bid on the contract, higher than expected costs of materials, including as a result of increased tariffs, and labor, delays in obtaining necessary permits, under absorbed costs, and lower than anticipated productivity. An increase in costs due to any of these factors, or for other reasons, could adversely affect our results of operations.

*Regulatory changes and requirements associated with government funding that is associated with certain capital spending initiatives of our customers may affect their spending on the services we provide.* Our customers operate in regulated industries and are subject to laws and regulations that can change frequently. Additionally, where our customers utilize governmental funding sources in connection with the work they contract us to perform, such work may be subject to new or enhanced regulatory requirements and compliance obligations. The application of new or enhanced regulatory requirements or obligations, or changes to the enforcement or interpretation of existing laws or regulations, may delay or constrain our ability to perform our work, increase our costs to perform our work without a corresponding increase in payment from our customers, and could cause our customers to reduce or delay spending on the services we provide, which could adversely affect our revenues, results of operations, and liquidity.

Considerable uncertainty exists regarding how future budget and program decisions will unfold and future funding for certain government programs in which we or our customers participate may be reduced, delayed or cancelled. The incoming administration announced a planned advisory commission to reform federal government processes and reduce expenditures. Pressures on and uncertainty surrounding the U.S. federal government's budget, and potential changes in budgetary priorities, could adversely affect the funding for infrastructure programs upon which we rely. Additionally, changes related to taxation, trade, economic and monetary policies, heightened diplomatic tensions or political and civil unrest, among other potential impacts, could adversely impact the global economy and our operating results.

*Technological change and decreased demand for new or additional digital infrastructure may affect our customers' spending on the services we provide.* We generate a significant majority of our revenues from our Communications segment customers, many of whom provide certain fiber-related services for hyperscaler and data center projects, and from our new Building Systems segment customers who focus on data center infrastructure to support AI needs. These customers have been and continue to be impacted by rapid technological change. We cannot be certain that global demand for data center capacity, additional digital infrastructure or AI-related projects will remain steady or increase, which could negatively impact our revenues, results of operations and backlog. Also, we may not have the skilled labor necessary to meet our customers' needs for new data center construction, available power may not be sufficient to complete projects and investment in hyperscaler activity or data center projects could decrease. New technological changes may also affect our customers' spending on the services we provide. Further, technological change in the telecommunications industry not directly related to the services we provide may affect the ability of one or more of our customers to compete effectively, which could result in a reduction or elimination of their use of our services. Any reduction, elimination or delay of spending by one of our customers on the services we provide could adversely affect our revenues, results of operations, and liquidity.

*Our business is dependent on keeping pace with technological developments impacting our services and those of our customers.* Our success is dependent on our and our customers' ability to acquire, develop, adopt and leverage new and existing technologies, including AI. New technologies can materially impact our business in a number of ways, including affecting the costs, speed and efficiency with which we can provide our services to our customers and our ability to differentiate ourselves from our competitor's offerings. Our customers may also experience decreased demand for their products or services if they fail to develop new products and technologies to meet consumer demand. Our failure to

effectively anticipate or adapt to new technologies and changes in our customer's expectations and behavior could materially impact our competitive position with our customers and, as a result, our future success and growth.

*Our business is labor-intensive, and we may be unable to attract, retain and ensure the productivity of qualified employees or to pass increased labor and training costs to our customers.* We are highly dependent upon our ability to employ, train, retain, and ensure the productivity of the skilled personnel needed to operate our business. Given the highly specialized work we perform, many of our employees receive training in, and possess, specialized technical skills that are necessary to operate our business and maintain productivity and profitability. We cannot be certain that we will be able to maintain and ensure the productivity of the skilled labor force necessary to operate our business. Our ability to do so depends on a number of factors, such as the general rate of employment, fluctuations in economic and industry conditions, changes in U.S. immigration policies, regulatory changes, competition for employees possessing the skills we need and the general health and welfare of our employees. Additionally, factors such as corporate culture, organizational changes, remote working opportunities and our compensation programs may impact our ability to effectively attract, retain and manage our workforce. In addition, the uncertainty of contract awards and project delays can also present difficulties in appropriately sizing our skilled labor force. Furthermore, due to the fixed price nature of the tasks in our contracts, we may be unable to pass increases in labor and training costs on to our customers. If we are unable to attract or retain qualified employees or incur additional labor and training costs, we may be unable to maintain or improve our competitive position and our results of operations could be adversely affected.

*We may be unable to secure or retain qualified subcontractors to fulfill our obligations, or our subcontractors may fail to satisfy their obligations to us, either of which may adversely affect our relationships with our customers or cause us to incur additional costs.* We contract with subcontractors to manage fluctuations in work volumes and reduce the amounts that we would otherwise expend on fixed assets and working capital. If we are unable to secure qualified subcontractors who can provide adequate labor resources at a reasonable cost, we may be delayed or unable to complete our work under a contract on a timely basis. In addition, subcontractors may not meet performance expectations, fail to meet regulatory or contractual requirements, or experience financial instability that could result in disputes or litigation and adversely impact, among other things, the quality and timeliness of the work they have performed. We may incur additional costs to correct such shortfalls in the work performed by subcontractors. Any of these factors could negatively impact the quality of our service, our ability to perform under certain customer contracts, and our relationships with our customers, which could adversely affect our results of operations.

*Changes in fuel prices may increase our costs, and we may not be able to pass along increased fuel costs to our customers.* Fuel prices fluctuate based on events outside of our control, including as the result of global economic conditions, market volatility, import and export restrictions, sanctions or trade regulations and the imposition of tariffs. Most of our services are provided under contracts that have discrete pricing for individual tasks and do not allow us to adjust our pricing for higher fuel costs during a contract term. In addition, we may be unable to secure prices that reflect rising costs when renewing or bidding contracts. To the extent we enter into hedge transactions in conjunction with our anticipated fuel purchases, declines in fuel prices below the levels established in the hedges we have in place may require us to make payments to our hedge counterparties. As a result, changes in fuel prices may adversely affect our results of operations.

*Increases in healthcare costs could adversely affect our financial results.* The costs of providing employee medical benefits have steadily increased over a number of years due to, among other things, rising healthcare costs and legislative requirements. Because of the complex nature of healthcare laws, as well as periodic healthcare reform legislation adopted by Congress, state legislatures, and municipalities, we cannot predict with certainty the future effect of these laws on our healthcare costs. Continued increases in healthcare costs or additional costs created by future health care reform laws adopted by Congress, state legislatures, or municipalities could adversely affect our results of operations and financial position.

*Fluctuations in our effective tax rate and tax liabilities may cause volatility in our financial results.* We determine and provide for income taxes based on the tax laws of each of the jurisdictions in which we operate. Changes in the mix and level of earnings among jurisdictions could materially impact our effective tax rate in any given financial statement period. Our effective tax rate may also be affected by changes in tax laws and regulations at the federal, state, and local level, or by new interpretations of existing tax laws and regulations. We are also subject to audits by various taxing authorities. An adverse outcome from an audit could unfavorably impact our effective tax rate and increase our tax liabilities.

*We may incur impairment charges on goodwill or other intangible assets.* We assess goodwill and other indefinite-lived intangible assets for impairment annually in order to determine whether their carrying value exceeds their fair value. Reporting units are tested more frequently if an event occurs or circumstances change between annual tests that indicate

their fair value may be below their carrying value. If we determine the fair value of the goodwill or other indefinite-lived intangible assets is less than their carrying value as a result of an annual or interim test, an impairment loss is recognized.

Our goodwill resides in multiple reporting units. The profitability of individual reporting units may suffer periodically due to downturns in customer demand, increased costs of providing our services, and the level of overall economic activity. Our customers may reduce capital expenditures and defer or cancel pending projects due to changes in technology, a slowing or uncertain economy, merger or acquisition activity, a decision to allocate resources to other areas of their business, or other reasons. The profitability of reporting units may also suffer if actual costs of providing our services exceed our estimated costs established when we enter into contracts. Additionally, adverse conditions in the economy and future volatility in the equity and credit markets could impact the valuation of our reporting units. The cyclical nature of our business, the high level of competition existing within our industry, and the concentration of our revenues from a small number of customers may also cause results to vary. The factors identified above may affect individual reporting units disproportionately, relative to the Company as a whole. As a result, the performance of one or more of the reporting units could decline, resulting in an impairment of goodwill or intangible assets. In addition, adverse changes to the key valuation assumptions contributing to the fair value of our reporting units could result in an impairment of goodwill or intangible assets. A write-down of goodwill or intangible assets as a result of an impairment could adversely affect our results of operations.

*The market price of our common stock has been, and may continue to be, highly volatile.* During fiscal 2026, our common stock fluctuated from a low of \$136.75 per share to a high of \$379.10 per share. We may continue to experience significant volatility in the market price of our common stock due to numerous factors, including, but not limited to:

- events impacting us, or our competitors, with respect to significant contracts, acquisitions or dispositions, fluctuations in operating results, or change to capital structure;
- announcements by our customers regarding their capital spending and start-up, deferral or cancellation of projects, or their mergers and acquisitions activities;
- the commercialization of new technologies impacting the services that we provide to our customers;
- regulatory and compliance obligations associated with government funding provided to our customers in connection with the work we perform, other regulatory actions, and changes in tax laws;
- changes in recommendations or earnings estimates by securities analysts; and
- the impact of economic conditions on the credit and stock markets and on our customers' demand for our services.

In addition, other factors, such as market disruptions, industry outlook, general economic conditions, widespread public health epidemics and political events, could decrease the market price of our common stock and, as a result, investors could lose some or all of their investments.

### **Risks Related to the Operation of Our Business**

*Our operations involve activities that are inherently dangerous. If our activities result in, or if it is alleged that our activities have resulted in, damage or destruction to the property of others, or in injury or death to others, we could be exposed to significant financial losses, reputational harm and civil and criminal liabilities.* Our operations involve dangerous activities such as underground drilling and the use of mechanized equipment. These activities and their effects could result in, or be alleged to have resulted in, damage to the real and personal property of others, and cause personal injury or death to third parties or our employees. In many instances, our activities are performed in close proximity to other utilities which, if damaged, may result in the occurrence of catastrophic events. Additionally, we may perform our activities in environmentally sensitive locations or in locations that may be susceptible to catastrophic events, including wildfires. If our activities cause or contribute to, or are alleged to have caused or contributed to, a catastrophic event, we could be exposed to severe financial losses and reputational harm. We procure insurance coverage to cover many of these risks; however, there can be no assurance that coverage will continue to be available to us on commercially reasonable terms, or at all, or that our coverage will be adequate in scope or amount to address financial losses from these risks. As a result, we could incur significant costs to defend any such allegations, defend and indemnify our customers, repair and replace assets, or to compensate third parties; reputational harm could result in the loss of future revenue-generating opportunities; or we may be subject to civil and, in certain situations, criminal liabilities.

*Changes in the cost or availability of materials may adversely affect our revenues and results of operations.* For a majority of the contract services we perform, customers provide the necessary materials. Under other contracts, we supply part, or all, of the necessary materials. If we, or our customers, are unable to procure the materials necessary to the contract services we perform, or if those materials are only available at prices that make our work unprofitable, our revenues and results of operations could be adversely affected.

*A failure, outage, or cybersecurity breach of our technology systems or those of third-party providers may adversely affect our operations and financial results.* We are dependent on technology to operate our business, to engage with our customers and other third parties, and to increase the efficiency and effectiveness of the services we offer our customers. We use both our own information technology systems and the information technology systems and expertise of third-party service providers to manage our operations, process data for our financial reporting, and perform other business processes. We also use information technology systems to record, transmit, store, and protect sensitive data, including the sensitive data of our employees and customers. A cybersecurity or ransomware attack, computer viruses, security breaches, or vandalism on these information technology systems, which we have experienced in the past, may result in our inability to access and utilize these systems, create or contribute to significant financial losses, and may negatively impact our reputation. The systems of our customers that we utilize to transmit and receive information could also fail or be subject to a cybersecurity attack. Any of these occurrences could disrupt our business or the delivery of services to our customers, result in potential liabilities, the termination of contracts, divert the attention of management from effectively operating our business, cause significant reputational damage, or otherwise have an adverse effect on our financial results. We may also need to expend significant additional resources to protect against cybersecurity threats or to address actual breaches or to redress problems caused by cybersecurity breaches.

*A failure in our information technology systems could negatively impact our business.* We rely on information technology systems to record and process transactions, manage our business, and maintain the financial accuracy of our records. Our information technology systems may be adversely impacted by various factors, including power outages, software and hardware failures, connectivity outages, catastrophic events, and human error. Interruptions to our information systems could disrupt our business, delay our financial reporting, and could result in the loss of revenue, and cause us to incur additional expense. We are in the process of implementing an Enterprise Resource Planning (ERP) system to upgrade and standardize our information technology systems. This implementation is expected to occur in phases over the next several years. Any delays or failures to achieve our implementation goals may adversely impact our financial results. In addition, the failure to complete the implementation on a timely basis, or to adequately address the necessary readiness and training needs of our personnel, could lead to business disruption, negatively affect our customer relationships, and restrict our ability to execute our business strategy, which could adversely affect our business.

*The loss or long-term incapacitation of one or more of our executive officers or other key employees could adversely affect our business.* We depend on the continued and ongoing services of our executive officers and other key employees, including the senior management of our subsidiaries. In many instances, these employees have significant experience and expertise in our industry. These key employees often possess and maintain key relationships with our customers and subcontractors that would be difficult to replace. Competition for senior management personnel is intense and we cannot be certain that any of our executive officers or other key management personnel will remain employed by us or that they will otherwise be able to provide service to us for any length of time. Additionally, we may not have adequate succession planning in place or the hiring, promotion or transition of an executive or key employee into a new role may not be successful and we may be unable to ensure that our key employees can be replaced if they are no longer employed by us. We do not carry “key-person” life or disability insurance on any of our employees. The loss or long-term incapacitation of any one of our executive officers or other key employees could negatively affect our customer relationships or the ability to execute our business strategy, which could adversely affect our business.

*The preparation of our financial statements requires management to make certain estimates and assumptions that may differ from actual results.* In preparing our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, a number of estimates and assumptions are made by management that affect the amounts reported in the financial statements. These estimates and assumptions must be made because certain information that is used in the preparation of our financial statements is either dependent on future events or cannot be calculated precisely from available data at the time that these estimates are made and, accordingly, requires the use of management’s judgment. Estimates and assumptions are primarily used in our assessment of the recognition of revenue under the cost-to-cost method of progress, job-specific costs, accrued insurance claims, the allowance for credit losses, accruals for contingencies, stock-based compensation expense for performance-based stock awards, the fair value of reporting units for the goodwill impairment analysis, the assessment of impairment of intangibles and other long-lived assets, the purchase price allocations of businesses acquired, and income taxes. When made, we believe such estimates and assumptions are fair when considered in conjunction with our consolidated financial position and results of operations

taken as a whole. However, actual results could differ from those estimates and assumptions, and such differences may be material to our financial statements.

### **Risks Related to Laws and Regulations**

*Our failure to comply with occupational health and workplace safety requirements could result in significant liabilities or enforcement actions and adversely impact our ability to perform services for our customers.* Our operations are subject to strict laws and regulations governing workplace safety. Our workers frequently operate heavy machinery, work on and in the vicinity of electrical and gas lines, perform their work at heights, and engage in other potentially dangerous activities which could subject them and others to injury or death. If, in the course of our operations, it is determined we have violated safety regulations, our operations may be disrupted and we may be subject to penalties, fines or, in extreme cases, criminal sanctions. In addition, if our safety performance were to deteriorate, customers could decide to cancel our contracts or not award us future business. These factors could adversely affect our results of operations and financial position.

*Our failure to comply with worker eligibility and immigration laws or changes to such laws could result in significant liabilities and harm our reputation with our customers, as well as cause disruption to our operations.* If we fail to comply with these laws, which continue to evolve and are subject to additional executive and legislative actions or legal enforcement, our operations may be disrupted, and we may be subject to fines or, in extreme cases, criminal sanctions. In addition, many of our customer contracts specifically require compliance with worker eligibility and immigration laws and in some cases our customers audit compliance with these laws. Further, several of our customers require that we ensure our subcontractors comply with these laws with respect to the workers that perform services for them. A failure to comply with these laws or to quickly adapt to regulatory changes could damage our reputation and may result in the cancellation of our contracts by our customers, or a decision by our customers not to award us future business. These factors could adversely affect our results of operations and financial position.

*Our failure to comply with various laws and regulations related to the construction and operation of utilities, contractor licensing and the operation of our fleet of commercial motor vehicles could result in significant liabilities.* We are subject to a number of state and federal laws and regulations, including those related to the construction and operation of utilities, contractor licensing and the operation of our fleet of commercial motor vehicles. If we are not in compliance with these laws and regulations, we may be unable to perform services for our customers and may also be subject to fines, penalties, and the suspension or revocation of our licenses. Our failure to comply with these laws and regulations may affect our ability to operate and could require us to incur significant costs that adversely affect our results of operations.

*Our failure to comply with environmental laws could result in significant liabilities.* A significant portion of the work we perform is associated with the underground networks of our customers and we often operate in close proximity to pipelines, sewer lines, or underground storage tanks that may contain hazardous substances. We could be subject to liabilities in the event that we fail to comply with environmental laws or regulations or if we cause or are responsible for the release of hazardous substances or other environmental damages. These liabilities could result in significant costs including remediation costs, fines, third-party claims for property damage, or personal injury, and, in extreme cases, criminal sanctions. These costs, as well as any direct impact to ongoing operations, could adversely affect our results of operations and cash flows. In addition, new laws and regulations, altered enforcement of existing laws and regulations, the discovery of previously unknown contamination or leaks, or the imposition of new remediation requirements could require us to incur significant costs or create new or increased liabilities that could adversely affect our results of operations and financial position.

*We retain the risk of loss for the occurrence of certain liabilities.* We retain the risk of loss, up to certain limits in our insurance program, for matters related to automobile liability, general liability (including damages associated with underground facility locating services), environmental liability, workers' compensation, and employee group health. We are effectively self-insured for the majority of claims because most claims against us fall below the deductibles or retention levels of our insurance policies. Additionally, within our aggregate coverage limits and above our base layer of third-party insurance coverage, we have retained the risk of loss at certain levels of exposure and any claims that reach these retained levels of exposure are self-insured. We estimate and develop our reserve accruals for these claims, including losses incurred but not reported, based on facts, circumstances, and historical evidence. However, the estimate for accrued insurance claims remains subject to uncertainty as our ultimate losses may depend on factors not known at the time such estimates are made. These factors include the estimated development of claims, the payment pattern of claims incurred, changes in the medical condition of claimants, and other factors such as inflation, tort reform or other legislative changes, unfavorable jury decisions, and court interpretations. Should the cost of actual claims exceed what we have anticipated, our recorded reserves may not be sufficient, and we could incur additional charges that could adversely affect our results of operations and financial position. See Item 7, *Management's Discussion and Analysis of Financial Condition and Results*

*of Operations – Critical Accounting Policies – Accrued Insurance Claims*, and Note 11, *Accrued Insurance Claims*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K.

*We may be subject to litigation, indemnity claims, and other disputes, which could result in significant liabilities and adversely impact our financial results.* From time to time, we are subject to lawsuits, arbitration proceedings, and other claims brought or threatened against us by various parties, including our customers. These actions and proceedings may involve claims for, among other things, compensation for personal injury, workers' compensation, wage and hour violations, employment discrimination, harassment, retaliation, and other employment-related damages, breach of contract, property damage, multiemployer pension plan withdrawal liabilities, liquidated damages, consequential damages, punitive damages, statutory damages, and civil penalties, other losses, or injunctive or declaratory relief. In addition, we may also be subject to class action lawsuits, including those alleging violations of the Fair Labor Standards Act, state and municipal wage and hour laws, and misclassification of independent contractors. We also indemnify our customers for claims arising out of or related to the services we provide and our actions or omissions under our contracts. In some instances, we may be allocated risk through our contract terms for the actions or omissions of our customers, subcontractors, or other third parties.

Due to the inherent uncertainties of litigation and other dispute resolution proceedings, we cannot accurately predict the ultimate outcome of these matters. The outcome of litigation, particularly class action lawsuits, is difficult to assess or quantify. Class action lawsuits may seek recovery of very large or indeterminate amounts. Accordingly, the magnitude of the potential loss may remain unknown for substantial periods of time. These proceedings could result in substantial costs and may require us to devote substantial resources to our defense. The ultimate resolution of any litigation or proceeding through settlement, mediation, or a judgment could have a material impact on our reputation and adversely affect our results of operations and financial position. See Item 3. *Legal Proceedings*, and Note 22, *Commitments and Contingencies*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K.

*We may be subject to warranty claims, which could result in significant liabilities and adversely impact our financial results.* We typically warrant the services we provide by guaranteeing the work performed against defects in workmanship and materials or where our services are not provided in a manner consistent with applicable requirements. When these claims occur, we may be required to repair or replace our work without receiving any additional compensation and we may be liable to our customers for significant monetary claims. Our performance of warranty services requires us to allocate resources that otherwise might be engaged in the provision of services that generate revenue. In addition, our customers often have the right to repair or replace warranted items using the services of another provider and to charge the cost of the repair or replacement to us. Costs incurred for warranty claims, or reductions to revenue-generating activities arising from the allocation of resources to resolve warranty claims, could adversely affect our results of operations and financial position.

*Our subsidiaries may participate in multiemployer pension plans from time to time under which we could incur significant liabilities.* Pursuant to collective bargaining agreements, certain of our subsidiaries, including Power Solutions, participate in various multiemployer pension plans from time to time that provide defined pension benefits to covered employees. Where applicable, we make periodic contributions to these plans to allow them to meet their pension benefit obligations to participants. Assets contributed by an employer to a multiemployer plan are not segregated into a separate account and are not restricted to providing benefits only to employees of that contributing employer. Under the Employee Retirement Income Security Act ("ERISA"), absent an applicable exemption, a contributing employer to an underfunded multiemployer plan is liable upon withdrawal from the plan for its proportionate share of the plan's unfunded vested liability. Such underfunding may increase in the event other employers become insolvent or withdraw from the applicable plan or upon the inability or failure of withdrawing employers to pay their withdrawal liability. In addition, if any of the plans in which we participate become significantly underfunded, as defined by the Pension Protection Act of 2006, we may be required to make additional cash contributions in the form of higher contribution rates or surcharges. This has occurred and could occur again in the future because of a shrinking contribution base as a result of insolvency or withdrawal of other companies that currently contribute to these plans, inability or failure of withdrawing companies to pay their withdrawal liability, lower than expected returns on plan assets, or other funding deficiencies. We are also in the process of integrating Power Solutions into our business and could discover liabilities, deficiencies, or other claims associated with its multiemployer plans. Requirements to pay increased contributions or a withdrawal liability could adversely affect our results of operations, financial position, and cash flows.

*Anti-takeover provisions of Florida law and provisions in our articles of incorporation and by-laws could make it more difficult to effect an acquisition of our Company or a change in our control.* We are subject to certain anti-takeover provisions of the Florida Business Corporation Act. These anti-takeover provisions could discourage or prevent a change in control. In addition, certain provisions of our articles of incorporation and by-laws could delay or prevent an acquisition or

change in control and the replacement of our incumbent directors and management. For example, our board of directors is divided into three classes. At any annual meeting of our shareholders, our shareholders have the right to elect only approximately one-third of the directors on our board of directors. In addition, our articles of incorporation authorize our board of directors, without further shareholder approval, to issue up to 1,000,000 shares of preferred stock on such terms and with such rights as our board of directors may determine. The issuance of preferred stock could dilute the voting power of the holders of common stock, including by the grant of voting control to others. Our by-laws also restrict the right of shareholders to call a special meeting of shareholders. As a result, our shareholders may be unable to take advantage of opportunities to dispose of their stock in the Company at higher prices that may otherwise be available in connection with takeover attempts or under a merger or other proposal.

*We may face challenges related to our corporate social responsibility and sustainability policies.* Our customers, shareholders, and other constituents may not be satisfied with the corporate social responsibility and sustainability policies that we may set or the practices and programs we choose to implement. A failure to set appropriate corporate social responsibility and sustainability goals for our company, or our failure to meet these goals could adversely affect public perception of our business or customer or shareholder support.

### **Risks Related to Our Ability to Grow Our Business**

*We may not have access in the future to sufficient capital on favorable terms or at all. We may require additional capital to pursue acquisitions, fund capital expenditures, for working capital needs, or to respond to changing business conditions.* Our existing debt agreements include restrictions on our ability to incur additional debt at certain levels. In addition, if we seek to incur more debt, we may be required to agree to additional covenants that further limit our operational and financial flexibility. If we pursue additional debt or equity financings, we cannot be certain that such funding will be available on terms acceptable to us, or at all. Our inability to access additional capital could adversely affect our liquidity and may limit our growth and ability to execute our business strategy.

*Our debt obligations impose restrictions that may limit our operating and financial flexibility, and a failure to comply with these obligations could result in the acceleration of our debt.* The Company and certain of its subsidiaries are party to a credit agreement (as defined below). The credit agreement, among other things, includes a revolving facility with a maximum revolver commitment of \$800.0 million and a term loan A facility in the principal amount of \$1,540.0 million, which mature on December 23, 2030, as well as an \$800.0 million term loan B facility, which matures on January 27, 2033. The credit agreement includes a \$225.0 million sublimit for the issuance of letters of credit and a \$50.0 million sublimit for swingline loans. As of January 31, 2026, we had \$1,540.0 million outstanding under the term loan A facility, \$800.0 million outstanding under the term loan B facility and \$53.6 million of outstanding letters of credit issued under our Credit Agreement. We had no outstanding borrowings under our revolving facility as of January 31, 2026. The credit agreement contains covenants that restrict or limit our ability to, among other things: make certain payments, including the payment of dividends, redeem or repurchase our capital stock, incur additional indebtedness and issue preferred stock, make investments or create liens, enter into sale and leaseback transactions, merge or consolidate with another entity, sell certain assets, and enter into transactions with affiliates. The credit agreement also requires us to comply with certain financial covenants, including a consolidated net leverage ratio and a consolidated interest coverage ratio. These covenants in our credit agreement may prevent us from engaging in transactions that benefit us and may limit our flexibility in the execution of our business strategy.

Additionally, on April 1, 2021, we issued \$500.0 million aggregate principal amount of 4.50% senior notes due 2029 (the “2029 Notes”). The 2029 Notes are guaranteed on a senior unsecured basis, jointly and severally, by all of our domestic subsidiaries that guarantee the Credit Agreement. The indenture governing the 2029 Notes includes cross-acceleration and cross-default provisions with our Credit Agreement. If our financial results fall below anticipated levels, we may be unable to comply with these covenants and a default under our Credit Agreement could result in the acceleration of our obligations under both our Credit Agreement and the indenture governing the 2029 Notes, which could adversely affect our liquidity and our ability to execute our business strategy.

*The specialty contracting services industry in which we operate is highly competitive.* We compete with other specialty contractors, including numerous local and regional providers, as well as several large corporations that may have financial, technical, and marketing resources exceeding ours. Relatively few barriers to entry exist in the markets in which we operate, which means that any organization could become a competitor if it has adequate financial resources and access to technical expertise, the ability to engage subcontractors, and the necessary equipment and materials. Additionally, our competitors may develop expertise obtain resources or adopt new technologies that allow them to provide services that are equal or superior to our services in price, quality, or availability, and we may be unable to effectively compete against them. Furthermore, if competitors underbid us to procure business, we could be required to lower the prices we charge in order to retain contracts when they come up for competitive bidding at the end of their terms. Our revenues and results of operations could be adversely affected if our customers shift a significant portion of our work to a competitor, if we are unsuccessful in bidding or retaining projects, or if our ability to win projects requires us to provide our services at reduced margins.

*We face competition from the in-house service organizations of our customers.* We face competition from the in-house service organizations of our customers whose personnel perform many of the services that we provide. We can offer no assurance that our existing or prospective customers will continue to outsource the specialty contracting services we provide in the future. Our revenues and results of operations could be adversely affected if our existing or prospective customers reduce the specialty contracting services that are outsourced to us.

### **Risks Related to Strategic Transactions**

*We may not realize the growth opportunities and synergies that we anticipate from the Power Solutions Acquisition or other strategic acquisitions.* As part of our strategy, we will continue to seek, and may, in the future acquire, businesses or business operations, or enter into other business transactions to add value and complement and expand our existing products and service offerings. For example, on December 23, 2025, we completed our acquisition of Power Solutions, LLC, a specialty electrical contracting business (the “Power Solutions Acquisition”). Our ability to realize any of the anticipated benefits from the Power Solutions Acquisition or any other acquisition depends on us successfully integrating the acquired businesses. If we cannot successfully integrate or are delayed in integrating Power Solutions or other newly acquired businesses or fail to execute our business plan, it would negatively impact our ability to grow our business, which would adversely affect our financial condition, results of operations or cash flows. Any loss of significant Power Solutions customers or the departure of key personnel could negatively impact the success of the acquisition or hinder our ability to achieve the expected benefits of the acquisition. Even if Power Solutions is successfully integrated, the benefits of such acquisition may not be realized within the anticipated time frame or at all.

We may pay substantial amounts of cash or incur debt to pay for acquisitions or other strategic transactions that could adversely affect our liquidity. The incurrence of indebtedness also results in increased fixed obligations and increased interest expense, and could also include covenants or other restrictions that would impede our ability to manage our operations. From time to time, we may also issue equity securities to pay for acquisitions or other strategic transactions and we may grant restricted stock units to retain the employees of acquired companies, which could increase our expenses, adversely affect our financial results and stock price, and result in dilution to our stockholders.

In addition, we may fail to accurately forecast the financial impact of an acquisition or other strategic transaction, including tax and accounting charges. Acquisitions or other strategic transactions may also result in our recording of significant additional expenses to our results of operations and recording of substantial finite-lived intangible assets on our balance sheet upon closing. Any strategic acquisitions or investments that we are able to identify and complete may also involve a number of other risks, including the diversion of our management’s attention from our existing business to integrate operations and personnel; possible adverse effects on our results of operations during the integration process; and our possible inability to achieve the intended objectives of the transaction, including the inability to achieve cost savings and synergies. Any of these risks could cause our strategic transactions, including the Power Solutions Acquisition, not to be as profitable or accretive as expected or planned.

*Our failure to identify future acquisition targets or successfully complete transactions may adversely impact our business and our failure to perform sufficient due diligence prior to completing acquisitions could result in significant liabilities.* We may not be able to identify suitable candidates for additional business combinations and strategic investments, obtain financing on acceptable terms for such transactions, obtain necessary regulatory approvals, if any, or otherwise consummate such transactions on acceptable terms, or at all. In addition, we compete for acquisitions with other potential acquirers, some of which may have greater financial or operational resources than we do. The failure to consummate any such acquisitions or strategic transactions may reduce our growth and expansion.

We may also discover liabilities, deficiencies, or other claims associated with the companies or assets we acquire that were not identified in advance, which may result in significant unanticipated costs. The effectiveness of our due diligence review and our ability to evaluate the results of such due diligence are dependent upon the accuracy and completeness of statements and disclosures made or actions taken by the companies we acquire or their representatives, as well as the limited amount of time in which acquisitions are executed. A failure to identify or appropriately quantify a liability or possible risk in our due diligence process could result in becoming subject to contingent or other liabilities, including liabilities arising from events or conduct predating the acquisition that were not known to us at the time of the acquisition, some of which may not be adequately reserved and may not be covered by indemnification obligations.

## **Item 1C. *Cybersecurity.***

### **Cybersecurity Risk Management and Strategy**

We are committed to protecting the confidentiality, integrity, and availability of our information assets and managing cybersecurity risks effectively. Our cybersecurity strategy focuses on proactive risk management, continuous improvement, collaboration and partnerships, and investment in security technologies.

We face various cybersecurity risks, including unauthorized access, information leakage, malware and viruses, technical disruption, and insider threats. Identifying, assessing, and managing these risks is the foundation of our comprehensive cybersecurity framework and is integrated into our overall risk management systems and processes. We have implemented strong access controls, regular security assessments, vulnerability management, user education and awareness, monitoring, threat intelligence (including user behavior analytics), and managed detection and response to mitigate cybersecurity risks.

Our implementation of strong access controls includes multi-factor authentication, least privilege access, role-based access control, and network segmentation to ensure information assets are protected from unauthorized access and/or exposure.

We conduct regular security assessments to identify vulnerabilities, test compliance, proactively address security risks that would impact the organization, and prioritize those risks based on their likelihood and potential impact. The associated activities include performing risk, vulnerability, penetration, and compliance assessments to assist in identifying potential internal and external threats and weaknesses in our systems, networks, and applications and performing simulations to test and improve our incident response plans while building resiliency.

In addition to the controls and assessments noted above, we regularly engage with our internal and external auditors and third-party cybersecurity consultants to assess our cybersecurity program, ensuring adherence to applicable industry standards, practices, and laws.

Our cybersecurity program also includes third-party risk management evaluation and monitoring of our suppliers, vendors, and other business partners to help identify and mitigate risks that may impact our company. We evaluate existing risks, threats, and prior cybersecurity incidents of new vendors, suppliers, and business partners using various risk assessments.

We have not experienced any risks from cybersecurity threats, including as a result of any previous cybersecurity incidents, that have materially affected or are reasonably likely to materially affect us or our business strategy, results of operations, or financial condition. For more information, see Item 1A. Risk Factors under the heading “A failure, outage, or cybersecurity breach of our technology systems or those of third-party providers may adversely affect our operations and financial results.”

### **Cybersecurity Governance**

Cybersecurity governance is a critical component of our organization’s overall risk management framework and an area of focus for our Board and management. Our Board has delegated primary responsibility for overseeing risks from cybersecurity threats to the Audit Committee. The Audit Committee oversees information technology and cybersecurity, including strategies, risk identification and mitigation, and data privacy protection (“Information Security”).

The Company’s Chief Information Officer has been serving in this role for the company for 19 years and has over 30 years of experience in various information security and related technology roles. The Chief Information Officer oversees an internal information security team, which works in partnership with the Company’s internal audit department and external third-party experts to review information technology-related controls as part of the overall internal controls process. The Chief Information Officer, who is in regular communication with the information security team, reports regularly to the Chief Executive Officer regarding vulnerabilities, new and developing threats, and compliance matters and also reports to the Audit Committee. The Audit Committee receives reports from the Chief Information Officer on a periodic basis, and more frequently, as needed, regarding cybersecurity-related matters. Such reports include updates with respect to existing and new cybersecurity risks, cybersecurity risk management and mitigation, cybersecurity incidents, as applicable, and key information security initiatives and recent developments.

## Item 2. *Properties.*

We lease our executive office located in West Palm Beach, Florida. Our subsidiaries operate from administrative offices, district field offices, equipment yards, shop facilities, warehouses and temporary storage locations throughout the United States. Those facilities are primarily leased but certain facilities are owned. Our leased properties operate under both non-cancelable and cancelable leases. We believe that our facilities are suitable and adequate for our current operations and, if necessary, additional or replacement facilities would generally be available on commercially reasonable terms.

## Item 3. *Legal Proceedings.*

Refer to Note 22, *Commitments and Contingencies*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K.

## Item 4. *Mine Safety Disclosures.*

Not applicable.

## PART II

## Item 5. *Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.*

### Market Information for Our Common Stock

Our common stock is traded on the New York Stock Exchange (“NYSE”) under the symbol “DY.”

### Holders

As of March 3, 2026, there were approximately 481 holders of record of our \$0.33 1/3 par value per share common stock.

### Dividend Policy

We have not paid cash dividends since 1982. Our Board of Directors occasionally evaluates the payment of a dividend based on our financial condition, profitability, cash flow, capital requirements, and the outlook of our business. We currently intend to retain any earnings for use in the business and other capital allocation strategies which may include investment in acquisitions and share repurchases. Consequently, we do not anticipate paying any cash dividends on our common stock in the foreseeable future.

### Securities Authorized for Issuance Under Equity Compensation Plans

The information required by this item is hereby incorporated by reference from the section entitled “Equity Compensation Plan Information” found in our definitive proxy statement to be filed with the Securities and Exchange Commission pursuant to Regulation 14A.

### Issuer Purchases of Equity Securities

The following table summarizes the Company’s purchases of its common stock during the three months ended January 31, 2026:

Period	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid Per Share <sup>(2)</sup>	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
October 26, 2025 - November 22, 2025	—	\$ —	—	(3)
November 23, 2025 - December 20, 2025	—	\$ —	—	(3)
December 21, 2025 - January 31, 2026	—	\$ —	—	(3)

<sup>(1)</sup> All shares repurchased have been subsequently cancelled.

<sup>(2)</sup> Average price paid per share excludes 1% excise tax on share repurchases.

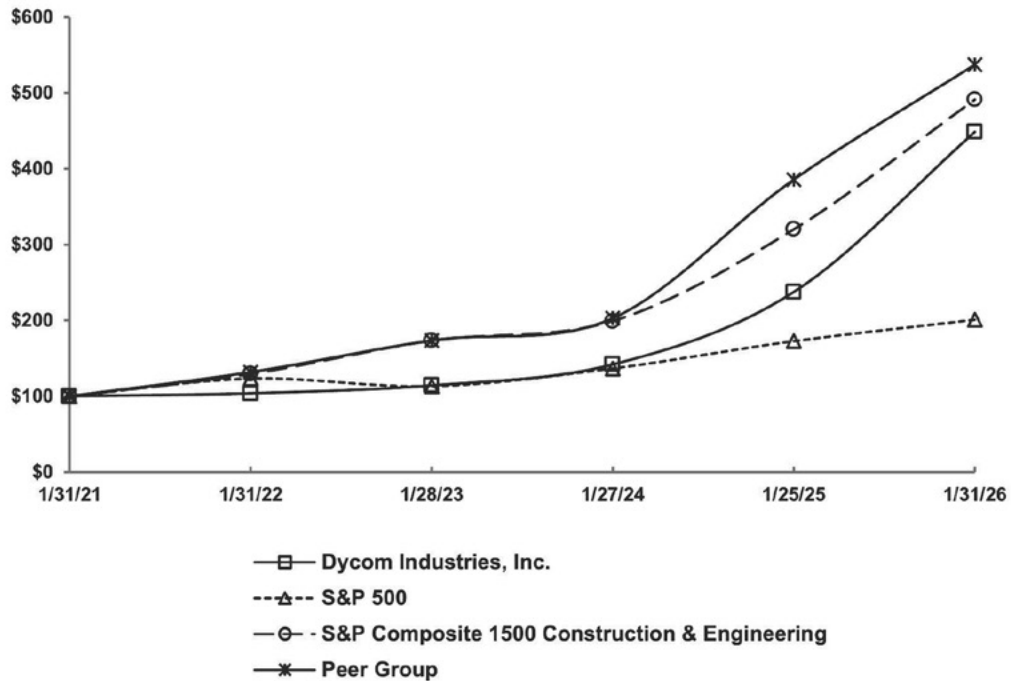

<sup>(3)</sup> On February 26, 2025 the Company announced that its Board of Directors had authorized a new \$150.0 million program to repurchase shares of the Company’s outstanding common stock through August 25, 2026 in open market or private transactions. During fiscal 2026 we repurchased 200,000 shares of common stock, at an average price of \$150.93, for \$30.2 million. As of January 31, 2026, \$119.8 million of the authorization remained available for repurchases.

**Performance Graph**

The performance graph below compares the cumulative total return for our common stock with the cumulative total return (including reinvestment of dividends) of the Standard & Poor’s (S&P) 500 Composite Stock Index and that of a selected peer group for fiscal 2022 through fiscal 2026. The selected peer group consists of MasTec, Inc., Quanta Services, Inc., MYR Group, Inc., and Primoris Services Corporation. The graph assumes an investment of \$100 in our common stock and in each of the respective indices noted on January 31, 2021. The comparisons in the graph are required by the Securities and Exchange Commission and are not intended to forecast or be indicative of the possible future performance of our common stock.

**COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN\***

Among Dycom Industries, Inc., the S&P 500 Index, the S&P Composite 1500 Construction & Engineering Index, and a Peer Group

\*\$100 invested on 1/31/21 in stock or index, including reinvestment of dividends. Indexes calculated on month-end basis.

**Item 6. Reserved**

**Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.**

The following discussion and analysis should be read in conjunction with our consolidated financial statements and the accompanying notes, as well as Part I, Item 1. *Business*, and Part I, Item 1A. *Risk Factors*, of this Annual Report on Form 10-K.

## Introduction

We are a leading provider of specialty contracting services focused on the digital infrastructure, telecommunications and utilities industries throughout the United States. These services include program management, planning, engineering and design; aerial, underground, and wireless construction; maintenance; and fulfillment services for telecommunications and digital infrastructure providers. We also provide underground facility locating services for various utilities, including telecommunications providers, as well as other construction and maintenance services for electric and gas utilities. Additionally, we provide comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities. We supply the labor, tools, and equipment necessary to provide these services to our customers.

Demand for high-speed and low-latency connectivity is expanding, driven by data-intensive applications and mobile usage, necessitating extensive wireline network upgrades and extensions, new and expanding fiber and electrical infrastructure for data centers to meet the current and future needs of cloud compute, AI and advanced wireless network deployments. This widespread need for expanded and enhanced connectivity fuels significant opportunities within the digital infrastructure industry. Our relationships, national footprint, and ability to manage increasingly complex services differentiate us and we are confident in our ability to capitalize on industry opportunities.

Our strategy centers on our core maintenance and operations services which provide a strong foundation to capitalize on other drivers of demand for digital infrastructure. These include multi-year fiber-to-the-home deployments throughout the United States, increasing fiber and electrical infrastructure builds to support hyperscaler data center growth, continued state and federal program spending to bridge the digital divide and wireless network modernization programs to meet increasing digital demands.

The cyclical nature of the industries we serve affects demand for our services, and our contract revenues and results of operations exhibit seasonality as a significant portion of our Communications segment work is performed outdoors. The capital expenditure and maintenance budgets of our customers, and the related timing of approvals and seasonal spending patterns, influence our contract revenues and results of operations. Factors affecting our customers and their capital expenditure budgets include, but are not limited to, overall economic conditions, the introduction of new technologies, our customers' debt levels and capital structures, our customers' financial performance, and our customers' positioning and strategic plans. Other factors that may affect our customers and their capital expenditure budgets include the availability of state and federal funding, the implementation or enforcement of regulations or regulatory actions impacting our customers' businesses, merger or acquisition activity involving our customers, and the physical maintenance needs of our customers' infrastructure.

### *Customer Relationships and Contractual Arrangements*

We have established relationships with many leading telecommunications providers, including telephone companies, cable multiple system operators, wireless carriers, telecommunications equipment and infrastructure providers, as well as electric and gas utilities and many leading general contractors specializing in data center construction. Our customer base is highly concentrated. The following reflects the percentage of total contract revenues from customers who contributed at least 10% to our total contract revenues during fiscal 2026, fiscal 2025, or fiscal 2024:

	Fiscal Year Ended		
	January 31, 2026	January 25, 2025	January 27, 2024
AT&T, Inc. <sup>(1)</sup>	25.4%	20.1%	16.9%
Verizon Communications, Inc. <sup>(2)</sup>	14.0%	12.2%	14.0%
Lumen Technologies, Inc. <sup>(1)</sup>	10.8%	12.1%	15.6%
Comcast Corporation	7.4%	8.5%	10.7%

<sup>(1)</sup> On February 2, 2026, AT&T Inc. completed its acquisition of substantially all of the mass markets fiber business from Lumen Technologies Inc. Since this transaction occurred subsequent to fiscal 2026, we have continued to report revenues for the mass markets fiber business under Lumen Technologies Inc.

<sup>(2)</sup> Includes revenue attributable to Frontier Communications Corporation retrospectively for all periods presented as a result of its acquisition by Verizon Communications, Inc. on January 20, 2026.

We perform a majority of our services under master service agreements and other contracts that contain customer-specified service requirements. These agreements include discrete pricing for individual tasks. We generally possess multiple agreements with each of our significant customers. To the extent that such agreements specify exclusivity, there are often exceptions, including the ability of the customer to issue work orders valued above a specified dollar amount to other service providers, the performance of work with the customer’s own employees, and the use of other service providers when jointly placing facilities with another utility. In many cases, a customer may terminate an agreement for convenience. Historically, multi-year master service agreements have been awarded primarily through a competitive bidding process; however, occasionally we are able to negotiate extensions to these agreements. We provide the remainder of our services pursuant to contracts for specific projects. These contracts may be long-term (with terms greater than one year) or short-term (with terms less than one year) and at times include retainage provisions under which the customer may withhold 5% to 10% of the invoiced amounts pending project completion and closeout.

The following table summarizes our contract revenues from multi-year master service agreements and other long-term contracts, as a percentage of contract revenues:

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Multi-year master service agreements	86.6 %	79.3 %	77.7 %
Other long-term contracts	5.6 %	10.0 %	11.9 %
<b>Total long-term contracts</b>	<b>92.2 %</b>	<b>89.3 %</b>	<b>89.6 %</b>

### ***Acquisitions***

As part of our growth strategy, we may acquire companies that expand, complement, or diversify our business. We regularly review opportunities and periodically engage in discussions regarding possible acquisitions. Our ability to sustain our growth and maintain our competitive position may be affected by our ability to identify, acquire, and successfully integrate companies.

*Fiscal 2026.* During the fourth quarter of fiscal 2026, we acquired Power Solutions, LLC (“Power Solutions”), a company that provides comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities in the Greater Washington D.C., Maryland, and Virginia area. This acquisition expands our service offerings and our customer base. The purchase price was valued at \$1.95 billion as of the signing of the acquisition on a cash-free, debt-free basis. The value is subject to post-closing adjustment, including the final determination of cash, indebtedness and working capital balances. At the closing date, the funding of the acquisition included a cash payment of \$1,644.9 million (\$1,628.6 million net of cash acquired of \$16.3 million), the issuance of 1,011,069 shares of Dycom common stock to the sellers valued at \$351.0 million, and the assumption of seller indebtedness of \$64.8 million. Total consideration was \$1,995.9 million. The acquisition of Power Solutions resulted in the addition of a new operating segment which is also a new reportable segment – Building Systems. For a discussion of our business and reportable segments, see Item 1. “Business.”

*Fiscal 2025.* During the third quarter of fiscal 2025, we acquired certain assets and assumed certain liabilities of a telecommunications construction contractor for a cash purchase price of \$150.7 million. The acquired business provides wireless construction services for telecommunications providers in various states. This acquisition expands our geographic presence within our existing customer base.

During the second quarter of fiscal 2025, we acquired a telecommunications construction contractor for a total purchase price of \$24.5 million (\$20.4 million purchase price plus cash acquired of \$4.1 million). The acquired company is located in the northwestern United States and provides construction and maintenance services to telecommunications providers, with the majority of its revenues generated in Alaska. This acquisition expands our geographic presence and our customer base.

During the first quarter of fiscal 2025, we acquired a telecommunications construction contractor for \$16.0 million (\$12.8 million purchase price, plus cash acquired of \$3.2 million). The acquired company provides construction and maintenance services for telecommunications providers in the midwestern United States. This acquisition expands our geographic presence within our existing customer base.

*Fiscal 2024.* During August 2023, we acquired Bigham Cable Construction, Inc. (“Bigham”), for \$131.2 million (\$127.0 million fixed purchase price, plus cash acquired of \$8.3 million, less indebtedness of \$4.1 million). Bigham provides construction and maintenance services for telecommunications providers in the southeastern United States. This acquisition expands our geographic presence within our existing customer base

Results of the businesses acquired are included in our consolidated financial statements from their respective dates of acquisition. The purchase price allocation of the company acquired in fiscal 2026 is preliminary and will be completed when valuations for intangible assets and other amounts are finalized within the 12-month measurement period from the date of acquisition.

### ***Understanding Our Results of Operations***

The following information is presented so that the reader may better understand certain factors impacting our results of operations, and should be read in conjunction with *Critical Accounting Policies and Estimates* below, as well as Note 2, *Significant Accounting Policies & Estimates*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K. Fiscal 2026 had 53 weeks of operations while fiscal 2025 had 52 weeks.

*Contract Revenues.* We perform a significant amount of our services under master service agreements and other contracts that contain customer-specified service requirements. These agreements include discrete pricing for individual tasks including, for example, the placement of underground or aerial fiber, directional boring, and fiber splicing, each based on a specific unit of measure. Contract revenue is recognized over time as services are performed and customers simultaneously receive and consume the benefits we provide. Output measures, such as units delivered, are utilized to assess progress against specific contractual performance obligations for the majority of our services. For certain contracts, we use the cost-to-cost measure of progress as more fully described within *Critical Accounting Policies and Estimates* below.

*Costs of Earned Revenues.* Costs of earned revenues includes all direct costs of providing services under our contracts, including costs for direct labor provided by employees, services by subcontractors, operation of capital equipment (excluding depreciation), direct materials, costs of insuring our risks, and other direct costs. Under our insurance program, we retain the risk of loss, up to certain limits, for matters related to automobile liability, general liability (including damages associated with underground facility locating services), workers’ compensation, and employee group health.

*General and Administrative Expenses.* General and administrative expenses primarily consist of employee compensation and related expenses, including performance-based compensation and stock-based compensation, legal, consulting and professional fees, information technology and development costs, amortization of implementation costs associated with cloud computing arrangements, provision for or recoveries of bad debt expense, acquisition and integration costs of businesses acquired, and other costs not directly related to the provision of our services under customer contracts. Our provision for bad debt expense is determined by evaluating specific accounts receivable and contract asset balances based on historical collection trends, the age of outstanding receivables, and the creditworthiness of our customers. We incur information technology and development costs primarily to support and enhance our operating efficiency. Our executive management team and the senior management of our subsidiaries perform substantially all of our sales and marketing functions as part of their management responsibilities.

*Depreciation and Amortization.* Our property and equipment primarily consist of vehicles, equipment and machinery, and computer hardware and software. We depreciate property and equipment on a straight-line basis over the estimated useful lives of the assets. In addition, we have intangible assets, including customer relationships, trade names, and non-compete intangibles, which we amortize over their estimated useful lives. We recognize amortization of customer relationship intangibles on an accelerated basis as a function of the expected economic benefit and amortization of other finite-lived intangibles on a straight-line basis over their estimated useful lives.

*Interest Expense, Net.* Interest expense, net, consists of interest incurred on outstanding variable rate and fixed rate debt and certain other obligations and the amortization of debt issuance costs. See Note 14, *Debt*, in the notes to the consolidated financial statements in this Annual Report on Form 10-K for information on debt issuance costs.

*Loss on Debt Extinguishment.* Loss on debt extinguishment for fiscal 2026 of \$7.3 million and fiscal 2025 of \$1.0 million includes the write-off of deferred debt issuance costs in connection with the Credit Agreement amendments. See “*Liquidity and Capital Resources - Compliance with Credit Agreement*” for more information.

*Other Income, Net.* Other income, net, primarily consists of gains or losses from sales of fixed assets. Other income, net also includes discount fee expense associated with the collection of accounts receivable under a customer-sponsored vendor payment program.

*Seasonality and Fluctuations in Operating Results.* Our contract revenues and results of operations exhibit seasonality and are impacted by adverse weather changes as we perform a significant portion of our Communications segment work outside. Consequently, adverse weather, which is more likely to occur with greater frequency, severity, and duration during the winter, as well as reduced daylight hours, impact our operations during the fiscal quarters ending in January and April. Additionally, extreme weather conditions such as major or extended winter storms, droughts and tornados, wildfires, and natural disasters, such as floods, hurricanes, tropical storms, whether as a result of climate change or otherwise, could also impact the demand for our services, or impact our ability to perform our services. Also, several holidays fall within the fiscal quarter ending in January, which decreases the number of available workdays in this fiscal quarter. Because of these factors, we are most likely to experience reduced revenue and profitability or losses during the fiscal quarters ending in January and April compared to the fiscal quarters ending in July and October.

We may also experience variations in our profitability driven by a number of factors. These factors include variations and fluctuations in contract revenues, job specific costs, insurance claims, the allowance for credit losses, accruals for contingencies, stock-based compensation expense for performance-based stock awards, the fair value of reporting units for the goodwill impairment analysis, the valuation of intangibles and other long-lived assets, gains or losses on the sale of fixed assets from the timing and levels of capital assets sold, the employer portion of payroll taxes as a result of reaching statutory limits, and our effective tax rate.

Accordingly, operating results for any fiscal period are not necessarily indicative of results we may achieve for any subsequent fiscal period.

### **Critical Accounting Policies and Estimates**

The discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements. These statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). In conformity with GAAP, the preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these consolidated financial statements and accompanying notes. These estimates and assumptions require the use of judgment as to the likelihood of various future outcomes and, as a result, actual results could differ materially from these estimates.

Below, we have identified those accounting policies that are critical to the accounting of our business operations and the understanding of our results of operations. These accounting policies require making significant judgments and estimates that are used in the preparation of our consolidated financial statements. The impact of these policies affects our reported and expected financial results. We have discussed the development, selection and application of our critical accounting policies with the Audit Committee of our Board of Directors, and the Audit Committee has reviewed the disclosure relating to our critical accounting policies herein.

Other significant accounting policies, primarily those with lower levels of uncertainty than those discussed below, are also important to understanding our consolidated financial statements. The notes to the consolidated financial statements in this Annual Report on Form 10-K contain additional information related to our accounting policies and should be read in conjunction with this discussion.

*Revenue Recognition.* We perform a significant amount of our services under master service agreements and other contracts that contain customer-specified service requirements. These agreements include discrete pricing for individual tasks including, for example, the placement of underground or aerial fiber, directional boring, and fiber splicing, each based on a specific unit of measure. A contractual agreement exists when each party involved approves and commits to the agreement, the rights of the parties and payment terms are identified, the agreement has commercial substance, and collectability of consideration is probable. Our services are performed for the sole benefit of our customers, whereby the assets being created or maintained are controlled by the customer and the services we perform do not have alternative benefits for us. Contract revenue is recognized over time as services are performed and customers simultaneously receive and consume the benefits we provide. Output measures, such as units delivered, are utilized to assess progress against specific contractual performance obligations for the majority of our services. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the services to be provided. For us, the output method using units delivered best represents the measure of progress against the performance obligations incorporated within the contractual agreements. This method captures the amount of units delivered pursuant to contracts and is used only when our performance does not produce significant amounts of

work in process prior to complete satisfaction of the performance obligation. For a portion of contract items, units to be completed consist of multiple tasks. For these items, the transaction price is allocated to each task based on relative standalone measurements, such as selling prices for similar tasks, or in the alternative, the cost to perform the tasks. Contract revenue is recognized as the tasks are completed as a measurement of progress in the satisfaction of the corresponding performance obligation.

For certain contracts, representing less than 5% of contract revenues during fiscal 2026, fiscal 2025, and fiscal 2024, we use the cost-to-cost measure of progress. These contracts are generally projects that are completed over a period 12 months or less and for which payment may be received based on project milestones or in a lump sum at the end of the project. Under the cost-to-cost measure of progress, the extent of progress toward completion is measured based on the ratio of costs incurred to date to the total estimated costs. Contract costs include direct labor, direct materials, and subcontractor costs, as well as an allocation of indirect costs. Contract revenues are recorded as costs are incurred.

We accrue the entire amount of a contract loss, if any, at the time the loss is determined to be probable and can be reasonably estimated. There were no material amounts of unapproved change orders or claims recognized during fiscal 2026, fiscal 2025, and fiscal 2024.

*Accounts Receivable, net.* We grant credit to our customers, generally without collateral, under normal payment terms (typically 30 to 90 days after invoicing). Generally, invoicing occurs within 45 days after the related services are performed. Accounts receivable represents an unconditional right to consideration arising from our performance under contracts with customers. Accounts receivable include billed accounts receivable, unbilled accounts receivable, and retainage. The carrying value of such receivables, net of the allowance for credit losses, represents their estimated realizable value. Unbilled accounts receivable represent amounts we have an unconditional right to receive payment for that will be billed at a later date due to administrative requirements in the billing processes specified by our customers. Certain of our contracts contain retainage provisions whereby a portion of the revenue earned is withheld from payment as a form of security until contractual provisions are satisfied. The collectability of retainage is included in our overall assessment of the collectability of accounts receivable. We expect to collect the outstanding balance of current accounts receivable, net (including trade accounts receivable, unbilled accounts receivable, and retainage) within the next 12 months. We estimate our allowance for credit losses by evaluating specific accounts receivable balances based on historical collection trends, the age of outstanding receivables, and the credit worthiness of our customers.

We participate in a customer-sponsored vendor payment program for one of our customers. All eligible accounts receivable from this customer are included in the program and payment is received pursuant to a non-recourse sale to a bank partner of the customer. This program effectively reduces the time to collect these receivables as compared to that customer's standard payment terms. We incur a discount fee to the bank on the payments received that is reflected as an expense component in other income, net, in the consolidated statements of operations.

*Contract assets.* Contract assets include unbilled amounts typically resulting from arrangements whereby complete satisfaction of a performance obligation and the right to payment are conditioned on completing additional tasks or services.

*Contract liabilities.* Contract liabilities consist of amounts invoiced to customers in excess of revenue recognized. Our contract assets and liabilities are reported in a net position on a contract by contract basis at the end of each reporting period. As of January 31, 2026 and January 25, 2025, the contract liabilities balance is classified as current based on the timing of when we expect to complete the tasks required for the recognition of revenue.

*Leases.* Our leases are accounted for as operating leases, with lease expense recognized on a straight-line basis over the lease term. The lease term may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option. For leases with initial terms greater than 12 months, we record operating lease right-of-use assets and corresponding operating lease liabilities. Operating lease right-of-use assets represent our right to use the underlying asset for the lease term and operating lease liabilities represent our obligation to make the related lease payments. These assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. As our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. Leases with an initial term of 12 months or less are not recorded on our consolidated balance sheet.

*Goodwill and Intangible Assets.* Goodwill and other indefinite-lived intangible assets are assessed for impairment annually, or more frequently, if events occur that would indicate a potential reduction in the fair value of a reporting unit below its carrying value. We perform our annual impairment review of goodwill at the reporting unit level. Each of our operating segments with goodwill represents a reporting unit for the purpose of assessing impairment. If we determine the fair value of

the reporting unit's goodwill or other indefinite-lived intangible assets is less than their carrying value as a result of an annual or interim test, an impairment loss is recognized and reflected in operating income or loss in the consolidated statements of operations during the period incurred. The following table sets forth goodwill and other intangible assets, net by reportable segment as of January 31, 2026 (dollars in millions):

	<b>Communications</b>	<b>Building Systems</b>	<b>Total</b>
Goodwill	\$ 332.6	\$ 1,110.8	\$ 1,443.4
Percentage of total	23.0 %	77.0 %	100.0 %
Other intangible assets, net	\$ 171.3	\$ 754.6	\$ 925.9
Percentage of total	18.5 %	81.5 %	100.0 %

We review finite-lived intangible assets for impairment whenever an event occurs or circumstances change that indicate that the carrying amount of such assets may not be fully recoverable. Recoverability is determined based on an estimate of undiscounted future cash flows resulting from the use of an asset and its eventual disposition. Should an asset not be recoverable, an impairment loss is measured by comparing the fair value of the asset to its carrying value. If we determine the fair value of an asset is less than the carrying value, an impairment loss is recognized in operating income or loss in the consolidated statements of operations during the period incurred.

We use judgment in assessing whether goodwill and intangible assets are impaired. Estimates of fair value are based on our projection of revenues, operating costs, and cash flows taking into consideration historical and anticipated future results, general economic and market conditions, as well as the impact of planned business or operational strategies. We determine the fair value of our reporting units using an equal weighting of fair values derived from the income approach and market approach valuation methodologies. The income approach uses the discounted cash flow method and the market approach uses the guideline company method. Changes in our judgments and projections could result in significantly different estimates of fair value, potentially resulting in impairments of goodwill and other intangible assets. The inputs used for fair value measurements of the reporting units and other related indefinite-lived intangible assets are the lowest level (Level 3) inputs.

The Company's goodwill arising from acquisitions resides in multiple reporting units and primarily relates to the value of expected synergies, anticipated expansion of its geographic presence, and the strengthening of the customer base. Goodwill and other indefinite-lived intangible assets are assessed for impairment annually, or more frequently if events occur that would indicate a potential reduction in the fair value of a reporting unit below its carrying value. The profitability of individual reporting units may suffer periodically due to downturns in customer demand, reduced revenues from the termination of contracts or the termination or delay of services under a contract or the loss of a customer, increased costs of providing services, and the level of overall economic activity. The individual reporting unit's customers may also reduce capital expenditures and defer or cancel pending projects due to changes in technology, a slowing or uncertain economy, merger or acquisition activity, a decision to allocate resources to other areas of their business, or other reasons. The profitability of reporting units may also suffer if actual costs of providing services exceed the costs anticipated when the reporting unit enters into contracts. Additionally, adverse economic conditions and future volatility in the equity and credit markets could impact the valuation of the Company's reporting units. The cyclical nature of the reporting unit's business, the high level of competition existing within its industry, and the concentration of its revenues from a limited number of customers may also cause results to vary. These factors may affect individual reporting units disproportionately, relative to the Company as a whole. As a result, the performance of one or more of the reporting units could decline, resulting in an impairment of goodwill or intangible assets.

The Company performs its annual goodwill assessment as of the first day of the fourth fiscal quarter of each fiscal year. Goodwill and indefinite lived intangible assets are required to be tested for impairment between annual tests if events occur that would indicate a potential reduction in the fair value of a reporting unit below its carrying value.

We performed our annual impairment assessment for fiscal 2026, fiscal 2025, and fiscal 2024, and concluded that no impairment of goodwill or the indefinite-lived intangible asset was indicated at any reporting unit for any of the periods. In each of these periods, qualitative assessments were performed on reporting units that comprise a significant portion of our consolidated goodwill balance. For the Company's indefinite-lived intangible asset we performed a qualitative assessment for fiscal 2026, fiscal 2025 and fiscal 2024. A qualitative assessment includes evaluating all identified events and circumstances that could affect the significant inputs used to determine the fair value of a reporting unit or indefinite-lived intangible asset for the purpose of determining whether it is more likely than not that these assets are impaired. We consider various factors while performing qualitative assessments, including macroeconomic conditions, industry and market conditions, financial performance of the reporting units, changes in market capitalization, and any other specific reporting unit considerations. These qualitative assessments indicated that it was more likely than not that the fair value exceeded carrying value for those reporting

units. For the remaining reporting units, we performed the quantitative analysis described in ASC Topic 350 in each of these periods. When performing the quantitative analysis, we determine the fair value of our reporting units using an equal weighting of fair values derived from the income approach and market approach valuation methodologies. Under the income approach, the key valuation assumptions used in determining the fair value estimates of our reporting units for each annual test were: (a) expected cash flow for a period of seven years based on our best estimate of revenue growth rates and projected operating margins; (b) terminal value based upon terminal growth rates; and (c) a discount rate based on the Company's best estimate of the weighted average cost of capital adjusted for certain risks for the reporting units.

The table below outlines certain assumptions used in our annual quantitative impairment analyses for fiscal 2026, fiscal 2025, and fiscal 2024;

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Terminal Growth Rate	3%	2% - 3%	2.5%
Discount Rate	11.5%	10.5%	10.5%

The discount rate reflects risks inherent within each reporting unit operating individually. These risks are greater than the risks inherent in the Company as a whole. Determination of discount rates included consideration of market inputs such as the risk-free rate, equity risk premium, industry premium, and cost of debt, among other assumptions. The discount rate for fiscal 2026 increased compared to the rate used in fiscal 2025. The cost of equity increased as did the weighting for equity which resulted in an increase in the weighted average cost of capital compared to the prior year. We believe the assumptions used in the impairment analysis each year are reflective of the risks inherent in the business models of our reporting units and our industry. Under the market approach, the guideline company method develops valuation multiples by comparing our reporting units to similar publicly traded companies. Key valuation assumptions used in determining the fair value estimates of our reporting units rely on: (a) the selection of similar companies and (b) the selection of valuation multiples as they apply to the reporting unit characteristics.

We determined that the fair values of each of the reporting units were in excess of their carrying values in the fiscal 2026 assessment. Management determined that significant changes were not likely in the factors considered to estimate fair value, and analyzed the impact of such changes were they to occur. Specifically, if the discount rate applied in the fiscal 2026 impairment analysis had been 100 basis points higher than estimated for each of the reporting units, and all other assumptions were held constant, the conclusion of the assessment would remain unchanged and there would be no impairment of goodwill. Additionally, if there was a 25% decrease in the fair value of any of the reporting units due to a decline in their discounted cash flows resulting from lower operating performance, the conclusion of the assessment would remain unchanged for all reporting units. Recent operating performance, along with assumptions for specific customer and industry opportunities, were considered in the key assumptions used during the fiscal 2026 impairment analysis. Management has determined the goodwill of the Company may have an increased likelihood of impairment if a prolonged downturn in customer demand were to occur, or if the reporting units were not able to execute against customer opportunities, and the long-term outlook for their cash flows were adversely impacted. Furthermore, changes in the long-term outlook may result in a change to other valuation assumptions. Factors monitored by management which could result in a change to the reporting units' estimates include the outcome of customer requests for proposals and subsequent awards, strategies of competitors, labor market conditions and levels of overall economic activity.

The Company determined that there were no events or changes in circumstances for the other reporting units or indefinite lived intangible assets during fiscal 2026 that would indicate a potential reduction in their fair value below their carrying amounts. As of January 31, 2026, the Company continues to believe the remaining goodwill and the indefinite-lived intangible asset are recoverable for all of its reporting units. However, if adverse events were to occur or circumstances were to change indicating that the carrying amount of such assets may not be fully recoverable, the assets would be reviewed for impairment and could be impaired. There can be no assurances that goodwill or the indefinite-lived intangible asset may not be impaired in future periods.

*Implementation Costs – Cloud Computing Arrangements.* In accordance with ASU 2018-15, Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract, which amends ASC 350-40, Internal-Use Software, to the extent costs incurred in a cloud computing arrangement are capitalizable, the corresponding costs are recorded in other assets and the related amortization is included in general and administrative expense in the consolidated statements of operations. The amount of capitalized cloud computing implementation costs included in other non-current assets was \$61.7 million and \$29.8 million as of January 31, 2026 and January 25, 2025, respectively. The amortization of capitalized

implementation costs related to cloud computing arrangements was \$2.4 million and \$1.7 million during fiscal 2026 and fiscal 2025.

*Accrued Insurance Claims.* For claims within our insurance program, we retain the risk of loss, up to certain annual stop-loss limits, for matters related to automobile liability, general liability (including damages associated with underground facility locating services), workers' compensation, and employee group health. Losses for claims beyond our retained risk of loss are covered by insurance up to our coverage limits. Our Building Systems segment is fully insured for these risks through third-party insurance policies, and we do not retain the risk of loss for claims related to those operations.

For workers' compensation losses during fiscal 2026, 2025, and 2024, we retained the risk of loss up to \$1.0 million on a per occurrence basis. This retention amount is applicable to all of the states in which we operate, except with respect to workers' compensation insurance in two states in which we participate in state-sponsored insurance funds.

For automobile liability and general liability losses during fiscal 2026, we retained the risk of loss up to \$2.0 million on a per-occurrence basis for the first \$5.0 million of insurance coverage. We also retained the risk of loss for the next \$5.0 million on a per-occurrence basis for losses between \$5.0 million and \$10.0 million, if any.

For automobile liability losses during fiscal 2025, we retained the risk of loss up to \$2.0 million on a per-occurrence basis for the first \$5.0 million of insurance coverage and we retained the risk of loss up to \$1.0 million for general liability losses during fiscal 2025. We also retained the risk of loss for the next \$5.0 million on a per-occurrence basis for losses between \$5.0 million and \$10 million, if any.

For automobile liability and general liability losses during fiscal 2024, we retained the risk of loss up to \$1.0 million on a per-occurrence basis for the first \$5.0 million of insurance coverage. We also retained the risk of loss for the next \$10.0 million risk of loss on a per occurrence basis for losses between \$5.0 million and \$15.0 million, if any, and we retained \$10.0 million risk of loss on a per occurrence basis for losses between \$30.0 million and \$40.0 million, if any.

We are party to a stop-loss agreement for losses under our employee group health plan. For calendar year 2026, we retain the risk of loss on an annual basis, up to the first \$750,000 of claims per participant. In calendar years 2025 and 2024, we retained the risk of loss on an annual basis, up to the first \$750,000 and \$700,000, respectively, of claims per participant.

We have established reserves that we believe to be adequate based on current evaluations and our experience with these types of claims. A liability for unpaid claims and the associated claim expenses, including incurred but not reported losses, is determined with the assistance of an actuary and reflected in the consolidated financial statements as accrued insurance claims. The effect on our financial statements is generally limited to the amount needed to satisfy our insurance deductibles or retentions. Amounts for total accrued insurance claims and insurance recoveries/receivables are as follows (dollars in millions):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Accrued insurance claims - current	\$ 47,594	\$ 46,686
Accrued insurance claims - non-current	57,977	49,836
Accrued insurance claims	<u>\$ 105,571</u>	<u>\$ 96,522</u>
Insurance recoveries/receivables:		
Non-current (included in Other assets)	8,570	3,343
Insurance recoveries/receivables	<u>\$ 8,570</u>	<u>\$ 3,343</u>

The liability for total accrued insurance claims included incurred but not reported losses of approximately \$56.3 million and \$47.9 million as of January 31, 2026 and January 25, 2025, respectively.

We estimate the liability for claims based on facts, circumstances, and historical experience. Recorded loss reserves are settled over time and are not discounted. Factors affecting the determination of the expected cost for existing and incurred but not reported claims include, but are not limited to, the magnitude and quantity of future claims, the payment pattern of claims which have been incurred, changes in the medical condition of claimants, and other factors such as inflation, tort reform or other legislative changes, unfavorable jury decisions, and court interpretations.

*Income Taxes.* We account for income taxes under the asset and liability method. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities.

Measurement of our tax position is based on the applicable statutes, federal and state case law, and our interpretations of tax regulations. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income during the period that includes the enactment date. We record net deferred tax assets to the extent we believe these assets will more likely than not be realized. In making such determination, we consider all relevant factors, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies, and recent financial operations. In the event we determine that we would be able to realize deferred income tax assets in excess of their net recorded amount, we would adjust the valuation allowance, which would reduce the provision for income taxes.

We recognize tax benefits in the amount that we deem more likely than not will be realized upon ultimate settlement of any tax uncertainty. Tax positions that fail to qualify for recognition are recognized during the period in which the more-likely-than-not standard has been reached, when the tax positions are resolved with the respective taxing authority, or when the statute of limitations for tax examination has expired. We recognize applicable interest related to tax amounts in interest expense and penalties within general and administrative expenses.

Fluctuations in our effective income tax rate were attributable to the difference in income tax rates from state to state where work was performed, non-deductible and non-taxable items, tax credits recognized, the tax effects of the vesting and exercise of share-based awards, impacts of tax filings for prior years, and changes in unrecognized tax benefits.

*Stock-Based Compensation.* We have stock-based compensation plans under which we grant stock-based awards, including stock options, time-based restricted share units (“RSUs”), and performance-based restricted share units (“Performance RSUs”) to attract, retain, and reward talented employees, officers, and directors, and to align stockholder and employee interests. The resulting compensation expense is recognized on a straight-line basis over the vesting period, net of actual forfeitures, and is included in general and administrative expenses in the consolidated statements of operations. This expense fluctuates over time as a function of the duration of vesting periods of the stock-based awards and the Company’s performance, as measured by criteria set forth in performance-based awards.

Compensation expense for stock-based awards is based on fair value at the measurement date. The fair value of RSUs and Performance RSUs is estimated on the date of grant and is equal to the closing market price per share of our common stock on that date. RSUs vest ratably over a three-year period starting in fiscal 2026 and prior grants vested ratably over a four-year period. Performance RSUs vest ratably over a three-year period, if certain performance measures are achieved. Each RSU and Performance RSU is settled in one share of our common stock upon vesting. The fair value of stock options is estimated on the date of grant using the Black-Scholes option pricing model. This valuation is affected by the Company’s stock price as well as other inputs, including the expected common stock price volatility over the expected life of the options, the expected term of the stock option, risk-free interest rates, and expected dividends, if any. Our outstanding stock options generally vest ratably over a four-year period and are generally exercisable over a period of up to ten years.

For Performance RSUs, we evaluate compensation expense quarterly and recognize expense only if we determine it is probable that the performance measures for the awards will be met. The performance measures for target awards are based on our operating earnings (adjusted for certain amounts) as a percentage of contract revenues and our operating cash flow level (adjusted for certain amounts) for the applicable four-quarter performance period. Additionally, certain awards include three-year performance measures that are more difficult to achieve than those required to earn target awards and, if met, result in supplemental shares awarded. The performance measures for supplemental awards are based on three-year cumulative operating earnings (adjusted for certain amounts) as a percentage of contract revenues and three-year cumulative operating cash flow level (adjusted for certain amounts). If we determine it is no longer probable that we will achieve certain performance measures for the awards, we reverse the stock-based compensation expense that we had previously recognized associated with the portion of Performance RSUs that are no longer expected to vest. The amount of the expense ultimately recognized depends on the number of awards that actually vest. Accordingly, stock-based compensation expense may vary from period to period. For additional information on our stock-based compensation plans, stock options, RSUs, and Performance RSUs, see Note 19, *Stock-Based Awards*, in the notes to the consolidated financial statements in this Annual Report on Form 10-K.

*Contingencies and Litigation.* In the ordinary course of our business, we are involved in certain legal proceedings and other claims, including claims for indemnification by our customers. In determining whether a loss should be accrued, we evaluate, among other factors, the probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. If only a range of probable loss can be determined, we accrue for our best estimate within the range for the contingency. In those cases where none of the estimates within the range is better than another, we accrue for the amount representing the low

end of the range. As additional information becomes available, we reassess the potential liability related to our pending litigation and other contingencies and revise our estimates as applicable. Revisions of our estimates of the potential liability could materially impact our results of operations. Additionally, if the final outcome of such litigation and contingencies differs adversely from that currently expected, it would result in a charge to operating results when determined.

*Business Combinations.* We account for business combinations under the acquisition method of accounting. The purchase price of each business acquired is allocated to the tangible and intangible assets acquired and the liabilities assumed based on information regarding their respective fair values on the date of acquisition. Any excess of the purchase price over the fair value of the separately identifiable assets acquired and liabilities assumed is allocated to goodwill. We determine the fair values used in purchase price allocations for intangible assets based on historical data, estimated discounted future cash flows, expected royalty rates for trademarks and trade names, as well as other information. The valuation of assets acquired and liabilities assumed requires a number of judgments and is subject to revision as additional information about the fair value of assets and liabilities becomes available. Additional information, which existed as of the acquisition date but unknown to us at that time, may become known during the remainder of the measurement period. This measurement period may not exceed 12 months from the acquisition date. The Company will recognize any adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustments are determined. Additionally, in the same period in which adjustments are recognized, the Company will record the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of any change to the provisional amounts, calculated as if the accounting adjustment had been completed at the acquisition date. Acquisition costs are expensed as incurred. The results of operations of businesses acquired are included in the consolidated financial statements from their dates of acquisition.

## Results of Operations

The following table sets forth our consolidated statements of operations for the periods indicated and the amounts as a percentage of contract revenues (totals may not add due to rounding) (dollars in millions):

	<b>Fiscal Year Ended</b>			
	<b>January 31, 2026</b>		<b>January 25, 2025</b>	
Contract revenues	\$ 5,545.9	100.0 %	\$ 4,702.0	100.0 %
Expenses:				
Costs of earned revenues, excluding depreciation and amortization	4,405.8	79.4	3,769.9	80.2
General and administrative	445.5	8.0	393.0	8.4
Depreciation and amortization	269.6	4.9	198.6	4.2
Total	5,120.8	92.3	4,361.5	92.8
Interest expense, net	(66.5)	(1.2)	(61.0)	(1.3)
Loss on debt extinguishment	(7.3)	(0.1)	(1.0)	—
Other income, net	16.6	0.3	29.2	0.6
Income before income taxes	367.9	6.6	307.8	6.5
Provision for income taxes	86.7	1.6	74.4	1.6
Net income	\$ 281.2	5.1 %	\$ 233.4	5.0 %

Fiscal 2026 included 53 weeks of operations, whereas fiscal 2025 included 52 weeks, which impacts the comparability of the financial results and year-over-year variances discussed below.

*Contract Revenues.* Contract revenues were \$5.546 billion during fiscal 2026 compared to \$4.702 billion during fiscal 2025. Contract revenues from acquired businesses were \$563.8 million during fiscal 2026 and \$109.1 million during fiscal 2025. Acquired revenues represent contract revenues from acquired businesses that were not owned for the full period in both the current and comparable prior periods. Excluding amounts generated by the acquired businesses, contract revenues increased by \$389.2 million during fiscal 2026 compared to fiscal 2025, primarily due to net increases in fiber-to-the-home deployments, including rural fiber deployment programs.

*Costs of Earned Revenues, excluding Depreciation and Amortization.* Costs of earned revenues increased to \$4.406 billion, or 79.4% of contract revenues, during fiscal 2026 compared to \$3.770 billion, or 80.2% of contract revenues, during fiscal 2025. The primary component of the increase was a \$492.3 million aggregate increase in direct labor and subcontractor

costs. The increase was further due to a \$78.3 million increase in direct materials, a \$52.0 million increase in other direct costs and a \$13.3 million increase in equipment maintenance and fuel costs combined.

Costs of earned revenues as a percentage of contract revenues decreased 0.7% during fiscal 2026 compared to fiscal 2025. As a percentage of contract revenues, direct materials increased 0.6% primarily as a result of our mix of work in which we provide materials for our customers. Equipment maintenance and fuel costs combined decreased 0.3% as a percentage of contract revenues. Labor and subcontracted labor costs decreased 1.0% as a percentage of contract revenues, primarily due to the mix of work performed.

*General and Administrative Expenses.* General and administrative expenses increased to \$445.5 million, or 8.0% of contract revenues, during fiscal 2026 compared to \$393.0 million, or 8.4% of contract revenues, during fiscal 2025. The increase in total general and administrative expenses primarily resulted from increased administrative, payroll, performance based compensation, \$18.8 million of acquisition and integration costs during fiscal 2026 (compared to \$4.2 million during fiscal 2025) and other costs, including incremental general administrative expenses from acquired businesses. This increase was partially offset by lower stock-based compensation expense in the current year, as the prior year included \$11.4 million incremental stock-based compensation expense resulting from the CEO transition. See Note 19, *Stock-Based Awards*, for additional information regarding the CEO transition.

*Depreciation and Amortization.* Depreciation expense was \$200.8 million, or 3.6% of contract revenues, during fiscal 2026, compared to \$167.2 million, or 3.6% of contract revenues, during fiscal 2025. The increase in depreciation expense during fiscal 2026 was primarily due to incremental capital expenditures to support our growth in operations, normal replacement cycle of fleet assets, and depreciation from acquired businesses. Amortization expense was \$68.8 million and \$31.4 million during fiscal 2026 and fiscal 2025, respectively. The increase in amortization expense during fiscal 2026 is due to the increase in amortizing intangibles from acquired businesses.

*Interest Expense, Net.* Interest expense, net increased to \$66.5 million during fiscal 2026 from \$61.0 million during fiscal 2025 as a result of higher outstanding borrowings during the current period, which was partially offset by higher interest income on invested cash balances.

*Loss on Debt Extinguishment.* Loss on debt extinguishment during fiscal 2026 of \$7.3 million and fiscal 2025 of \$1.0 million includes the write-off of deferred debt issuance costs in connection with the Credit Agreement amendments. See *“Liquidity and Capital Resources - Compliance with Credit Agreement”* for more information.

*Other Income, Net.* Other income, net was \$16.6 million and \$29.2 million during fiscal 2026 and fiscal 2025, respectively. The change in other income, net was primarily a function of the number of assets sold and prices obtained for those assets during each respective period. Gain on sale of fixed assets was \$26.7 million and \$36.5 million during fiscal 2026 and fiscal 2025, respectively. Other income, net also includes expense associated with the non-recourse sale of accounts receivable under a customer-sponsored vendor payment program.

*Income Taxes.* The following table presents our income tax provision and effective income tax rate for fiscal 2026 and fiscal 2025 (dollars in millions):

	<b>Fiscal Year Ended</b>	
	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Income tax provision	\$ 86.7	\$ 74.4
Effective income tax rate	23.6 %	24.2 %

Our effective income tax rate differs from the statutory rate primarily due to the difference in income tax rates from state to state where work was performed, non-deductible and non-taxable items, tax credits recognized, the tax effects of the vesting and exercise of share-based awards, and changes in unrecognized tax benefits.

*Net Income.* Net income was \$281.2 million for fiscal 2026 compared to \$233.4 million for fiscal 2025.

*Non-GAAP Adjusted EBITDA.* Adjusted EBITDA is a Non-GAAP measure. We define Adjusted EBITDA as net income before interest, taxes, depreciation and amortization, gain on sale of fixed assets, stock-based compensation expense, and certain non-recurring items. Management believes Adjusted EBITDA is a helpful measure for comparing the Company’s operating performance with prior periods as well as with the performance of other companies with different capital structures or

tax rates. The following table provides a reconciliation of net income to Non-GAAP Adjusted EBITDA (totals may not add due to rounding) (dollars in millions):

	<b>Fiscal Year Ended</b>	
	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Net income	\$ 281.2	\$ 233.4
Interest expense, net	66.5	61.0
Provision for income taxes	86.7	74.4
Depreciation and amortization	269.6	198.6
Earnings Before Interest, Taxes, Depreciation & Amortization (“EBITDA”)	704.0	567.4
Gain on sale of fixed assets	(26.7)	(36.5)
Stock-based compensation expense	34.5	40.3
Acquisition and integration costs	18.8	4.2
Loss on debt extinguishment	7.3	1.0
Non-GAAP Adjusted EBITDA	<u>\$ 737.7</u>	<u>\$ 576.3</u>
Non-GAAP Adjusted EBITDA % of contract revenues	13.3 %	12.3 %

A discussion of our financial results for fiscal 2025 compared to our financial results for fiscal 2024 can be found in the “Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations - Results of Operations*” section in our Annual Report on Form 10-K for the fiscal year ended January 25, 2025, filed on February 28, 2025.

## Segment Results

Through October 25, 2025, we reported our results under a single reportable segment. During the fourth quarter of fiscal 2026, in connection with the acquisition of Power Solutions, we reevaluated our reportable segments which resulted in the transition from a single reportable segment to two reportable segments: Communications and Building Systems. See Part I, Item 1. *Business* for additional information. Common administrative support for operating companies require that certain allocations be made to determine segment profitability, including allocations of corporate shared and indirect operating costs, as well as general and administrative costs. Certain corporate costs are not allocated, including certain acquisition and integration costs, interest expense (income); and loss on debt extinguishment. The following table sets forth segment and consolidated contract revenues, segment and consolidated income before income taxes and segment and consolidated Non-GAAP Adjusted EBITDA for the periods indicated and the amounts as a percentage of segment and consolidated contract revenues, respectively, as well as the dollar and percentage change from the prior period (totals may not add due to rounding) (dollars in millions):

	Fiscal Year Ended				Change	
	January 31, 2026		January 25, 2025		Amount	%
<b>Contract Revenues:</b>						
Communications	\$ 5,450.1	98.3 %	\$ 4,702.0	100.0 %	\$ 748.1	15.9 %
Building Systems	95.8	1.7 %	—	— %	95.8	100.0 %
Consolidated contract revenues	<u>\$ 5,545.9</u>	<u>100.0%</u>	<u>\$ 4,702.0</u>	<u>100.0%</u>	<u>\$843.9</u>	<u>17.9%</u>
<b>Income (loss) before Income Taxes:</b>						
Communications	\$ 470.0	8.5 %	\$ 369.8	7.9 %	\$ 100.2	27.1 %
Building Systems	(9.6)	(0.2)%	—	— %	(9.6)	100.0 %
Corporate and Non-Allocated Costs	(92.5)	(1.7)%	(62.0)	(1.3)%	(30.5)	49.2 %
Consolidated income before income taxes	<u>\$ 367.9</u>	<u>6.6%</u>	<u>\$ 307.8</u>	<u>6.5%</u>	<u>\$ 60.1</u>	<u>19.5%</u>
<b>Non-GAAP Adjusted EBITDA:</b>						
Communications	\$ 726.6	13.3 %	\$ 576.3	12.3 %	\$ 150.3	26.1 %
Building Systems	11.1	11.6 %	—	— %	11.1	100.0 %
Consolidated Non-GAAP Adjusted EBITDA	<u>\$ 737.7</u>	<u>13.3%</u>	<u>\$ 576.3</u>	<u>12.3%</u>	<u>\$ 161.4</u>	<u>28.0%</u>

Fiscal 2026 included 53 weeks of operations, whereas fiscal 2025 included 52 weeks, which impacts the comparability of the financial results and year-over-year variances discussed below.

### Communications Segment Results

*Contract Revenues.* The increase in contract revenues for the fiscal year ended January 31, 2026 was primarily due to net increases in fiber-to-the-home deployments, including rural fiber deployment programs and revenues from businesses acquired in fiscal 2025.

*Income before income taxes.* The increase in income before income taxes for the fiscal year ended January 31, 2026 was primarily due improved operating leverage resulting from higher contract revenues.

*Non-GAAP Adjusted EBITDA.* The increase in Non-GAAP Adjusted EBITDA for the fiscal year ended January 31, 2026 was primarily due improved operating leverage resulting from higher contract revenues.

### Building Systems Segment Results

*Contract Revenues.* The increase in contract revenues for the fiscal year ended January 31, 2026 was due to revenues from the business acquired in fiscal 2026.

*Loss before income taxes.* The loss before income taxes for the fiscal year ended January 31, 2026 is attributable to amortization expense resulting from the application of acquisition accounting for the acquired business, which resulted in \$20.4 million of amortization expense associated with finite-lived intangible assets related to customer relationships, backlog and

trade names identified during the preliminary purchase price allocation. We expect these non-cash charges to continue to impact segment operating results in future periods as the economic value of the acquired intangibles is realized.

*Non-GAAP Adjusted EBITDA.* The increase in Non-GAAP Adjusted EBITDA for the fiscal year ended January 31, 2026 was due to the results of the business acquired in fiscal 2026.

### ***Corporate and Non-Allocated Costs***

The increase in corporate and non-allocated costs during the fiscal year ended January 31, 2026 resulted from increased interest expense, loss on debt extinguishment and acquisition costs.

## **Liquidity and Capital Resources**

We are subject to concentrations of credit risk relating primarily to our cash and equivalents, accounts receivable, and contract assets. Cash and equivalents primarily include balances on deposit with banks and totaled \$709.2 million as of January 31, 2026, compared to \$92.7 million as of January 25, 2025. We maintain our cash and equivalents at financial institutions we believe to be of high credit quality. For all periods presented, we have not experienced any loss or lack of access to cash in our operating accounts.

*Sources of Cash.* Our sources of cash are operating activities, long-term debt, equity offerings, bank borrowings, proceeds from the sale of idle and surplus equipment and real property, and stock option proceeds. Cash flow from operations is primarily influenced by demand for our services and operating margins, but can also be influenced by working capital needs associated with the services that we provide. In particular, working capital needs may increase when we have growth in operations and where project costs, primarily associated with labor, subcontractors, equipment, and materials, are required to be paid before the related customer balances owed to us are invoiced and collected. Our working capital (total current assets less total current liabilities, excluding the current portion of debt) was \$1,754.0 million as of January 31, 2026 compared to \$1,117.5 million as of January 25, 2025.

Capital resources are used primarily to purchase equipment and maintain sufficient levels of working capital to support our contractual commitments to customers. We periodically draw upon and repay our revolving credit facility depending on our cash requirements. We currently intend to retain any earnings for use in the business and other capital allocation strategies which may include investment in acquisitions and share repurchases. Consequently, we do not anticipate paying any cash dividends on our common stock in the foreseeable future.

Our level of capital expenditures can vary depending on the customer demand for our services, the replacement cycle we select for our equipment, and overall growth. We intend to fund these expenditures primarily from operating cash flows, availability under our Credit Agreement (as defined below), and cash on hand. We expect capital expenditures, net of disposals, to range from \$210.0 million to \$220.0 million during fiscal 2027 to support growth opportunities and the replacement of certain fleet assets.

*Sufficiency of Capital Resources.* We believe that our capital resources, including existing cash balances and amounts available under our credit agreement, are sufficient to meet our financial obligations. These obligations include payments on our debt, working capital requirements, and the purchase of equipment at our expected level of operations for at least the next 12 months. Our capital requirements may increase to the extent we seek to grow by acquisitions that involve consideration other than our stock, experience difficulty or delays in collecting amounts owed to us by our customers, increase our working capital in connection with new or existing customer programs, or we repurchase our common stock, or repay credit agreement borrowings. Changes in financial markets or other components of the economy could adversely impact our ability to access the capital markets, in which case we would expect to rely on a combination of available cash and our credit agreement to provide short-term funding. Management regularly monitors the financial markets and assesses general economic conditions for possible impact on our financial position. We believe our cash investment policies are prudent and expect that any volatility in the capital markets would not have a material impact on our cash investments.

*Net Cash Flows.* The following table presents our net cash flows for fiscal 2026 and fiscal 2025 (dollars in millions):

	<b>Fiscal Year Ended</b>	
	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Net cash flows:		
Provided by operating activities	\$ 642.5	\$ 349.1
Used in investing activities	\$ (1,835.7)	\$ (395.2)
Provided by financing activities	\$ 1,809.6	\$ 37.7

*Cash Provided by Operating Activities.* During fiscal 2026, net cash provided by operating activities was \$642.5 million. Changes in working capital (excluding cash) and changes in other long-term assets and liabilities used \$35.8 million of operating cash flow during fiscal 2026. Working capital changes that provided operating cash flow during fiscal 2026 included an increase in accounts payable of \$223.2 million. Working capital changes that used operating cash flow during fiscal 2026 included an increase in contract assets, net of \$111.3 million, an increase in other assets of \$50.2 million, a decrease in income tax payable of \$46.8 million, a decrease in accrued liabilities of \$41.7 million, an increase in accounts receivable, net of \$0.8 million, and an increase in other current assets and inventory of \$8.2 million.

The primary non-cash items in cash flows from operating activities during the current and prior periods are depreciation and amortization, non-cash lease expense, stock-based compensation, amortization of debt issuance costs, deferred income taxes, gain on sale of fixed assets, provision for bad debt and loss on debt extinguishment.

Our days sales outstanding (“DSO”) was 101 days and 114 days as of January 31, 2026 and January 25, 2025, respectively. DSO is calculated based on the ending balance of total current and non-current accounts receivable (including unbilled accounts receivable), net of the allowance for credit losses, and current contract assets, net of contract liabilities, divided by the average daily revenue for the most recently completed quarter. DSO as of January 31, 2026 is calculated on a pro forma basis by adjusting contract revenues during the fourth quarter of fiscal 2026 to include the historical contract revenues of the business acquired in fiscal 2026 as if such acquisition had occurred as of the beginning of the fiscal quarter.

See Note 6, *Accounts Receivable, Contract Assets, and Contract Liabilities*, for further information on our customer credit concentration as of January 31, 2026 and January 25, 2025 and Note 20, *Customer Concentration and Revenue Information*, for further information on our significant customers. We believe that none of our significant customers were experiencing financial difficulties that would materially impact the collectability of our total accounts receivable and contract assets (liabilities), net as of January 31, 2026 or January 25, 2025.

During fiscal 2025, net cash provided by operating activities was \$349.1 million. Changes in working capital (excluding cash) and changes in other long-term assets and liabilities used \$114.6 million of operating cash flow during fiscal 2025. Working capital changes that used operating cash flow during fiscal 2025 included an increase in accounts receivable, net of \$117.8 million, a decrease in accrued liabilities of \$21.0 million, an increase in other assets of \$21.0 million, and a decrease in accounts payable of \$16.8 million. Working capital changes that provided operating cash flow during fiscal 2025 included an increase in contract liabilities, net of \$31.2 million, an increase in income tax payable of \$26.5 million, and a decrease in other current assets and inventory of \$4.3 million.

*Cash Used in Investing Activities.* Net cash used in investing activities was \$1,835.7 million during fiscal 2026. Capital expenditures of \$240.8 million were primarily for the replacement of certain fleet assets and other equipment for new work opportunities and cash paid for the fiscal 2026 acquisition, net of cash acquired, was \$1,628.6 million. Proceeds from sale of assets were \$33.6 million.

Net cash used in investing activities was \$395.2 million during fiscal 2025. Capital expenditures of \$250.5 million were for the replacement of certain fleet assets and new work opportunities and cash paid for acquisitions was \$183.9 million. Proceeds from sale of assets were \$39.1 million.

*Cash Provided by Financing Activities.* Net cash provided by financing activities was \$1,809.6 million during fiscal 2026. During fiscal 2026, borrowings under our credit agreement were \$2,969.0 million. We used approximately \$1,079.0 million to repay borrowings under our Credit Agreement. We also borrowed and repaid \$600.0 million on a 364 day secured bridge loan facility related to the fiscal 2026 acquisition. We repurchased 200,000 shares of our common stock in open market transactions, at an average price of \$150.93 per share, for \$30.2 million, during fiscal 2026. Average price paid per share excludes 1% excise

tax on share repurchases. We also paid \$14.4 million to tax authorities in order to meet the payroll tax withholding obligations on restricted share units that vested during fiscal 2026. In addition, we paid \$1.9 million, net, to tax authorities for payroll tax withholding obligations on the exercise of stock options. We paid approximately \$33.9 million in issuance costs and third party fees and expenses related to our financing transactions.

Net cash provided by financing activities was \$37.7 million during fiscal 2025. During fiscal 2025, borrowings under our credit agreement were \$987.4 million. We used approximately \$852.4 million to repay borrowings under our Credit Agreement. We repurchased 410,000 shares of our common stock in open market transactions, at an average price of \$160.10 per share, for \$65.6 million, during fiscal 2025. Average price paid per share excludes 1% excise tax on share repurchases. We also paid \$17.0 million to tax authorities in order to meet the payroll tax withholding obligations on restricted share units that vested during fiscal 2025. In addition, we paid \$8.0 million, net, to tax authorities for payroll tax withholding obligations on the exercise of stock options. We paid approximately \$6.7 million in issuance costs and third party fees and expenses related to our financing transactions.

*Supplemental Disclosure of Non-Cash Activities:* During fiscal 2026, in connection with the Power Solutions acquisition, we issued 1,011,069 shares of Dycom common stock to the sellers valued at \$351.0 million.

*Compliance with Credit Agreement.* The Company and certain of its subsidiaries are party to a credit agreement (as defined below). The Company, the Guarantors (as defined therein) party thereto, the Term Loan B lender (as defined therein) party thereto and Bank of America, N.A. (“Bank of America”) as administrative and collateral agent (in such capacities and together with its successors and permitted assigns, the “Administrative Agent”), entered into that certain First Amendment to the Third Amended and Restated Credit Agreement (the “Amendment”), which amends that Third Amended and Restated Credit Agreement, dated as of December 23, 2025 by and among, the Company, the Guarantors from time to time party thereto, the Lenders (as defined therein) from time to time party thereto and the L/C Issues (as defined therein) from time to time party thereto and the Administrative Agent (the “Existing Credit Agreement”, and, the Existing Credit Agreement, as amended by the Amendment, the “Credit Agreement”). On December 23, 2025, we amended and restated the Credit Agreement to, among other things, establish a \$600.0 million 364 day secured bridge loan facility (the “Bridge Facility”), increase the existing senior secured term loan A facility from \$440.0 million to \$1,540.0 million (the “Term Loan A Facility”), increase the commitments under the senior secured revolving credit facility from \$650.0 million to \$800.0 million (the “Revolving Credit Facility”) and extend the maturity date of the Term Loan A Facility and the Revolving Credit Facility. On January 27, 2026, we entered into the First Amendment to, among other things, establish an \$800 million senior secured term loan B facility (the “Term Loan B Facility”), the proceeds of which were used to (i) refinance the Bridge Facility, (ii) pay the fees and expenses incurred in connection therewith and (iii) fund cash to the balance sheet of the Company. The Credit Agreement includes a revolving facility with a maximum revolver commitment of \$800.0 million, a Term Loan A Facility in the principal amount of \$1,540.0 million, and a Term Loan B Facility in the principal amount of \$800.0 million. The Credit Agreement also includes a \$225.0 million sublimit for the issuance of letters of credit and a \$50.0 million sublimit for swingline loans. The maturity of the Revolving Credit Facility and Term Loan A Facility is December 23, 2030. The maturity of the Term Loan B Facility is January 27, 2033.

Subject to certain conditions, the Credit Agreement provides us with the ability to enter into one or more incremental facilities either by increasing the revolving commitments under the Credit Agreement and/or by establishing one or more additional term loans, up to the sum of (i) \$927.0 million and (ii) an aggregate amount such that, after giving effect to such incremental facilities on a pro forma basis (assuming that the amount of the incremental commitments are fully drawn and funded), the consolidated senior secured net leverage ratio does not exceed 3.50 to 1.00. The consolidated senior secured net leverage ratio is the ratio of our consolidated senior secured indebtedness reduced by (i) unrestricted cash and equivalents in excess of \$25.0 million to our trailing four-quarter consolidated earnings before interest, taxes, depreciation, and amortization (“EBITDA”), as defined by the Credit Agreement, (ii) subordinated indebtedness, as defined in the Credit Agreement and (iii) unsecured indebtedness, as defined in the Credit Agreement. Borrowings under the Credit Agreement are guaranteed by substantially all of our domestic subsidiaries and are secured by substantially all of the assets of the Borrowers and the Guarantors (subject to customary exceptions).

Under our Credit Agreement, borrowings bear interest at the rates described below based upon our consolidated net leverage ratio. In addition, we incur certain fees for unused balances and letters of credit at the rates described below, also based upon our consolidated net leverage ratio. The weighted average interest rates and fees for balances under our Credit Agreement as of January 31, 2026 and January 25, 2025, respectively, were as follows:

		Weighted Average Rate End of Period	
		January 31, 2026	January 25, 2025
Borrowings - Term A SOFR Loans	1.375% - 2.00% plus Term SOFR	5.43%	6.02%
Borrowings - Base Rate Loans	0.375% - 1.00% plus Base rate <sup>(1)</sup>	—%	—%
Borrowings - Term B SOFR Loans	1.75% plus Term SOFR	5.43%	—%
Unused Revolver Commitment	0.20% - 0.40%	0.35%	0.30%
Standby Letters of Credit	1.375% - 2.00%	1.75%	1.63%
Commercial Letters of Credit	0.6875% - 1.000%	—%	—%

<sup>(1)</sup> Base rate is described in the Credit Agreement as the highest of (i) the Federal Funds Rate plus 0.50%, (ii) the administrative agent's prime rate, and (iii) the Term Secured Overnight Financing Rate ("SOFR") plus 1.00% and if such rate is less than zero, such rate shall be deemed zero. There were no outstanding borrowings under our revolving facility as of January 25, 2025 and January 31, 2026, respectively.

Standby letters of credit of approximately \$53.6 million and \$47.5 million, issued as part of our insurance program, were outstanding under our Credit Agreement as of January 31, 2026 and January 25, 2025, respectively.

Our Credit Agreement contains a financial covenant that requires us to maintain a consolidated net leverage ratio of not greater than (A) until the last day of the first fiscal quarter ending after the second anniversary of December 23, 2025, 4.50 to 1.00, as measured at the end of each fiscal quarter, and provides for certain increases to this ratio in connection with permitted acquisitions. The consolidated net leverage ratio is the ratio of our consolidated indebtedness reduced by unrestricted cash and cash equivalents in excess of \$25.0 million to our trailing four-quarter consolidated earnings before interest, taxes, depreciation, and amortization as defined by our Credit Agreement. The agreement also contains a financial covenant that requires us to maintain a consolidated interest coverage ratio, which is the ratio of our trailing four-quarter consolidated EBITDA to our consolidated interest expense, each as defined by our Credit Agreement, of not less than 2.50 to 1.00, as measured at the end of each fiscal quarter. At January 31, 2026 and January 25, 2025, we were in compliance with the financial covenants of our Credit Agreement and had borrowing availability under our revolving facility of \$746.4 million and \$602.5 million, respectively, as determined by the most restrictive covenant. For calculation purposes, applicable cash on hand is netted against the funded debt amount as permitted in the Credit Agreement.

The indenture governing the 2029 Notes contains certain covenants that limit, among other things, our ability and the ability of certain of our subsidiaries to (i) incur additional debt and issue certain preferred stock, (ii) pay certain dividends on, repurchase, or make distributions in respect of, our and our subsidiaries' capital stock or make other payments restricted by the indenture, (iii) enter into agreements that place limitations on distributions made from certain of our subsidiaries, (iv) guarantee certain debt, (v) make certain investments, (vi) sell or exchange certain assets, (vii) enter into transactions with affiliates, (viii) create certain liens, and (ix) consolidate, merge or transfer all or substantially all of our or our Subsidiaries' assets. These covenants are subject to a number of exceptions, limitations and qualifications as set forth in the indenture governing the 2029 Notes.

*Contractual Obligations.* The following table sets forth our outstanding contractual obligations as of January 31, 2026 (dollars in thousands):

	<b>Due in Fiscal 2027</b>	<b>Due Thereafter</b>	<b>Total</b>
2029 Notes	\$ —	\$ 500,000	\$ 500,000
Credit agreement – Term Loan A Facility	—	1,540,000	1,540,000
Credit agreement – Term Loan B Facility	4,000	796,000	800,000
Fixed interest payments on long-term debt <sup>(1)</sup>	22,500	56,250	78,750
Obligations under long-term operating leases <sup>(2)</sup>	50,119	164,281	214,400
Obligations under short-term operating leases <sup>(3)</sup>	1,663	—	1,663
Employment agreements	36,051	7,310	43,361
Purchase and other contractual obligations <sup>(4)</sup>	70,619	64,706	135,325
<b>Total</b>	<b>\$ 184,952</b>	<b>\$ 3,128,547</b>	<b>\$ 3,313,499</b>

<sup>(1)</sup> Includes interest payments on our \$500.0 million principal amount of 2029 Notes outstanding, and excludes interest payments on our variable rate debt. Variable rate debt as of January 31, 2026 consisted of \$1,540.0 million outstanding under our Term Loan A Facility and \$800.0 million outstanding under our Term Loan B Facility.

<sup>(2)</sup> Amounts represent undiscounted lease obligations under long-term operating leases and exclude long-term operating leases that have not yet commenced of \$6.2 million as of January 31, 2026.

<sup>(3)</sup> Amounts represent lease obligations under short-term operating leases that are not recorded on our consolidated balance sheet as of January 31, 2026.

<sup>(4)</sup> Amounts represent committed capital for the expansion of our vehicle fleet, equipment and other assets in order to accommodate manufacturer lead times, as well as other purchase commitments not reflected in our consolidated balance sheet, primarily for inventory and general and administrative services, including information technology services.

Our consolidated balance sheet as of January 31, 2026 includes a long-term liability of approximately \$58.0 million for accrued insurance claims. This liability has been excluded from the table above as the timing of payments is uncertain.

The liability for unrecognized tax benefits for uncertain tax positions was approximately \$18.9 million and \$21.6 million, as of January 31, 2026 and January 25, 2025, respectively, and is included in other liabilities in the consolidated balance sheets. This amount has been excluded from the contractual obligations table because we are unable to reasonably estimate the timing of the resolution of the underlying tax positions with the relevant tax authorities.

*Performance and Payment Bonds and Guarantees.* We have obligations under performance and other surety contract bonds related to certain of our customer contracts. Performance bonds generally provide a customer with the right to obtain payment and/or performance from the issuer of the bond if we fail to perform our contractual obligations. As of January 31, 2026 and January 25, 2025 we had \$917.9 million and \$413.5 million of outstanding performance and other surety contract bonds, respectively. The estimated cost to complete projects secured by our outstanding performance and other surety contract bonds was approximately \$655.7 million as of January 31, 2026. In addition to performance and other surety contract bonds, as part of our insurance program we also provide surety bonds that collateralize our obligations to our insurance carriers. At both January 31, 2026 and January 25, 2025, we had \$31.0 million of outstanding surety bonds related to our insurance obligations. Additionally, we have periodically guaranteed certain obligations of our subsidiaries, including obligations in connection with obtaining state contractor licenses and leasing real property and equipment.

*Letters of Credit.* We have standby letters of credit issued under our Credit Agreement as part of our insurance program. These letters of credit collateralize obligations to our insurance carriers in connection with the settlement of potential claims. In connection with these collateral obligations, we had \$53.6 million and \$47.5 million outstanding standby letters of credit issued under our Credit Agreement as of January 31, 2026 and January 25, 2025, respectively.

*Backlog.* Backlog is not a measure defined by United States generally accepted accounting principles (“GAAP”) and should be considered in addition to, but not as a substitute for, GAAP results. Participants in our industry often disclose a calculation of their backlog; however, our methodology for determining backlog may not be comparable to the methodologies used by others. We utilize our calculation of backlog to assist in measuring aggregate awards under existing contractual

relationships with our customers. We believe our backlog disclosures will assist investors in better understanding this estimate of the services to be performed pursuant to awards by our customers under existing contractual relationships.

Our backlog is an estimate of the uncompleted portion of services to be performed under contractual agreements with our customers. The following table sets forth our backlog as of January 31, 2026 and January 25, 2025 (dollars in millions):

	<b>Fiscal Year Ended</b>			
	<b>January 31, 2026</b>		<b>January 25, 2025</b>	
	<b>Total Backlog</b>	<b>Next 12 Months (included in Total Backlog)</b>	<b>Total Backlog</b>	<b>Next 12 Months (included in Total Backlog)</b>
Communications	\$ 8,333.5	\$ 5,249.6	\$ 7,759.9	\$ 4,642.5
Building Systems	1,208.5	1,108.4	—	—
<b>Total</b>	<b>\$ 9,542.0</b>	<b>\$ 6,358.0</b>	<b>\$ 7,759.9</b>	<b>\$ 4,642.5</b>

Our backlog represents an estimate of services to be performed pursuant to master service agreements and other contractual agreements over their terms. These estimates are based on contract terms and evaluations regarding the timing of the services to be provided. In the case of master service agreements which are commonly used within our Communications segment, backlog is estimated based on the work performed in the preceding 12-month period, when applicable. When estimating backlog for newly initiated master service agreements and other long and short-term contracts, we also consider the anticipated scope of the contract and information received from the customer during the procurement process and, where applicable, other ancillary information. Building Systems segment backlog represents management's estimate of contract revenues expected to be realized related to remaining performance obligations from the portion of firm orders under fixed price and modified fixed-price contracts not yet completed or for which work has not yet begun. The majority of our backlog comprises services under master service agreements and other long-term contracts.

Generally, our customers are not contractually committed to procure specific volumes of services. Contract revenue estimates reflected in our backlog can be subject to change due to a number of factors, including contract cancellations or changes in the amount of work we expect to be performed under a contract. In addition, contract revenues reflected in our backlog may be realized in different periods from those previously anticipated due to these factors as well as project accelerations or delays due to various reasons, including, but not limited to, changes in customer spending priorities, project cancellations, regulatory interruptions, scheduling changes, commercial issues, such as permitting, engineering revisions, job site conditions and adverse weather. The amount or timing of our backlog can also be impacted by the merger or acquisition activity of our customers. Many of our contracts may be cancelled by our customers, or work previously awarded to us pursuant to these contracts may be cancelled, regardless of whether or not we are in default. The amount of backlog related to uncompleted projects in which a provision for estimated losses was recorded is not material.

Refer to Note 22, *Commitments and Contingencies*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K.

### **Recently Issued Accounting Pronouncements**

Refer to Note 3, *Accounting Standards*, in the Notes to the Consolidated Financial Statements in this Annual Report on Form 10-K for a discussion of recent accounting standards and pronouncements.

### **Item 7A. Quantitative and Qualitative Disclosures About Market Risk.**

Our primary exposure to market risk relates to unfavorable changes in interest rates on our fixed-rate and variable-rate debt. Fluctuations in interest rates impact the fair value of our fixed-rate debt and interest expense on our variable-rate debt. At January 31, 2026, 18% of our debt, on a gross basis, incurred interest at a fixed-rate and the remaining 82% of the debt incurred interest at a variable-rate.

On April 1, 2021, we issued \$500.0 million aggregate principal amount of 4.50% senior notes due 2029 (the “2029 Notes”). The 2029 Notes are guaranteed on a senior unsecured basis, jointly and severally, by all of our domestic subsidiaries that guarantee the Credit Agreement. The fair value of the fixed rate 2029 Notes will change with changes in market interest rates. Generally, the fair value of the fixed rate 2029 Notes will increase as interest rates fall and decrease as interest rates rise. The following table summarizes the carrying amount and fair value of the 2029 Notes, net of debt issuance costs. The fair value of the 2029 Notes is based on the closing trading price per \$100 of the 2029 Notes as of the last day of trading (Level 2), which was \$98.44 and \$94.65 as of January 31, 2026 and January 25, 2025, respectively (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Principal amount of 2029 Notes	\$ 500,000	\$500,000
Less: Debt issuance costs	(2,966)	(3,903)
Net carrying amount of 2029 Notes	<u>\$ 497,034</u>	<u>\$ 496,097</u>
	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Fair value of principal amount of 2029 Notes	\$ 492,200	\$ 473,250
Less: Debt issuance costs	(2,966)	(3,903)
Fair value of 2029 Notes	<u>\$ 489,234</u>	<u>\$ 469,347</u>

A hypothetical 50 basis point change in the market interest rates in effect would result in an increase or decrease in the fair value of the 2029 Notes of approximately \$7.2 million, calculated on a discounted cash flow basis as of January 31, 2026.

Our Credit Agreement provides borrowings at a variable rate of interest. On January 31, 2026, we had variable rate debt outstanding of \$1,540.0 million under our Term Loan A Facility and \$800.0 million under our Term Loan B Facility. Interest related to these borrowings fluctuates based on Term SOFR or the Base rate, each, as defined in the Credit Agreement and as described above. At the current level of borrowings, for every 50 basis point change in the interest rate, interest expense associated with such borrowings would correspondingly change by approximately \$11.7 million annually.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### ***1. Basis of Presentation***

Dycom Industries, Inc. (“Dycom,” the “Company,” “we,” “our,” or “us”) is a leading provider of specialty contracting services focused on the digital infrastructure, telecommunications and utilities industries throughout the United States. These services include program management, planning; engineering and design; aerial, underground, and wireless construction; maintenance; and fulfillment services for telecommunications and digital infrastructure providers. We also provide underground facility locating services for various utilities, including telecommunications providers, as well as other construction and maintenance services for electric and gas utilities. Additionally, with the acquisition of Power Solutions, LLC (“Power Solutions”) in the fourth quarter of fiscal 2026, we provide comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities. Dycom supplies the labor, tools, and equipment necessary to provide these services to its customers.

*Accounting Period.* Our fiscal year ends on the last Saturday in January. As a result, each fiscal year consists of either 52 weeks or 53 weeks of operations (with the additional week of operations occurring in the fourth quarter). Fiscal 2026 consisted of 53 weeks while fiscal 2025 and fiscal 2024 each consisted of 52 weeks of operations.

The accompanying consolidated financial statements of the Company and its subsidiaries, all of which are wholly-owned, have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”). In the opinion of management, all adjustments considered necessary for a fair presentation of such statements have been included. This includes all normal and recurring adjustments and elimination of intercompany accounts and transactions.

*Segment Information.* The Company operates in two reportable segments, Communications and Building Systems and services are provided on a decentralized basis. Each operating segment consists of a subsidiary (or in certain instances, the combination of two or more subsidiaries), whose results are regularly reviewed by the Company’s Chief Executive Officer, the chief operating decision maker (“CODM”). All of the Company’s Communications operating segments have been aggregated into one reportable segment based on their similar economic characteristics, nature of services and production processes, type of customers, and service distribution methods. During fiscal 2026, following the acquisition of Power Solutions, the CODM reevaluated the Company’s reportable segments, which resulted in the addition of the Building Systems segment as a component of management’s internal financial information used for operational decision-making. Beginning in fiscal 2026, the Company reports the results of the Building Systems segment separately as a reportable segment. The Building Systems segment specializes in providing comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities. See Note 21, *Segment Reporting*, for additional information.

### ***2. Significant Accounting Policies and Estimates***

*Use of Estimates.* The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the amounts reported in these consolidated financial statements and accompanying notes. These key estimates include: the recognition of revenue under the cost-to-cost method of progress, accrued insurance claims, the allowance for credit losses, accruals for contingencies, stock-based compensation expense for performance-based stock awards, the fair value of reporting units for the goodwill impairment analysis, the assessment of impairment of intangibles and other long-lived assets, the purchase price allocations of businesses acquired, and income taxes. These estimates are based on our historical experience and management’s understanding of current facts and circumstances. At the time they are made, we believe that such estimates are fair when considered in conjunction with the Company’s consolidated financial position and results of operations taken as a whole. However, actual results could differ materially from those estimates.

*Revenue Recognition.* We perform a significant amount of our services under master service agreements and other contracts that contain customer-specified service requirements. These agreements include discrete pricing for individual tasks including, for example, the placement of underground or aerial fiber, directional boring, and fiber splicing, each based on a specific unit of measure. A contractual agreement exists when each party involved approves and commits to the agreement, the rights of the parties and payment terms are identified, the agreement has commercial substance, and collectability of consideration is probable. Our services are performed for the sole benefit of our customers, whereby the assets being created or maintained are controlled by the customer and the services we perform do not have alternative benefits for us. Contract revenue is recognized over time as services are performed and customers simultaneously receive and consume the benefits we provide. Output measures, such as units delivered, are utilized to assess progress against specific contractual performance obligations for

the majority of our services. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the services to be provided. For us, the output method using units delivered best represents the measure of progress against the performance obligations incorporated within the contractual agreements. This method captures the amount of units delivered pursuant to contracts and is used only when our performance does not produce significant amounts of work in process prior to complete satisfaction of the performance obligation. For a portion of contract items, units to be completed consist of multiple tasks. For these items, the transaction price is allocated to each task based on relative standalone measurements, such as selling prices for similar tasks, or in the alternative, the cost to perform the tasks. Contract revenue is recognized as the tasks are completed as a measurement of progress in the satisfaction of the corresponding performance obligation.

For certain contracts, representing less than 5% of contract revenues during fiscal 2026, fiscal 2025, and fiscal 2024, we use the cost-to-cost measure of progress. These contracts are generally projects that are completed over a period 12 months or less and for which payment may be received based on project milestones or in a lump sum at the end of the project. Under the cost-to-cost measure of progress, the extent of progress toward completion is measured based on the ratio of costs incurred to date to the total estimated costs. Contract costs include direct labor, direct materials, and subcontractor costs, as well as an allocation of indirect costs. Contract revenues are recorded as costs are incurred.

We accrue the entire amount of a contract loss, if any, at the time the loss is determined to be probable and can be reasonably estimated. There were no material amounts of unapproved change orders or claims recognized during fiscal 2026, fiscal 2025, and fiscal 2024.

*Accounts Receivable, net.* We grant credit to our customers, generally without collateral, under normal payment terms (typically 30 to 90 days after invoicing). Generally, invoicing occurs within 45 days after the related services are performed. Accounts receivable represents an unconditional right to consideration arising from our performance under contracts with customers. Accounts receivable include billed accounts receivable, unbilled accounts receivable, and retainage. The carrying value of such receivables, net of the allowance for credit losses, represents their estimated realizable value. Unbilled accounts receivable represent amounts we have an unconditional right to receive payment for that will be billed at a later date due to administrative requirements in the billing processes specified by our customers. Certain of our contracts contain retainage provisions whereby a portion of the revenue earned is withheld from payment as a form of security until contractual provisions are satisfied. The collectability of retainage is included in our overall assessment of the collectability of accounts receivable. We expect to collect the outstanding balance of current accounts receivable, net (including trade accounts receivable, unbilled accounts receivable, and retainage) within the next 12 months. We estimate our allowance for credit losses by evaluating specific accounts receivable balances based on historical collection trends, the age of outstanding receivables, and the credit worthiness of our customers.

We participate in a customer-sponsored vendor payment program for one of our customers. All eligible accounts receivable from this customer are included in the program and payment is received pursuant to a non-recourse sale to a bank partner of the customer. This program effectively reduces the time to collect these receivables as compared to that customer's standard payment terms. We incur a discount fee to the bank on the payments received that is reflected as an expense component in other income, net, in the consolidated statements of operations.

*Contract Assets.* Contract assets include unbilled amounts typically resulting from arrangements whereby complete satisfaction of a performance obligation and the right to payment are conditioned on completing additional tasks or services.

*Contract Liabilities.* Contract liabilities consist of amounts invoiced to customers in excess of revenue recognized. Our contract assets and liabilities are reported in a net position on a contract by contract basis at the end of each reporting period. As of January 31, 2026 and January 25, 2025, the contract liabilities balance is classified as current based on the timing of when we expect to complete the tasks required for the recognition of revenue and contract completion.

*Cash and Equivalents.* Cash and equivalents primarily include balances on deposit in banks. We maintain our cash and equivalents at financial institutions we believe to be of high credit quality. To date, we have not experienced any loss or lack of access to cash in our operating accounts.

*Inventories.* Inventories consist of materials and supplies used in the ordinary course of business and are carried at the lower of cost (using the first-in, first-out method) or net realizable value. Inventories also include certain job specific materials that are valued using the specific identification method. For contracts where we are required to supply part or all of the materials on behalf of a customer, the loss of a customer or declines in contract volumes could result in an impairment of the value of materials purchased.

*Property and Equipment.* Property and equipment are stated at cost and depreciated on a straight-line basis over their estimated useful lives (see Note 9, *Property and Equipment*, for the range of useful lives). Leasehold improvements are depreciated on a straight-line basis over the lesser of the estimated useful life of the asset or the remaining lease term. Maintenance and repairs are expensed as incurred and major improvements are capitalized. When assets are sold or retired, the cost and related accumulated depreciation are removed from the accounts and the resulting gain or loss is included in other income. Capitalized software consists primarily of costs to purchase and develop internal-use software and is amortized over its useful life as a component of depreciation expense. Property and equipment includes internally developed capitalized computer software at net book value of \$12.7 million and \$14.3 million as of January 31, 2026 and January 25, 2025, respectively.

*Leases.* Our leases are accounted for as operating leases, with lease expense recognized on a straight-line basis over the lease term. The lease term may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option. For leases with initial terms greater than 12 months, we record operating lease right-of-use assets and corresponding operating lease liabilities. Operating lease right-of-use assets represent our right to use the underlying asset for the lease term and operating lease liabilities represent our obligation to make the related lease payments. These assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. As our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. Leases with an initial term of 12 months or less are not recorded on our consolidated balance sheet.

*Goodwill and Intangible Assets.* Goodwill and other indefinite-lived intangible assets are assessed annually for impairment as of the first day of the fourth fiscal quarter of each year, or more frequently if events occur that would indicate a potential reduction in the fair value of a reporting unit below its carrying value. We perform our annual impairment review of goodwill at the reporting unit level. Each of our operating segments with goodwill represents a reporting unit for the purpose of assessing impairment. If we determine the fair value of the reporting unit's goodwill or other indefinite-lived intangible assets is less than their carrying value as a result of an annual or interim test, an impairment loss is recognized and reflected in operating income or loss in the consolidated statements of operations during the period incurred.

We review finite-lived intangible assets for impairment whenever an event occurs or circumstances change that indicate that the carrying amount of such assets may not be fully recoverable. Recoverability is determined based on an estimate of undiscounted future cash flows resulting from the use of an asset and its eventual disposition. If an asset is not recoverable, an impairment loss is measured by comparing the fair value of the asset to its carrying value. If we determine the fair value of an asset is less than the carrying value, an impairment loss is recognized in operating income or loss in the consolidated statements of operations during the period incurred.

We use judgment in assessing whether goodwill and intangible assets are impaired. Estimates of fair value are based on our projection of revenues, operating costs, and cash flows taking into consideration historical and anticipated future results, general economic and market conditions, as well as the impact of planned business or operational strategies. We determine the fair value of our reporting units using a weighing of fair values derived in equal proportions from the income approach and market approach valuation methodologies. The income approach uses the discounted cash flow method and the market approach uses the guideline company method. Changes in our judgments and projections could result in significantly different estimates of fair value, potentially resulting in impairments of goodwill and other intangible assets. The inputs used for fair value measurements of the reporting units and other related indefinite-lived intangible assets are the lowest level (Level 3) inputs. See Note 10, *Goodwill and Intangible Assets*, for additional information regarding our annual assessment of goodwill and other indefinite-lived intangible assets.

*Implementation Costs – Cloud Computing Arrangements.* In accordance with ASU 2018-15, Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract, which amends ASC 350-40, Internal-Use Software, to the extent costs incurred in a cloud computing arrangement are capitalizable, the corresponding costs are recorded in other assets and the related amortization is included in general and administrative expense in the consolidated statements of operations. The amount of capitalized cloud computing implementation costs included in other non-current assets was \$61.7 million and \$29.8 million as of January 31, 2026 and January 25, 2025, respectively. The amortization of capitalized implementation costs related to cloud computing arrangements was \$2.4 million and \$1.7 million during fiscal 2026 and fiscal 2025.

*Long-Lived Tangible Assets.* We review long-lived tangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of an asset group and its eventual disposition. Measurement of an impairment loss is based on the fair value of the asset compared to its carrying value. Long-lived tangible assets to be disposed of are reported at the lower of their carrying amount or fair value less costs to sell.

*Accrued Insurance Claims.* For claims within our insurance program, we retain the risk of loss, up to certain limits, for matters related to automobile liability, general liability (including damages associated with underground facility locating services), workers' compensation, and employee group health. Additionally, within our aggregate coverage limits and above our base layer of third-party insurance coverage, we have retained the risk of loss at certain levels of exposure. Our Building Systems segment is fully insured for these risks through third-party insurance policies, and we do not retain the risk of loss for claims related to those operations. We have established reserves that we believe to be adequate based on current evaluations and our experience with these types of claims. A liability for unpaid claims and the associated claim expenses, including incurred but not reported losses, is determined with the assistance of an actuary and reflected in the consolidated financial statements as accrued insurance claims. The effect on our financial statements is generally limited to the amount needed to satisfy our insurance deductibles or retentions.

We estimate the liability for claims based on facts, circumstances, and historical experience. Even though they will not be paid until sometime in the future, recorded loss reserves are not discounted. Factors affecting the determination of the expected cost for existing and incurred but not reported claims include, but are not limited to, the magnitude and quantity of future claims, the payment pattern of claims which have been incurred, changes in the medical condition of claimants, and other factors such as inflation, tort reform or other legislative changes, unfavorable jury decisions and court interpretations.

*Income Taxes.* We account for income taxes under the asset and liability method. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Measurement of our tax position is based on the applicable statutes, federal and state case law, and our interpretations of tax regulations. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income during the period that includes the enactment date. We record net deferred tax assets to the extent we believe these assets will more likely than not be realized. In making such determination, we consider all relevant factors, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies and recent financial operations. In the event we determine that we would be able to realize deferred income tax assets in excess of their net recorded amount, we would adjust the valuation allowance, which would reduce the provision for income taxes.

We recognize tax benefits in the amount that we deem, more likely than not, will be realized upon ultimate settlement of any tax uncertainty. Tax positions that fail to qualify for recognition are recognized during the period in which the more-likely-than-not standard has been reached, when the tax positions are resolved with the respective taxing authority or when the statute of limitations for tax examination has expired. We recognize applicable interest related to tax amounts in interest expense and penalties within general and administrative expenses.

We believe our provision for income taxes is adequate; however, any assessment would affect our results of operations and cash flows. With few exceptions, we are no longer subject to U.S. federal, state and local, or Canadian income tax examinations for fiscal years ended 2018 and prior.

*Per Share Data.* Basic earnings per common share is computed based on the weighted average number of common shares outstanding during the period, excluding unvested restricted share units. Diluted earnings per common share includes the weighted average number of common shares outstanding during the period and dilutive potential common shares arising from our stock-based awards (including unvested restricted share units), convertible senior notes, and warrants if their inclusion is dilutive under the treasury stock method. Common stock equivalents related to stock-based awards are excluded from diluted earnings per common share calculations if their effect would be anti-dilutive.

*Stock-Based Compensation.* We have stock-based compensation plans under which we grant stock-based awards, including stock options, time-based restricted share units ("RSUs"), and performance-based restricted share units ("Performance RSUs") to attract, retain, and reward talented employees, officers, and directors, and to align stockholder and employee interests. The resulting compensation expense is recognized on a straight-line basis over the vesting period, net of actual forfeitures, and is included in general and administrative expenses in the consolidated statements of operations. This expense fluctuates over time as a result of the vesting periods of the stock-based awards and, for our Performance RSUs, the expected achievement of performance measures.

Compensation expense for stock-based awards is based on fair value at the measurement date. The fair value of stock options is estimated on the date of grant using the Black-Scholes option pricing model. This valuation is affected by our stock price as well as other inputs, including the expected common stock price volatility over the expected life of the options, the expected term of the stock option, risk-free interest rates, and expected dividends, if any. Stock options vest ratably over a four-year period and are exercisable over a period of up to ten years. The fair value of RSUs and Performance RSUs is estimated on

the date of grant and is equal to the closing market price per share of our common stock on that date. RSUs generally vest ratably over a three-year period starting in fiscal 2026 and prior grants vested ratably over a four-year period. Performance RSUs vest ratably over a three-year period, if certain performance measures are achieved. Each RSU and Performance RSU is settled in one share of the Company's common stock upon vesting.

For Performance RSUs, we evaluate compensation expense quarterly and recognize expense only if we determine it is probable that the performance measures for the awards will be met. The performance measures for target awards are based on our operating earnings (adjusted for certain amounts) as a percentage of contract revenues and our operating cash flow level (adjusted for certain amounts) for the applicable four-quarter performance period. Additionally, certain awards include three-year performance measures that are more difficult to achieve than those required to earn target awards and, if met, result in supplemental shares awarded. The performance measures for supplemental awards are based on three-year cumulative operating earnings (adjusted for certain amounts) as a percentage of contract revenues and three-year cumulative operating cash flow level (adjusted for certain amounts). In a period we determine it is no longer probable that we will achieve certain performance measures for the awards, we reverse the stock-based compensation expense that we had previously recognized and associated with the portion of Performance RSUs that are no longer expected to vest. The amount of the expense ultimately recognized depends on the number of awards that actually vest. Accordingly, stock-based compensation expense may vary from period to period. For additional information on our stock-based compensation plans, stock options, RSUs, and Performance RSUs, see Note 19, *Stock-Based Awards*.

*Contingencies and Litigation.* In the ordinary course of our business, we are involved in certain legal proceedings and other claims, including claims for indemnification by our customers. In determining whether a loss should be accrued, we evaluate, among other factors, the probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. If only a range of probable loss can be determined, we accrue for our best estimate within the range for the contingency. In those cases where none of the estimates within the range is better than another, we accrue for the amount representing the low end of the range. As additional information becomes available, we reassess the potential liability related to our pending litigation and other contingencies and revise our estimates as applicable. Revisions of our estimates of the potential liability could materially impact our results of operations. Additionally, if the final outcome of such litigation and contingencies differs adversely from that currently expected, it would result in a charge to operating results when determined.

*Business Combinations.* We account for business combinations under the acquisition method of accounting. The purchase price of each business acquired is allocated to the tangible and intangible assets acquired and the liabilities assumed based on information regarding their respective fair values on the date of acquisition. Any excess of the purchase price over the fair value of the separately identifiable assets acquired and the liabilities assumed is allocated to goodwill. We determines the fair values used in purchase price allocations for intangible assets based on historical data, estimated discounted future cash flows, expected royalty rates for trademarks and trade names, as well as certain other information. The valuation of assets acquired and liabilities assumed requires a number of judgments and is subject to revision as additional information about the fair value of assets and liabilities becomes available. Additional information, which existed as of the acquisition date but unknown to us at that time, may become known during the remainder of the measurement period. This measurement period may not exceed 12 months from the acquisition date. We will recognize any adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustments are determined. Additionally, in the same period in which adjustments are recognized, we will record the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of any change to the provisional amounts, calculated as if the accounting adjustment had been completed at the acquisition date. Acquisition costs are expensed as incurred. The results of operations of businesses acquired are included in the consolidated financial statements from their dates of acquisition.

*Fair Value of Financial Instruments.* Our financial instruments primarily consist of cash and equivalents, restricted cash, accounts receivable, income taxes receivable and payable, accounts payable, certain accrued expenses, and long-term debt. The carrying amounts of these items approximate fair value due to their short maturity, except for the fair value of our long-term debt, which is based on observable market-based inputs (Level 2). See Note 14, *Debt*, for further information regarding the fair value of such financial instruments. Our cash and equivalents are based on quoted market prices in active markets for identical assets (Level 1) as of January 31, 2026 and January 25, 2025. During fiscal 2026, fiscal 2025, and fiscal 2024 we had no material nonrecurring fair value measurements of assets or liabilities subsequent to their initial recognition.

*Taxes Collected from Customers.* ASC Topic 606, *Taxes Collected from Customers and Remitted to Governmental Authorities*, addresses the income statement presentation of any taxes collected from customers and remitted to a government authority and provides that the presentation of taxes on either a gross basis or a net basis is an accounting policy decision that should be disclosed. Our policy is to present contract revenues net of sales taxes.

*Reclassification.* Certain prior year amounts in Note 13, Other Accrued Liabilities, have been reclassified for consistency with the current year presentation. These reclassifications had no effect on the total reported amount of other accrued liabilities or on the reported results of operations.

### **3. Accounting Standards**

#### **Recently Adopted Accounting Standards**

*Income Taxes: Improvements to Income Tax Disclosures.* In December 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. The ASU requires entities to disclose disaggregated information about their effective tax rate reconciliation, as well as expanded information on income taxes paid by jurisdiction. We adopted the provisions of ASU 2023-09 in the fourth quarter of fiscal 2026, on a prospective basis, which resulted in incremental disclosure in the notes to our consolidated financial statements. See Note 15, *Income Taxes*. The adoption of the provisions of ASU 2023-09 did not impact our financial position or results of operations.

#### **Accounting Standards Not Yet Adopted**

*Income Statement-Reporting Comprehensive Income-Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses.* In November 2024, the FASB issued ASU 2024-03, Income Statement (Subtopic 220-40): Disaggregation of Income Statement Expenses. This ASU requires public entities to disclose, in the notes to the financial statements, specified information about certain costs and expenses at each interim and annual reporting period. In January 2025, the FASB issued ASU 2025-01, Income Statements (Subtopic 220-40): Clarifying the Effective Date. This ASU is effective for annual reporting periods beginning after December 15, 2026, and interim periods beginning after December 15, 2027, with early adoption permitted. We are currently evaluating the impact of the standard on our condensed consolidated financial statements.

*Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Targeted Improvements to the Accounting for Internal-Use Software.* In September 2025, the FASB issued ASU 2025-06, Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Targeted Improvements to the Accounting for Internal-Use Software. The ASU modernizes the approach for internal-use software by eliminating the previous stage-based capitalization model so that the guidance is neutral to different software development projects. Entities may apply the guidance using a prospective, retrospective or modified transition approach. ASU 2025-06 is effective for fiscal years beginning after December 15, 2027. We are currently evaluating the impact of the standard on our condensed consolidated financial statements.

Other pronouncements issued by the FASB or other authoritative accounting standards groups with future effective dates are either not applicable or are not expected to be significant to Dycom's financial position, results of operations or cash flows.

#### 4. Computation of Earnings per Common Share

The following table sets forth the computation of basic and diluted earnings per common share (dollars in thousands, except per share amounts):

	Fiscal Year Ended		
	January 31, 2026	January 25, 2025	January 27, 2024
Net income available to common stockholders (numerator)	\$ 281,189	\$ 233,413	\$ 218,923
Weighted-average number of common shares (denominator)	29,055,087	29,112,573	29,333,054
Basic earnings per common share	\$ 9.68	\$ 8.02	\$ 7.46
Weighted-average number of common shares	29,055,087	29,112,573	29,333,054
Potential shares of common stock arising from stock options and unvested restricted share units	368,252	369,218	365,872
Total shares-diluted (denominator)	29,423,339	29,481,791	29,698,926
Diluted earnings per common share	\$ 9.56	\$ 7.92	\$ 7.37
Anti-dilutive weighted shares excluded from the calculation of earnings per common share	163,281	168,099	167,914

#### 5. Acquisitions

*Fiscal 2026.* During the fourth quarter of fiscal 2026, we acquired Power Solutions, LLC (“Power Solutions”), a company that provides comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities in the Greater Washington D.C., Maryland, and Virginia area. This acquisition expands our service offerings and our customer base. The purchase price was valued at \$1.95 billion as of the signing of the acquisition on a cash-free, debt-free basis. The value is subject to post-closing adjustment, including the final determination of cash, indebtedness and working capital balances. At the closing date, the funding of the acquisition included a cash payment of \$1,644.9 million (\$1,628.6 million net of cash acquired of \$16.3 million), the issuance of 1,011,069 shares of Dycom common stock to the sellers valued at \$351.0 million, and the assumption of seller indebtedness of \$64.8 million. Total consideration was \$1,995.9 million. The acquisition of Power Solutions resulted in the addition of a new operating segment which is also a new reportable segment – Building Systems. For additional information on our reportable segments, see Note 21, *Segment Reporting*.

*Fiscal 2025.* During the third quarter of fiscal 2025, we acquired certain assets and assumed certain liabilities of a telecommunications construction contractor for a cash purchase price of \$150.7 million. The acquired business provides wireless construction services for telecommunications providers in various states. This acquisition expands our geographic presence within our existing customer base.

During the second quarter of fiscal 2025, we acquired a telecommunications construction contractor for a total purchase price of \$24.5 million (\$20.4 million purchase price plus cash acquired of \$4.1 million). The acquired company is located in the northwestern United States and provides construction and maintenance services to telecommunications providers, with the majority of its revenues generated in Alaska. This acquisition expands our geographic presence and our customer base.

During the first quarter of fiscal 2025, we acquired a telecommunications construction contractor for \$16.0 million (\$12.8 million purchase price, plus cash acquired of \$3.2 million). The acquired company provides construction and maintenance services for telecommunications providers in the midwestern United States. This acquisition expands our geographic presence within our existing customer base.

*Fiscal 2024.* During August 2023, we acquired Bigham Cable Construction, Inc. (“Bigham”), for \$131.2 million (\$127.0 million fixed purchase price, plus cash acquired of \$8.3 million, less indebtedness of \$4.1 million). Bigham provides construction and maintenance services for telecommunications providers in the southeastern United States. This acquisition expands our geographic presence within our existing customer base.

#### *Purchase Price Allocations*

The purchase price allocation of the company acquired in fiscal 2026 is preliminary and will be completed when valuations for intangible assets and other amounts are finalized within the 12-month measurement period from the respective date of acquisition.

The following table summarizes the aggregate consideration paid and the estimated fair value of assets acquired and liabilities assumed for each of the acquisitions described above as of the respective acquisition dates (dollars in millions):

	<b>Fiscal 2026</b>	<b>Fiscal 2025</b>	<b>Fiscal 2024</b>
<b>Assets</b>			
Cash and equivalents	\$ 16.3	\$ 7.3	\$ 8.3
Accounts receivable	324.2	19.1	45.8
Contract assets	18.9	—	—
Inventories	—	12.7	—
Other current assets	1.8	0.2	0.3
Property and equipment	8.4	8.3	9.9
Goodwill	1,110.8	20.9	39.2
Intangible assets	775.0	142.2	42.2
Other assets	16.9	4.0	0.8
Total assets	<u>2,272.3</u>	<u>214.7</u>	<u>146.5</u>
<b>Liabilities</b>			
Accounts payable	56.4	12.6	8.3
Contract liabilities	116.2	—	—
Other accrued liabilities	89.2	7.8	2.6
Income taxes payable	—	—	4.4
Other liabilities	14.6	3.1	—
Total liabilities	<u>276.4</u>	<u>23.5</u>	<u>15.3</u>
<b>Net Assets Acquired</b>	<u><u>\$ 1,995.9</u></u>	<u><u>\$ 191.2</u></u>	<u><u>\$ 131.2</u></u>

The excess purchase price over the estimated fair value of the net assets acquired was recognized as goodwill. Goodwill and intangible assets total \$1,885.8 million, \$163.1 million, and \$81.4 million for the 2026 acquisition, 2025 acquisitions, and 2024 acquisition, respectively, and are deductible for tax purposes. Accounts receivable, contract assets (liabilities), and current liabilities were either stated at their historical carrying values, which approximate fair value given the short-term nature of these assets and liabilities or were stated at their fair values based on an evaluation of the current market value of such assets and liabilities. The estimate of fair value for inventories and fixed assets was based on an assessment of acquired assets' condition as well as an evaluation of the current market value of such assets.

The Company recorded intangible assets based on its estimate of fair value which consisted of the following (dollars in millions):

	<u>Estimated Useful Life (in years)</u>	<u>Intangible Assets Acquired in fiscal 2026</u>	<u>Intangible Assets Acquired in fiscal 2025</u>	<u>Intangible Assets Acquired in fiscal 2024</u>
Customer relationships	12 - 15	\$ 580.0	\$ 114.3	\$ 26.8
Backlog intangibles	0.8 - 3	155.0	26.8	11.6
Trade names	10 - 15	40.0	1.1	3.8
<b>Total intangible assets acquired</b>		<u>\$ 775.0</u>	<u>\$ 142.2</u>	<u>\$ 42.2</u>

The valuation of intangible assets was determined using the income approach methodology. More specifically, the fair values of the customer relationships and the backlog intangibles were estimated using the multi-period excess earnings method, while the trade name was estimated using the relief-from-royalty method. Significant judgments and assumptions used in estimating management's cash flow projections included projected revenue growth rates, profit margins, discount rates, customer attrition rates and royalty rates among others. The projected future cash flows are discounted to present value using an appropriate discount rate.

Results of the businesses acquired are included in the condensed consolidated financial statements from the date of acquisition. The results from the businesses acquired in fiscal 2025 and fiscal 2024 were not considered material to the Company's condensed consolidated financial statements. The business acquired in fiscal 2026 represents the newly formed Building Systems reportable segment. For additional information on our reportable segments, including the results of the Building Systems segment, see Note 21, *Segment Reporting*.

The pro forma results for the acquisitions completed during fiscal 2025 and 2024 have been excluded as their impact was not material to the Company's consolidated financial statements. The following unaudited supplemental pro forma results of operations for the Company, which incorporate the acquisition completed in fiscal 2026, have been provided for illustrative purposes only and may not be indicative of the actual results that would have been achieved by the combined companies for the periods presented or that may be achieved by the combined companies in the future (dollars in thousands).

	<u>Fiscal Year Ended</u>	
	<u>January 31, 2026</u>	<u>January 25, 2025</u>
Contract revenues	\$ 6,518,638	\$ 5,448,286
Net income <sup>(1)</sup>	250,831	115,154

<sup>(1)</sup> The pro forma combined results of operations for the fiscal year ended January 31, 2026 include one-time acquisition-related expenses of \$41.0 million (\$30.3 million net of tax) for pre-acquisition transaction costs incurred by Power Solutions and acquisition costs of \$18.8 million (\$14.0 million, net of tax) incurred by Dycom in connection with the acquisition. In addition, fiscal 2026 included 53 weeks of operations, whereas fiscal 2025 included 52 weeks.

The pro forma combined results of operations for the fiscal years ended January 31, 2026 and January 25, 2025 were prepared by adjusting the historical results of Dycom to include the historical results of the business acquired in fiscal 2026 as if such acquisition had occurred January 28, 2024. These pro forma combined historical results were adjusted for the following: an increase in interest and other financing expenses as a result of the debt incurred by Dycom for the purpose of financing the acquisition of Power Solutions and cash consideration paid for the acquired business and an increase in amortization expense due to the intangible assets recorded. The pro forma combined results of operations do not include any adjustments to eliminate the impact of acquisition-related costs incurred by Dycom or the acquired business or any cost savings or other synergies that resulted or may result from the acquisitions.

## 6. Accounts Receivable, Contract Assets, and Contract Liabilities

The following provides further details on the balance sheet accounts of accounts receivable, net; contract assets; and contract liabilities. See Note 2, *Significant Accounting Policies and Estimates*, for further information on our policies related to these balance sheet accounts, as well as our revenue recognition policies.

### Accounts Receivable

Accounts receivable, net, classified as current, consisted of the following (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Trade accounts receivable	\$ 699,904	\$ 538,475
Unbilled accounts receivable	880,364	801,423
Retainage	119,321	34,934
Total	1,699,589	1,374,832
Less: allowance for credit losses	(2,616)	(1,094)
Accounts receivable, net	<u>\$ 1,696,973</u>	<u>\$ 1,373,738</u>

We maintain an allowance for estimated losses on uncollected balances. The allowance for credit losses changed as follows (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Allowance for credit losses at beginning of period	\$ 1,094	\$ 2,776
Provision for (recovery of) bad debt	1,633	(1,184)
Amounts charged against the allowance	(111)	(498)
Allowance for credit losses at end of period	<u>\$ 2,616</u>	<u>\$ 1,094</u>

### Contract Assets and Contract Liabilities

Net contract liabilities consisted of the following (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Contract assets	\$ 162,327	\$ 63,375
Contract liabilities	158,503	73,548
Contract assets (liabilities), net	<u>\$ 3,824</u>	<u>\$ (10,173)</u>

The change in contract assets (liabilities), net, in fiscal 2026 from fiscal 2025 primarily resulted from increased services performed, net of billings, under contracts consisting of multiple tasks and the addition of balances from acquired companies. During fiscal 2026, we performed services and recognized \$41.2 million of contract revenues related to contract liabilities that existed at January 25, 2025.

## Customer Credit Concentration

Customers whose combined amounts of accounts receivable and contract assets (liabilities), net exceeded 10% of total combined accounts receivable and contract assets (liabilities), net as of January 31, 2026 or January 25, 2025 were as follows (dollars in millions):

	Fiscal Year Ended			
	January 31, 2026		January 25, 2025	
	Amount	% of Total	Amount	% of Total
Lumen Technologies <sup>(1)</sup>	\$ 259.0	15.2 %	\$ 287.1	21.1 %
Charter Communications	\$ 246.4	14.5 %	\$ 158.9	11.7 %
Verizon Communications <sup>(2)</sup>	\$ 173.6	10.2 %	\$ 117.0	8.6 %

<sup>(1)</sup> On February 2, 2026, AT&T Inc. completed its acquisition of substantially all of the mass markets fiber business from Lumen Technologies Inc. Since this transaction occurred subsequent to fiscal 2026, we have continued to report amounts for the mass markets fiber business under Lumen Technologies Inc.

<sup>(2)</sup> On January 20, 2026, Verizon Communications, Inc. completed its acquisition of Frontier Communications Corporation. As a result, amounts reported for Verizon Communications, Inc. include the respective balances for Frontier Communications Corporation retrospectively for all periods presented.

We believe that none of our significant customers were experiencing financial difficulties that would materially impact the collectability of our total accounts receivable and contract assets (liabilities), net, as of January 31, 2026 or January 25, 2025.

### 7. Other Current Assets and Other Assets

Other current assets consisted of the following (dollars in thousands):

	January 31, 2026	January 25, 2025
Prepaid expenses	\$ 27,764	\$ 20,688
Deposits and other current assets	11,021	11,332
Restricted cash	1,372	1,372
Receivables on equipment sales	55	1,237
Other current assets	\$ 40,212	\$ 34,629

Other assets consisted of the following (dollars in thousands):

	January 31, 2026	January 25, 2025
Capitalized cloud computing implementation costs	\$ 61,678	\$ 29,844
Deferred financing costs	10,576	4,945
Insurance recoveries/receivables for accrued insurance claims	8,570	3,343
Restricted cash	332	432
Other non-current assets	26,724	8,025
Other assets	\$ 107,880	\$ 46,589

Amortization of capitalized cloud computing implementation costs that are included in general and administrative expense was \$2.4 million and \$1.7 million for the fiscal years ended January 31, 2026 and January 25, 2025, respectively. See Note 11, *Accrued Insurance Claims*, for information on our Insurance recoveries/receivables.

### 8. Cash and Equivalents and Restricted Cash

Amounts of cash, cash equivalents and restricted cash reported in the consolidated statement of cash flows consisted of the following (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Cash and equivalents	\$ 709,165	\$ 92,670
Restricted cash included in:		
Other current assets	1,372	1,372
Other assets (long-term)	332	432
Cash, cash equivalents and restricted cash	<u>\$ 710,869</u>	<u>\$ 94,474</u>

## 9. Property and Equipment

Property and equipment consisted of the following (dollars in thousands):

	<b>Estimated Useful Lives (Years)</b>	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Land	—	\$ 8,471	\$ 8,419
Buildings	10-35	25,005	19,851
Leasehold improvements	1-10	26,706	27,685
Vehicles	1-5	1,008,988	932,209
Equipment and machinery	1-10	467,666	448,368
Computer hardware and software	1-7	142,881	136,190
Office furniture and equipment	1-10	8,137	12,285
Total		1,687,854	1,585,007
Less: accumulated depreciation		(1,112,478)	(1,043,086)
Property and equipment, net		<u>\$ 575,376</u>	<u>\$ 541,921</u>

Depreciation expense and repairs and maintenance expense were as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Depreciation expense	\$ 200,769	\$ 167,203	\$ 143,280
Repairs and maintenance expense	\$ 78,981	\$ 72,545	\$ 68,006

## 10. Goodwill and Intangible Assets

### Goodwill

The Company's goodwill balance was \$1,443.4 million and \$330.3 million as of January 31, 2026 and January 25, 2025, respectively. Changes in the carrying amount of goodwill during fiscal 2026 and fiscal 2025 were as follows (dollars in thousands):

	<b>Communications</b>	<b>Building Systems</b>	<b>Total</b>
Balance as of January 27, 2024	\$ 311,991	\$ —	\$ 311,991
Goodwill adjustment from fiscal 2024 acquisition	(244)	—	(244)
Goodwill from fiscal 2025 acquisition	18,583	—	18,583
Balance as of January 25, 2025	330,330	—	330,330
Goodwill adjustment from fiscal 2025 acquisitions	2,315	—	2,315
Goodwill from fiscal 2026 acquisition	—	1,110,790	1,110,790
Balance as of January 31, 2026	<u>\$ 332,645</u>	<u>\$ 1,110,790</u>	<u>\$ 1,443,435</u>

The aggregate goodwill balance as of January 31, 2026 and January 25, 2025 includes \$249.0 million of accumulated impairment charges all of which relate to the Communications segment.

The Company's goodwill resides in multiple reporting units and primarily consists of expected synergies, together with the expansion of our geographic presence and service offerings, and the strengthening and expansion of our customer base from acquisitions. The profitability of individual reporting units may suffer periodically due to downturns in customer demand, increased costs of providing services, and the level of overall economic activity. Our customers may reduce capital expenditures and defer or cancel pending projects due to changes in technology, a slowing or uncertain economy, merger or acquisition activity, a decision to allocate resources to other areas of their business, or other reasons. The profitability of reporting units may also suffer if actual costs of providing services exceed the costs anticipated when the Company enters into contracts. Additionally, adverse conditions in the economy and future volatility in the equity and credit markets could impact the valuation of our reporting units. The cyclical nature of our business, the high level of competition existing within our industry, and the concentration of our revenues from a limited number of customers may also cause results to vary. These factors may affect individual reporting units disproportionately, relative to the Company as a whole. As a result, the performance of one or more of the reporting units could decline, resulting in an impairment of goodwill or intangible assets.

We evaluate current operating results, including any losses, in the assessment of goodwill and other intangible assets. The estimates and assumptions used in assessing the fair value of the reporting units and the valuation of the underlying assets and liabilities are inherently subject to significant uncertainties. Changes in judgments and estimates could result in significantly different estimates of the fair value of the reporting units and could result in impairments of goodwill or intangible assets of the reporting units. In addition, adverse changes to the key valuation assumptions contributing to the fair value of our reporting units could result in an impairment of goodwill or intangible assets.

The Company performs its annual goodwill assessment as of the first day of the fourth fiscal quarter of each fiscal year. Goodwill and indefinite lived intangible assets are required to be tested for impairment between annual tests if events occur that would indicate a potential reduction in the fair value of a reporting unit below its carrying value.

We performed our annual impairment assessment for fiscal 2026, fiscal 2025, and fiscal 2024, and concluded that no impairment of goodwill or the indefinite-lived intangible asset was indicated at any reporting unit for any of the periods. In each of these periods, qualitative assessments were performed on reporting units that comprise a significant portion of our consolidated goodwill balance. For the Company's indefinite-lived intangible asset we performed a qualitative assessment for fiscal 2026, fiscal 2025 and fiscal 2024. A qualitative assessment includes evaluating all identified events and circumstances that could affect the significant inputs used to determine the fair value of a reporting unit or indefinite-lived intangible asset for the purpose of determining whether it is more likely than not that these assets are impaired. We consider various factors while performing qualitative assessments, including macroeconomic conditions, industry and market conditions, financial performance of the reporting units, changes in market capitalization, and any other specific reporting unit considerations. These qualitative assessments indicated that it was more likely than not that the fair value exceeded carrying value for those reporting units. For the remaining reporting units, we performed the quantitative analysis described in ASC Topic 350 in each of these periods. When performing the quantitative analysis, we determine the fair value of our reporting units using an equal weighting of fair values derived from the income approach and market approach valuation methodologies. Under the income approach, the key valuation assumptions used in determining the fair value estimates of our reporting units for each annual test were: (a) expected cash flow for a period of seven years based on our best estimate of revenue growth rates and projected operating margins; (b) terminal value based upon terminal growth rates; and (c) a discount rate based on the Company's best estimate of the weighted average cost of capital adjusted for certain risks for the reporting units.

The table below outlines certain assumptions used in our annual quantitative impairment analyses for fiscal 2026, fiscal 2025, and fiscal 2024:

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Terminal Growth Rate	3%	2% - 3%	2.5%
Discount Rate	11.5%	10.5%	10.5%

The discount rate reflects risks inherent within each reporting unit operating individually. These risks are greater than the risks inherent in the Company as a whole. Determination of discount rates included consideration of market inputs such as the risk-free rate, equity risk premium, industry premium, and cost of debt, among other assumptions. The discount rate for fiscal 2026 increased compared to the rate used in fiscal 2025. The cost of equity increased as did the weighting for equity which resulted in an increase in the weighted average cost of capital compared to the prior year. We believe the assumptions used in

the impairment analysis each year are reflective of the risks inherent in the business models of our reporting units and our industry. Under the market approach, the guideline company method develops valuation multiples by comparing our reporting units to similar publicly traded companies. Key valuation assumptions used in determining the fair value estimates of our reporting units rely on: (a) the selection of similar companies and (b) the selection of valuation multiples as they apply to the reporting unit characteristics.

We determined that the fair values of each of the reporting units were in excess of their carrying values in the fiscal 2026 assessment. Management determined that significant changes were not likely in the factors considered to estimate fair value, and analyzed the impact of such changes were they to occur. Specifically, if the discount rate applied in the fiscal 2026 impairment analysis had been 100 basis points higher than estimated for each of the reporting units, and all other assumptions were held constant, the conclusion of the assessment would remain unchanged and there would be no impairment of goodwill. Additionally, if there was a 25% decrease in the fair value of any of the reporting units due to a decline in their discounted cash flows resulting from lower operating performance, the conclusion of the assessment would remain unchanged for all reporting units. Recent operating performance, along with assumptions for specific customer and industry opportunities, were considered in the key assumptions used during the fiscal 2026 impairment analysis. Management has determined the goodwill of the Company may have an increased likelihood of impairment if a prolonged downturn in customer demand were to occur, or if the reporting units were not able to execute against customer opportunities, and the long-term outlook for their cash flows were adversely impacted. Furthermore, changes in the long-term outlook may result in a change to other valuation assumptions. Factors monitored by management which could result in a change to the reporting units' estimates include the outcome of customer requests for proposals and subsequent awards, strategies of competitors, labor market conditions and levels of overall economic activity.

The Company determined that there were no events or changes in circumstances for the other reporting units or indefinite lived intangible assets during fiscal 2026 that would indicate a potential reduction in their fair value below their carrying amounts. As of January 31, 2026, the Company continues to believe the remaining goodwill and the indefinite-lived intangible asset are recoverable for all of its reporting units. However, if adverse events were to occur or circumstances were to change indicating that the carrying amount of such assets may not be fully recoverable, the assets would be reviewed for impairment and could be impaired. There can be no assurances that goodwill or the indefinite-lived intangible asset may not be impaired in future periods.

### Intangible Assets

Our intangible assets consisted of the following (dollars in thousands):

	January 31, 2026			January 25, 2025			
	Weighted Average Remaining Useful Lives (Years)	Gross Carrying Amount	Accumulated Amortization	Intangible Assets, Net	Gross Carrying Amount	Accumulated Amortization	Intangible Assets, Net
Customer relationships	13.6	\$1,032,417	\$ 306,094	\$ 726,323	\$ 452,417	\$ 270,210	\$ 182,207
Trade names, finite	14.2	54,080	10,178	43,902	14,080	9,293	4,787
Trade name, indefinite	—	4,700	—	4,700	4,700	—	4,700
Contract backlog	1.3	192,900	41,903	150,997	37,900	9,890	28,010
Non-compete agreement	1.8	75	49	26	75	33	42
		<u>\$1,284,172</u>	<u>\$ 358,224</u>	<u>\$ 925,948</u>	<u>\$ 509,172</u>	<u>\$ 289,426</u>	<u>\$ 219,746</u>

Amortization of our customer relationship intangibles and our backlog intangibles are recognized on an accelerated basis as a function of the expected economic benefit. Amortization of our other finite-lived intangibles is recognized on a straight-line basis over the estimated useful life. Amortization expense for finite-lived intangible assets was \$68.8 million, \$31.4 million, and \$19.8 million for fiscal 2026, fiscal 2025, and fiscal 2024, respectively.

As of January 31, 2026, total amortization expense for existing finite-lived intangible assets for the next five fiscal years and thereafter is as follows (dollars in thousands):

	<b>Amount</b>
2027	\$ 222,124
2028	128,621
2029	91,808
2030	91,335
2031	63,774
Thereafter	323,586
<b>Total</b>	<b>\$ 921,248</b>

As of January 31, 2026, we believe that the carrying amounts of our intangible assets are recoverable. However, if adverse events were to occur or circumstances were to change indicating that the carrying amount of such assets may not be fully recoverable, the assets would be reviewed for impairment and the assets could be impaired.

### **11. Accrued Insurance Claims**

For claims within our insurance program, we retain the risk of loss, up to certain annual stop-loss limits, for matters related to automobile liability, general liability (including damages associated with underground facility locating services), workers' compensation, and employee group health. Losses for claims beyond our retained risk of loss are covered by insurance up to our coverage limits. Our Building Systems segment is fully insured for these risks through third-party insurance policies, and we do not retain the risk of loss for claims related to those operations.

For workers' compensation losses during fiscal 2026, 2025, and 2024, we retained the risk of loss up to \$1.0 million on a per occurrence basis. This retention amount is applicable to all of the states in which we operate, except with respect to workers' compensation insurance in two states in which we participate in state-sponsored insurance funds.

For automobile liability and general liability losses during fiscal 2026, we retained the risk of loss up to \$2.0 million on a per-occurrence basis for the first \$5.0 million of insurance coverage. We also retained the risk of loss for the next \$5.0 million on a per-occurrence basis for losses between \$5.0 million and \$10.0 million, if any.

For automobile liability losses during fiscal 2025, we retained the risk of loss up to \$2.0 million on a per-occurrence basis for the first \$5.0 million of insurance coverage and we retained the risk of loss up to \$1.0 million for general liability losses during fiscal 2025. We also retained the risk of loss for the next \$5.0 million on a per-occurrence basis for losses between \$5.0 million and \$10 million, if any.

For automobile liability and general liability losses during fiscal 2024, we retained the risk of loss up to \$1.0 million on a per-occurrence basis for the first \$5.0 million of insurance coverage. We also retained the risk of loss for the next \$10.0 million risk of loss on a per occurrence basis for losses between \$5.0 million and \$15.0 million, if any, and we retained \$10.0 million risk of loss on a per occurrence basis for losses between \$30.0 million and \$40.0 million, if any.

We are party to a stop-loss agreement for losses under our employee group health plan. For calendar year 2026, we retain the risk of loss on an annual basis, up to the first \$750,000 of claims per participant. In calendar years 2025 and 2024, we retained the risk of loss on an annual basis, up to the first \$750,000 and \$700,000, respectively, of claims per participant.

Amounts for total accrued insurance claims and insurance recoveries/receivables are as follows (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Accrued insurance claims - current	\$ 47,594	\$ 46,686
Accrued insurance claims - non-current	57,977	49,836
<b>Accrued insurance claims</b>	<b>\$ 105,571</b>	<b>\$ 96,522</b>
Insurance recoveries/receivables:		
Non-current (included in Other assets)	8,570	3,343
<b>Insurance recoveries/receivables</b>	<b>\$ 8,570</b>	<b>\$ 3,343</b>

The liability for total accrued insurance claims included incurred but not reported losses of approximately \$56.3 million and \$47.9 million as of January 31, 2026 and January 25, 2025, respectively.

Insurance recoveries/receivables represent the amount of accrued insurance claims that are covered by insurance as the amounts exceed the Company's loss retention. During fiscal 2026, total insurance recoveries/receivables increased approximately \$5.2 million primarily as a result of additional claims that exceeded our loss retention. Accrued insurance claims increased by a corresponding amount.

## 12. Leases

We lease the majority of our office facilities as well as certain equipment, all of which are accounted for as operating leases. These leases have remaining terms ranging from less than 1 year to approximately 12 years. Some leases include options to extend the lease for up to 5 years and others include options to terminate.

The following table summarizes the components of lease cost recognized in the consolidated statement of operations for fiscal 2026 and fiscal 2025 (dollars in thousands):

	<b>Fiscal Year Ended</b>	
	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Lease cost under long-term operating leases	\$ 54,035	\$ 46,151
Lease cost under short-term operating leases	21,021	17,119
Variable lease cost under short-term and long-term operating leases <sup>(1)</sup>	5,697	3,725
Total lease cost	<u>\$ 80,753</u>	<u>\$ 66,995</u>

<sup>(1)</sup> Variable lease cost primarily includes insurance, maintenance, and other operating expenses related to our leased office facilities.

Our operating lease liabilities related to long-term operating leases were \$177.5 million and \$112.8 million as of January 31, 2026 and January 25, 2025, respectively. Supplemental balance sheet information related to these liabilities is as follows:

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Weighted average remaining lease term	6.0 years	4.6 years
Weighted average discount rate	5.8 %	5.8 %

Supplemental cash flow information related to our long-term operating lease liabilities as of January 31, 2026 and January 25, 2025 is as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>	
	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Cash paid for amounts included in the measurement of lease liabilities	\$ 46,289	\$ 41,574
Operating lease right-of-use assets obtained in exchange for operating lease liabilities	\$ 87,160	\$ 76,833

As of January 31, 2026, maturities of our lease liabilities under our long-term operating leases for the next five fiscal years and thereafter are as follows (dollars in thousands):

Fiscal Year	Amount
2027	\$ 50,119
2028	38,506
2029	30,019
2030	21,437
3031	16,005
Thereafter	58,314
Total lease payments	214,400
Less: imputed interest	(36,891)
Total	<u>\$ 177,509</u>

As of January 31, 2026, the Company had additional operating leases with total lease costs of \$6.2 million that have not yet commenced. These leases will commence in fiscal 2027.

### 13. Other Accrued Liabilities

Other accrued liabilities consisted of the following (dollars in thousands):

	January 31, 2026	January 25, 2025
Accrued employee benefit and incentive plan costs	\$ 117,515	\$ 61,213
Accrued payroll and related taxes	49,653	35,442
Accrued construction costs	47,931	37,546
Other current liabilities	41,382	32,769
Other accrued liabilities	<u>\$ 256,481</u>	<u>\$ 166,970</u>

### 14. Debt

The following table summarizes the net carrying value of our outstanding indebtedness (dollars in thousands):

	January 31, 2026	January 25, 2025
Credit Agreement - Revolving facility (matures December 2030)	\$ —	\$ —
Credit Agreement - Term Loan A Facility (matures December 2030)	1,525,422	447,115
Credit Agreement - Term Loan B Facility (matures January 2033)	792,041	—
4.50% senior notes, net (mature April 2029)	497,034	496,097
	<u>2,814,497</u>	<u>943,212</u>
Less: current portion	(4,000)	(10,000)
Long-term debt	<u>\$ 2,810,497</u>	<u>\$ 933,212</u>

### Credit Agreement

The Company and certain of its subsidiaries are party to a credit agreement (as defined below). The Company, the Guarantors (as defined therein) party thereto, the Term Loan B lender (as defined therein) party thereto and Bank of America, N.A. (“Bank of America”) as administrative and collateral agent (in such capacities and together with its successors and permitted assigns, the “Administrative Agent”), entered into that certain First Amendment to the Third Amended and Restated Credit Agreement (the “Amendment”), which amends that Third Amended and Restated Credit Agreement, dated as of December 23, 2025 by and among, the Company, the Guarantors from time to time party thereto, the Lenders (as defined therein) from time to time party thereto and the L/C Issues (as defined therein) from time to time party thereto and the Administrative Agent (the “Existing Credit Agreement”, and, the Existing Credit Agreement, as amended by the Amendment, the “Credit Agreement”). On December 23, 2025, we amended and restated the Credit Agreement to, among other things, establish a \$600.0 million 364 day secured bridge loan facility (the “Bridge Facility”), increase the existing senior secured term loan A facility from \$440.0 million to \$1,540.0 million (the “Term Loan A Facility”), increase the commitments under the senior secured revolving credit facility from \$650.0 million to \$800.0 million (the “Revolving Credit Facility”) and extend the

maturity date of the Term Loan A Facility and the Revolving Credit Facility. On January 27, 2026, we entered into the First Amendment to, among other things, establish an \$800 million senior secured term loan B facility (the “Term Loan B Facility”), the proceeds of which were used to (i) refinance the Bridge Facility, (ii) pay the fees and expenses incurred in connection therewith and (iii) fund cash to the balance sheet of the Company. The Credit Agreement includes a revolving facility with a maximum revolver commitment of \$800.0 million, a Term Loan A Facility in the principal amount of \$1,540.0 million, and a Term Loan B Facility in the principal amount of \$800.0 million. The Credit Agreement also includes a \$225.0 million sublimit for the issuance of letters of credit and a \$50.0 million sublimit for swingline loans. The maturity of the Revolving Credit Facility and Term Loan A Facility is December 23, 2030. The maturity of the Term Loan B Facility is January 27, 2033.

The following table summarizes the net carrying value of the Term Loan A Facility (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Principal amount of Term Loan A Facility	\$ 1,540,000	\$ 450,000
Less: Debt issuance costs	(14,579)	(2,885)
Net carrying amount of Term Loan A Facility	<u>\$ 1,525,422</u>	<u>\$ 447,115</u>

The following table summarizes the net carrying value of the Term Loan B Facility (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Principal amount of Term Loan B Facility	\$ 800,000	\$ —
Less: Debt issuance costs	(5,963)	—
Less: Original Issue Discount	(1,996)	—
Net carrying amount of Term Loan B Facility	<u>\$ 792,041</u>	<u>\$ —</u>

Subject to certain conditions, the Credit Agreement provides us with the ability to enter into one or more incremental facilities either by increasing the revolving commitments under the Credit Agreement and/or by establishing one or more additional term loans, up to the sum of (i) \$927.0 million and (ii) an aggregate amount such that, after giving effect to such incremental facilities on a pro forma basis (assuming that the amount of the incremental commitments are fully drawn and funded), the consolidated senior secured net leverage ratio does not exceed 3.50 to 1.00. The consolidated senior secured net leverage ratio is the ratio of our consolidated senior secured indebtedness reduced by (i) unrestricted cash and equivalents in excess of \$25.0 million to our trailing four-quarter consolidated earnings before interest, taxes, depreciation, and amortization (“EBITDA”), as defined by the Credit Agreement, (ii) subordinated indebtedness, as defined in the Credit Agreement and (iii) unsecured indebtedness, as defined in the Credit Agreement. Borrowings under the Credit Agreement are guaranteed by substantially all of our domestic subsidiaries and are secured by substantially all of the assets of the Borrowers and the Guarantors (subject to customary exceptions).

Under our Credit Agreement, borrowings bear interest at the rates described below based upon our consolidated net leverage ratio, which is the ratio of our consolidated total funded debt reduced by unrestricted cash and equivalents in excess of \$25.0 million to our trailing four-quarter consolidated EBITDA, as defined by our Credit Agreement. In addition, we incur certain fees for unused balances and letters of credit at the rates described below, also based upon our consolidated net leverage ratio. The weighted average interest rates and fees for balances under our Credit Agreement as of January 31, 2026 and January 25, 2025 were as follows:

		<b>Weighted Average Rate End of Period</b>	
		<b>January 31, 2026</b>	<b>January 25, 2025</b>
Borrowings - Term A SOFR Loans	1.375%- 2.00% plus Term SOFR	5.43%	6.02%
Borrowings - Base Rate Loans	0.375% - 1.00% plus Base rate <sup>(1)</sup>	—%	—%
Borrowings - Term B SOFR Loans	1.75% plus Term SOFR	5.43%	—%
Unused Revolver Commitment	0.20% - 0.40%	0.35%	0.30%
Standby Letters of Credit	1.375% - 2.00%	1.75%	1.63%
Commercial Letters of Credit	0.6875% -1.00%	—%	—%

<sup>(1)</sup> Base rate is described in the Credit Agreement as the highest of (i) the Federal Funds Rate plus 0.50%, (ii) the administrative agent’s prime rate, and (iii) the Term Secured Overnight Financing Rate (“SOFR”) plus 1.00% and, if such rate is less than zero, such rate shall be deemed zero. “Term SOFR” will be the published forward-looking SOFR rate for the applicable interest period plus a 0.10% spread adjustment and if such rate is less than zero, such rate shall be deemed zero. There were no outstanding borrowing under our revolving facility as of January 31, 2026 and January 25, 2025.

Standby letters of credit of approximately \$53.6 million and \$47.5 million, issued as part of our insurance program, were outstanding under our Credit Agreement as of January 31, 2026 and January 25, 2025, respectively.

Our Credit Agreement contains a financial covenant that requires us to maintain a consolidated net leverage ratio of not greater than (A) until the last day of the first fiscal quarter ending after the second anniversary of December 23, 2025, 4.50 to 1.00, and (B) thereafter, 4.00:1.00, as measured at the end of each fiscal quarter, and provides for certain increases to this ratio in connection with permitted acquisitions. The consolidated net leverage ratio is the ratio of our consolidated indebtedness reduced by unrestricted cash and cash equivalents in excess of \$25.0 million to our trailing four-quarter consolidated earnings before interest, taxes, depreciation, and amortization as defined by our Credit Agreement. The agreement also contains a financial covenant that requires us to maintain a consolidated interest coverage ratio, which is the ratio of our trailing four-quarter consolidated EBITDA to our consolidated interest expense, each as defined by our Credit Agreement, of not less than 2.50 to 1.00, as measured at the end of each fiscal quarter. At January 31, 2026 and January 25, 2025, we were in compliance with the financial covenants of our Credit Agreement and had borrowing availability under our revolving facility of \$746.4 million and \$602.5 million, respectively, as determined by the most restrictive covenant. For calculation purposes, applicable cash on hand is netted against the funded debt amount as permitted in the Credit Agreement.

#### 4.50% Senior Notes due 2029

On April 1, 2021, we issued \$500.0 million aggregate principal amount of 4.50% senior notes due 2029 (the “2029 Notes”). The 2029 Notes are guaranteed on a senior unsecured basis, jointly and severally, by all of our domestic subsidiaries that guarantee the Credit Agreement.

The indenture governing the 2029 Notes contains certain covenants that limit, among other things, our ability and the ability of certain of our subsidiaries to (i) incur additional debt and issue certain preferred stock, (ii) pay certain dividends on, repurchase, or make distributions in respect of, our and our subsidiaries’ capital stock or make other payments restricted by the indenture, (iii) enter into agreements that place limitations on distributions made from certain of our subsidiaries, (iv) guarantee certain debt, (v) make certain investments, (vi) sell or exchange certain assets, (vii) enter into transactions with affiliates, (viii) create certain liens, and (ix) consolidate, merge or transfer all or substantially all of our or our Subsidiaries’ assets. These covenants are subject to a number of exceptions, limitations and qualifications as set forth in the indenture governing the 2029 Notes.

The following table summarizes the net carrying value of the 2029 Notes (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Principal amount of 2029 Notes	\$ 500,000	\$ 500,000
Less: Debt issuance costs	(2,966)	(3,903)
Net carrying amount of 2029 Notes	<u>\$ 497,034</u>	<u>\$ 496,097</u>

The following table summarizes the fair value of the 2029 Notes, net of debt issuance costs. The fair value of the 2029 Notes is based on the closing trading price per \$100 of the 2029 Notes as of the last day of trading (Level 2), which was \$98.44 and \$94.65 as of January 31, 2026 and January 25, 2025, respectively (dollars in thousands):

	<b>January 31, 2026</b>	<b>January 25, 2025</b>
Fair value of principal amount of 2029 Notes	\$ 492,200	\$ 473,250
Less: Debt issuance costs	(2,966)	(3,903)
Fair value of 2029 Notes	<u>\$ 489,234</u>	<u>\$ 469,347</u>

## 15. Income Taxes

Dycom Industries, Inc. operates throughout the United States and had no foreign operations in fiscal 2026. Consequently, all income before income taxes was derived entirely from continuing operations within the United States.

The components of the provision for income taxes were as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
<b>Current:</b>			
Federal	\$ 21,194	\$ 73,398	\$ 65,540
Foreign	—	—	13
State	12,506	18,369	18,166
	<u>33,700</u>	<u>91,767</u>	<u>83,719</u>
<b>Deferred:</b>			
Federal	48,097	(15,411)	(10,000)
Foreign	—	—	—
State	4,889	(1,979)	(643)
	<u>52,986</u>	<u>(17,390)</u>	<u>(10,643)</u>
<b>Provision for income taxes</b>	<u><u>\$ 86,686</u></u>	<u><u>\$ 74,377</u></u>	<u><u>\$ 73,076</u></u>

Our effective income tax rate differs from the statutory rate primarily due to the difference in income tax rates from state to state where work was performed, non-deductible and non-taxable items, tax credits recognized, the tax effects of the vesting and exercise of share-based awards, and changes in unrecognized tax benefits.

On July 4, 2025, the U.S. government enacted tax legislation that reinstated 100% bonus depreciation for qualified property acquired and placed in service after January 19, 2025 and restored immediate deductibility of domestic research & experimental expenditures. Accordingly, our cash tax requirements were reduced in the current fiscal year compared to the amount that would have been required prior to enactment.

	<b>Fiscal Year Ended</b>			
	<b>January 31, 2026</b>		<b>January 25, 2025</b>	<b>January 27, 2024</b>
Statutory rate applied to pre-tax income	\$ 77,254	21.0 %	\$ 64,636	\$ 61,320
State and local income tax, net of federal tax benefit	14,769	4.0 %	12,021	13,466
Changes in unrecognized tax benefits	(2,198)	(0.6)%	3,797	2,331
<b>Non-taxable or non-deductible items</b>				
Compensation limitation	3,994	1.1 %	9,890	2,788
Other	1,967	0.5 %	1,446	1,090
<b>Tax credits</b>				
Tax credit for research activities	(4,740)	(1.3)%	—	—
Other	(606)	(0.2)%	(6,558)	(4,453)
Federal benefit of vesting and exercise of share-based awards <sup>(1)</sup>	—	— %	(8,410)	(2,413)
Effect of changes in tax laws or rates enacted in the current period	—	— %	511	241
Changes in valuation allowances	(43)	— %	—	(546)
Other items	(3,711)	(0.9)%	(2,956)	(748)
<b>Provision for income taxes</b>	<u><u>\$ 86,686</u></u>	<u><u>23.6 %</u></u>	<u><u>\$ 74,377</u></u>	<u><u>\$ 73,076</u></u>

<sup>(1)</sup> The Federal benefit of vesting and exercise of share-based awards is included in “Other items” for fiscal 2026 as the impact was below the separate disclosure threshold.

The majority of the state and local income tax category of approximately \$14.8 million was incurred in California, Georgia, Florida, Oregon, New York, Virginia, and North Carolina.

### Deferred Income Taxes

The deferred tax provision represents the change in the deferred tax assets and the liabilities representing the tax consequences of changes in the amount of temporary differences and changes in tax rates during the year. The significant components of deferred tax assets and liabilities consisted of the following (dollars in thousands):

	<u>January 31, 2026</u>	<u>January 25, 2025</u>
Deferred tax assets:		
Capitalized research expenditures (IRC Section 174)	\$ 31,109	\$ 65,763
Insurance	23,879	22,251
Leases	44,321	28,088
Stock-based compensation	5,625	4,635
Allowance for credit losses accounts and reserves	2,325	5,970
Net operating loss carryforwards	85	114
Other	6,320	4,315
Total deferred tax assets	113,664	131,136
Valuation allowance	(38)	(77)
Deferred tax assets, net of valuation allowance	<u>\$ 113,626</u>	<u>\$ 131,059</u>
Deferred tax liabilities:		
Property and equipment	\$ 108,594	\$ 89,295
Goodwill and intangibles	32,792	39,106
Leases	42,434	27,951
Capitalized costs	14,153	5,843
Other	812	1,036
Deferred tax liabilities	<u>\$ 198,785</u>	<u>\$ 163,231</u>
Net deferred tax liabilities	<u>\$ 85,159</u>	<u>\$ 32,172</u>

The valuation allowance above reduces the deferred tax asset balances to the amount that we have determined is more likely than not to be realized. The valuation allowance relates to immaterial tax attributes which are not more-likely-than-not to be realized prior to expiration, based on current objective evidence. Our tax attributes generally begin to expire in fiscal 2027.

### Uncertain Tax Positions

As of January 31, 2026 and January 25, 2025, we had total unrecognized tax benefits of \$18.9 million and \$21.6 million, respectively, resulting from uncertain tax positions. Our effective tax rate will be reduced by \$18.9 million during future periods if it is determined these unrecognized tax benefits are realizable. We had approximately \$5.4 million and \$5.4 million accrued for the payment of interest and penalties as of January 31, 2026 and January 25, 2025, respectively. Interest related to unrecognized tax benefits for the Company was a negligible benefit for fiscal 2026, an expense of \$1.7 million for fiscal 2025, and was not material for fiscal 2024.

A summary of unrecognized tax benefits is as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Balance at beginning of year	\$ 21,563	\$ 17,606	\$ 15,771
Additions based on tax positions related to the fiscal year	2,339	2,682	1,884
Additions based on tax positions related to prior years	500	1,369	587
Reductions based on tax positions related to prior years	(910)	(94)	(636)
Reductions related to the expiration of statutes of limitation	(4,552)	—	—
Balance at end of year	<u>\$ 18,940</u>	<u>\$ 21,563</u>	<u>\$ 17,606</u>

### **Income Taxes Paid (Net of Refunds Received)**

A summary of income taxes paid (net of refunds received) in fiscal 2026 is as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>
	<b>January 31, 2026</b>
Federal income taxes paid (net of refunds received)	\$ 67,600
State income taxes paid (net of refunds received)	16,517
Total income taxes paid (net of refunds received)	<u>\$ 84,117</u>

No single state or local jurisdiction accounts for 5% or more of the total income taxes paid (net of refunds received).

### **16. Other Income, Net**

The components of other income, net, were as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Gain on sale of fixed assets	\$ 26,708	\$ 36,461	\$ 28,348
Miscellaneous expense, net	(10,120)	(7,248)	(6,739)
Other income, net	<u>\$ 16,588</u>	<u>\$ 29,213</u>	<u>\$ 21,609</u>

We participate in a vendor payment program sponsored by one of our customers. Eligible accounts receivable from this customer are included in the program and payment is received pursuant to a non-recourse sale to a bank partner. This program effectively reduces the time to collect these receivables as compared to that customer's standard payment terms. We incur a discount fee to the bank on the payments received that is included as an expense component in miscellaneous expense, net in the table above.

### **17. Employee Benefit Plans**

We sponsor a defined contribution plan that provides retirement benefits to eligible employees who elect to participate (the "Dycom Plan"). Under the plan, participating employees may defer up to 75% of their base pre-tax eligible compensation up to the IRS limits. From fiscal 2024 through December 31, 2025, we contributed 50% of the first 6% of base eligible compensation that a participant contributes to the plan and may make discretionary matching contributions from time to time. Effective January 1, 2026, we increased our contribution to 100% of the first 3% of base eligible compensation and 50% of the next 2% of base eligible compensation. Our contributions were \$13.9 million, \$12.3 million, and \$10.9 million related to fiscal 2026, fiscal 2025, and fiscal 2024, respectively.

Certain of the Company's subsidiaries, including Power Solutions, contribute amounts to multiemployer defined benefit pension plans under the terms of collective bargaining agreements ("CBA") that cover employees represented by unions.

Contributions are generally based on fixed amounts per hour per employee for employees covered by the plan. Participating in a multiemployer plan entails risks different from single-employer plans in the following aspects:

- assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers;
- if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be allocated to the remaining participating employers; and
- if the Company stops participating in the multiemployer plan, the Company may be required to pay the plan an amount based on the underfunded status of the plan. This payment is referred to as a withdrawal liability.

The information available to us about the multiemployer plans in which we participate is generally dated due to the nature of the reporting cycle of multiemployer plans and legal requirements under the Employee Retirement Income Security Act (“ERISA”) as amended by the Multiemployer Pension Plan Amendments Act. All plans are presented in the aggregate in the following table (dollars in thousands):

Fund	Company Contributions			Expiration Date of CBA
	Fiscal Year Ended	Fiscal Year Ended	Fiscal Year Ended	
	2026	2025	2024	
All Plans	\$ 4,725	\$ 75	\$ 68	Various

The following table lists all multiemployer defined benefit pension plans to which our contributions exceeded \$1.0 million and/or represented more than 5% of total plan contributions in fiscal 2026 (in thousands):

Pension Fund	Employee Identification Number	Pension Protection Act of 2006 (PPA) Zone Status	Subject to Financial Improvement/ Rehabilitation Plan	Fiscal 2026 Contributions	Surcharge Imposed	CBA Expiration Date
Electrical Workers Local No. 26 Pension Trust Fund	52-6117919	Green	N/A	\$1,225	No	5/31/2027

There were no multiemployer defined benefit pension plans to which our contributions exceeded \$1.0 million and/or represented more than 5% of total plan contributions in fiscal 2025 or fiscal 2024,

## 18. Capital Stock

*Repurchases of Common Stock.* The Company made the following repurchases during fiscal 2026, fiscal 2025, and fiscal 2024 (all shares repurchased have been cancelled).

Period	Number of Shares Repurchased	Total Consideration (In thousands)	Average Price Per Share <sup>(1)</sup>
Fiscal 2026	200,000	\$ 30,185	\$ 150.93
Fiscal 2025	410,000	\$ 65,640	\$ 160.10
Fiscal 2024	485,000	\$ 49,659	\$ 102.39

<sup>(1)</sup> Average price paid per share excludes 1% excise tax on share repurchases.

On February 26, 2025 the Company announced that its Board of Directors had authorized a new \$150.0 million program to repurchase shares of the Company’s outstanding common stock through August 25, 2026 in open market or private transactions. During fiscal 2026 we repurchased 200,000 shares of common stock, at an average price of \$150.93, for \$30.2 million. As of January 31, 2026, \$119.8 million of the authorization remained available for repurchases.

On August 23, 2023, the Company announced that its Board of Directors authorized a \$150.0 million program to repurchase shares of the Company’s outstanding common stock through February 2025 in open market or private transactions. During fiscal 2025 we repurchased 410,000 shares of common stock, at an average price of \$160.10, for \$65.6 million,

including 200,000 shares of common stock, at an average price of \$179.27, repurchased during the fourth quarter of fiscal 2025 for \$35.9 million. During fiscal 2024, we repurchased 485,000 shares of our common stock, at an average price of \$102.39, for \$49.7 million.

*Restricted Stock Tax Withholdings.* During fiscal 2026, fiscal 2025, and fiscal 2024, we withheld 88,949 shares, 117,465 shares, and 103,910 shares, respectively, totaling \$14.4 million, \$17.0 million, and \$9.9 million, respectively, to meet payroll tax withholding obligations arising from the vesting of restricted share units. In addition, during fiscal 2026 and fiscal 2025, we withheld 25,927 shares and 105,825 shares, respectively totaling \$5.8 million and \$18.6 million, respectively to meet payroll tax withholding obligations arising from the exercise of stock options. No shares were withheld during fiscal 2024 related to the exercise of stock options. All shares withheld have been cancelled. Shares of common stock withheld for tax withholdings do not reduce our total share repurchase authority.

Upon cancellation of shares repurchased or withheld for tax withholdings, the excess over par value is recorded as a reduction of additional paid-in capital until the balance is reduced to zero, with any additional excess recorded as a reduction of retained earnings. During fiscal 2026, fiscal 2025, and fiscal 2024 \$12.8 million, \$10.3 million, and \$3.9 million, respectively, was charged to retained earnings related to shares cancelled during the fiscal year.

*Issuance of Common Stock for Acquisition.* In connection with the acquisition of Power Solutions on December 23, 2025, the Company issued 1,011,069 shares of Dycom common stock to the sellers valued at \$351.0 million, as partial consideration for the purchase. These shares were issued in a private placement exempt from registration under the Securities Act of 1933.

### 19. Stock-Based Awards

We have outstanding stock-based awards under our 2012 Long-Term Incentive Plan, and 2017 Non-Employee Directors Equity Plan (collectively, the “Plans”). No further awards will be granted under the 2003 Long-Term Incentive Plan or 2007 Non-Employee Directors Equity Plan. As of January 31, 2026, the total number of shares available for grant under the Plans was 539,256.

In June 2024, the Company announced its CEO succession plan and transition. In connection with this transition, the Company incurred approximately \$11.4 million of incremental stock-based compensation modification expense through the former CEOs retirement date of November 30, 2024 related to previously issued equity awards.

Stock-based compensation expense and the related tax benefit recognized during fiscal 2026, fiscal 2025, and fiscal 2024 were as follows (dollars in thousands):

	<b>Fiscal Year Ended</b>		
	<b>January 31, 2026</b>	<b>January 25, 2025</b>	<b>January 27, 2024</b>
Stock-based compensation	\$ 34,468	\$ 40,320	\$ 25,457
Income tax effect of stock-based compensation	\$ 8,501	\$ 9,718	\$ 6,302

In addition, we realized approximately \$3.4 million, \$9.8 million, and \$2.9 million of net excess tax benefits during fiscal 2026, fiscal 2025, and fiscal 2024, respectively.

As of January 31, 2026, we had unrecognized compensation expense related to stock options, RSUs, and target Performance RSUs (based on the Company’s expected achievement of performance measures) of \$0.7 million, \$34.4 million, and \$11.7 million, respectively. This expense will be recognized over a weighted-average number of years of 1.8, 2.1, and 1.2, respectively, based on the average remaining service periods for the awards. As of January 31, 2026, we may recognize an additional \$12.9 million in compensation expense in future periods if the maximum number of Performance RSUs is earned based on certain performance measures being met.

The following table summarizes the valuation of stock options and restricted share units granted during fiscal 2026, fiscal 2025, and fiscal 2024, and the significant valuation assumptions:

	Fiscal Year Ended		
	January 31, 2026	January 25, 2025	January 27, 2024
Weighted average fair value of RSUs granted	\$ 176.85	\$ 154.13	\$ 95.23
Weighted average fair value of Performance RSUs granted	\$ 161.57	\$ 141.28	\$ 94.99
Weighted average fair value of stock options granted <sup>(1)</sup>	\$ —	\$ 109.52	\$ 60.85
Stock option assumptions:			
Risk-free interest rate	— %	4.2 %	3.6 %
Expected life (in years)	—	7.9	8.0
Expected volatility	— %	56.2 %	57.2 %
Expected dividends	—	—	—

<sup>(1)</sup> There were no stock options granted during fiscal 2026.

### Stock Options

The following table summarizes stock option award activity during fiscal 2026:

	Stock Options			
	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (In years)	Aggregate Intrinsic Value (In thousands)
Outstanding as of January 25, 2025	111,311	\$ 106.13		
Granted	—	\$ —		
Options exercised	(39,071)	\$ 99.79		
Cancelled	—	\$ —		
Outstanding as of January 31, 2026	<u>72,240</u>	\$ 109.55	7.0	\$ 18,409
Exercisable options as of January 31, 2026	<u>24,147</u>	\$ 97.91	6.4	\$ 6,435

The aggregate intrinsic values presented above represent the total pre-tax intrinsic values (the difference between the Company's closing stock price of \$364.39 on the last trading day of fiscal 2026 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on the last trading day of fiscal 2026. The amount of aggregate intrinsic value will change based on the price of the Company's common stock. The total intrinsic value of stock options exercised was \$4.9 million, \$20.9 million, and \$0.8 million for fiscal 2026, fiscal 2025, and fiscal 2024, respectively. We received cash from the exercise of stock options of \$3.9 million, \$10.6 million, and \$1.1 million during fiscal 2026, fiscal 2025, and fiscal 2024, respectively. During fiscal 2026 and fiscal 2025, we paid \$5.8 million and \$18.6 million, respectively, to tax authorities for payroll tax withholding obligations on the exercise of stock options.

## RSUs and Performance RSUs

The following table summarizes RSU and Performance RSU award activity during fiscal 2026:

	Restricted Stock					
	RSUs			Performance RSUs		
	Share Units	Weighted Average Grant Price		Share Units	Weighted Average Grant Price	
Outstanding as of January 25, 2025	300,826	\$	121.35	366,433	\$	118.51
Granted	161,408	\$	176.85	95,514	\$	161.57
Share units vested	(113,859)	\$	114.95	(144,159)	\$	109.43
Forfeited or cancelled	(9,257)	\$	136.14	(48,385)	\$	111.38
Outstanding as of January 31, 2026	339,118	\$	149.51	269,403	\$	139.92

The total number of granted Performance RSUs presented above consists of 47,757 target shares and 47,757 supplemental shares. During fiscal 2026, we added 17,287 supplemental shares and cancelled 41,466 supplemental shares of Performance RSUs, as a result of performance criteria for attaining those shares being partially met for the applicable performance periods. Approximately 27,317 supplemental shares outstanding as of January 31, 2026 will be cancelled during the three months ending May 2, 2026 as a result of the fiscal 2026 performance period criteria being partially met. The total amount of Performance RSUs outstanding as of January 31, 2026 consists of 166,610 target shares and 102,793 supplemental shares.

The total fair value of restricted share units vested during fiscal 2026, fiscal 2025, and fiscal 2024 was \$42.2 million, \$49.3 million, and \$29.6 million, respectively.

## 20. Customer Concentration and Revenue Information

### Geographic Location

We provide services throughout the United States.

### Significant Customers

Our customer base is highly concentrated. Customers whose contract revenues exceeded 10% of total contract revenues during fiscal 2026, fiscal 2025, or fiscal 2024, as well as total contract revenues from all other customers combined, were as follows:

	Fiscal Year Ended					
	January 31, 2026		January 25, 2025		January 27, 2024	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
AT&T Inc. <sup>(1)</sup>	\$ 1,410.5	25.4 %	\$ 942.8	20.1 %	\$ 706.5	16.9 %
Lumen Technologies <sup>(1)</sup>	598.6	10.8 %	570.4	12.1 %	650.6	15.6 %
Verizon Communications Inc. <sup>(2)</sup>	778.1	14.0 %	572.5	12.2 %	585.4	14.0 %
Comcast Corporation	413.1	7.4 %	401.6	8.5 %	448.6	10.7 %
Total other customers combined	2,345.6	42.4 %	2,214.7	47.1 %	1,784.5	42.8 %
Total contract revenues	\$ 5,545.9	100.0%	\$ 4,702.0	100.0%	\$ 4,175.6	100.0%

<sup>(1)</sup> On February 2, 2026, AT&T Inc. completed its acquisition of substantially all of the mass markets fiber business from Lumen Technologies Inc. Since this transaction occurred subsequent to fiscal 2026, we have continued to report revenues for the mass markets fiber business under Lumen Technologies Inc.

<sup>(2)</sup> Includes revenue attributable to Frontier Communications Corporation retrospectively for all periods presented as a result of its acquisition by Verizon Communications, Inc. on January 20, 2026.

See Note 6, *Accounts Receivable, Contract Assets, and Contract Liabilities*, for information on our customer credit concentration and collectability of trade accounts receivable and contract assets (liabilities).

## Customer Type

Total contract revenues by customer type during fiscal 2026, fiscal 2025, and fiscal 2024, were as follows (dollars in millions):

	Fiscal Year Ended					
	January 31, 2026		January 25, 2025		January 27, 2024	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
Communications	\$5,450.1	98.3%	\$4,702.0	100.0%	\$4,175.6	100.0%
Building Systems	95.8	1.7%	—	—%	—	—%
Total contract revenues	<u>\$5,545.9</u>	<u>100.0%</u>	<u>\$4,702.0</u>	<u>100.0%</u>	<u>\$4,175.6</u>	<u>100.0%</u>

For additional information on our reportable segments, see Note 21, *Segment Reporting*.

## Remaining Performance Obligations

Master service agreements and other contractual agreements with customers contain customer-specified service requirements, such as discrete pricing for individual tasks. In most cases, our customers are not contractually committed to procure specific volumes of services under these agreements.

Services are generally performed pursuant to these agreements in accordance with individual work orders. An individual work order generally is completed within one year. As a result, our remaining performance obligations under the work orders not yet completed is not meaningful in relation to our overall revenue at any given point in time. We apply the practical expedient in Accounting Standards Codification Topic 606, *Revenue from Contracts with Customers*, and do not disclose information about remaining performance obligations that have original expected durations of one year or less.

## 21. Segment Reporting

The Company operates in two reportable segments, which derive revenues by providing specialty contracting services throughout the United States on a decentralized basis. Dycom's reportable segments are: Communications and Building Systems. This segment structure reflects the financial information and reports used by the Company's Chief Executive Officer, the chief operating decision maker (CODM), to make decisions regarding the Company's business, including performance assessments and strategic and operational planning in compliance with ASC 280, *Segment Reporting*.

*Communications.* The Communications segment provides specialty contracting services, including program management, planning; engineering and design; aerial, underground, and wireless construction; maintenance; and fulfillment services for telecommunications and digital infrastructure providers. The Communications segment also provides underground facility locating services for various utilities and other construction and maintenance services for electric and gas utilities. The Communications segment services are provided by its operating segments that consist of a subsidiary (or in certain instances, the combination of two or more subsidiaries), whose results are regularly reviewed by the CODM. The Communications segment's operating segments have been aggregated into one reportable segment based on their similar economic characteristics, nature of services and production processes, type of customers, and service distribution methods.

*Building Systems.* During fiscal 2026, following the acquisition of Power Solutions, the CODM reevaluated the Company's reportable segments, which resulted in the addition of the Building Systems segment as a component of management's internal financial information used for operational decision-making. Beginning in fiscal 2026, the Company has reported the results of the Building Systems segment separately as a reportable segment. The Building Systems segment reflects the results of Power Solutions following the acquisition on December 23, 2025. The Building Systems segment specializes in providing comprehensive building infrastructure solutions, including electrical, energy management, security, and fire safety systems for data centers and other critical facilities.

The key measure of segment profit or loss utilized by the CODM to assess performance of and allocate resources to the Company's operating segments is income before income taxes. Significant segment expenses included in income before income taxes are cost of earned revenues, depreciation and amortization, and other segment items, which include general and administrative expenses, segment interest expense and other income (expense). The measure of segment assets regularly provided to the CODM is consistent with total assets as reported on the consolidated balance sheets.

The CODM reviews contract revenues and income before income taxes compared to historical, forecasted and budgeted amounts to assess the performance of the Company's operating segments and allocate resources.

Certain corporate costs are not allocated, including certain acquisition and integration costs, interest expense (income) and senior notes, and loss on debt extinguishment.

Segment financial information during fiscal 2026, fiscal 2025, and fiscal 2024, was as follows (dollars in millions):

<b>Fiscal Year Ended January 31, 2026</b>	<b>Communications</b>	<b>Building Systems</b>	<b>Total</b>
Contract revenues	\$ 5,450,072	\$ 95,840	\$ 5,545,912
Costs of earned revenues, excluding depreciation and amortization	4,322,847	82,948	4,405,795
Depreciation and amortization	248,972	20,594	269,566
Other segment items <sup>(1)</sup>	408,259	1,872	410,131
Segment income (loss) before income taxes	<u>\$ 469,994</u>	<u>\$ (9,574)</u>	<u>\$ 460,420</u>
Corporate and non-allocated costs <sup>(2)</sup>			92,545
Total consolidated income before income taxes			<u>\$ 367,875</u>

<b>Fiscal Year Ended January 25, 2025</b>	<b>Communications</b>	<b>Building Systems</b>	<b>Total</b>
Contract revenues	\$ 4,702,014	\$ —	\$ 4,702,014
Costs of earned revenues, excluding depreciation and amortization	3,769,877	—	3,769,877
Depreciation and amortization	198,571	—	198,571
Other segment items <sup>(1)</sup>	363,766	—	363,766

Consolidated capital expenditures:	<u>\$ 240,791</u>	<u>\$ 250,457</u>	<u>\$ 218,492</u>

## 22. Commitments and Contingencies

From time to time, we are party to other various claims and legal proceedings arising in the ordinary course of business. While the resolution of these matters cannot be predicted with certainty, it is the opinion of management, based on information available at this time, that the ultimate resolution of any such claims or legal proceedings will not, after considering applicable insurance coverage or other indemnities to which we may be entitled, have a material effect on our financial position, results of operations, or cash flow.

### Commitments

*Performance and Payment Bonds and Guarantees.* We have obligations under performance and other surety contract bonds related to certain of our customer contracts. Performance bonds generally provide a customer with the right to obtain payment and/or performance from the issuer of the bond if we fail to perform our contractual obligations. As of January 31, 2026 and January 25, 2025, we had \$917.9 million and \$413.5 million, respectively, of outstanding performance and other surety contract bonds. In addition to performance and other surety contract bonds, as part of our insurance program, we also provide surety bonds that collateralize our obligations to our insurance carriers. At both January 31, 2026 and January 25, 2025, we had \$31.0 million of outstanding surety bonds related to our insurance obligations. Additionally, the Company periodically guarantees certain obligations of its subsidiaries, including obligations in connection with obtaining state contractor licenses and leasing real property and equipment.

*Letters of Credit.* We have issued standby letters of credit under our credit agreement that collateralize our obligations to our insurance carriers. As of January 31, 2026 and January 25, 2025, we had \$53.6 million and \$47.5 million, respectively, of outstanding standby letters of credit issued under our credit agreement.

## 23. Supplier Finance Program

Beginning in fiscal 2026, the Company has provided certain suppliers with access to a supplier finance program administered through a third party, which facilitates participating suppliers' ability to finance payments due from the Company through third-party financial institutions. Participating suppliers may, at their sole discretion, receive payment of the Company's obligation prior to the scheduled due dates, at a discounted price from the third party. The Company agrees to pay the financial institution the stated amount generally within 60 days of receipt of the invoice. The Company's obligations to its suppliers, including amounts due and scheduled payment dates, are not impacted by the supplier's decision to finance amounts under these arrangements. The Company does not have pledged assets or other guarantees under the program. Our outstanding payment obligations are included in accounts payable on our consolidated balance sheets and are reported as operating activities in our consolidated statements of cash flows when paid.

The following table presents the change in the supplier financing obligation for the year ended January 31, 2026 (dollars in millions):

	<b>Fiscal Year Ended</b>
	<b>January 31, 2026</b>
Confirmed obligations outstanding at the beginning of the year	\$ —
Invoices received	407.0
Invoices paid	180.6
Confirmed obligations outstanding at the end of the year	<u>\$ 226.4</u>

There were no supplier financing obligations for the year ended January 25, 2025.

## **Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Stockholders of Dycom Industries, Inc.

### **Opinions on the Financial Statements and Internal Control over Financial Reporting**

We have audited the accompanying consolidated balance sheets of Dycom Industries, Inc. and its subsidiaries (the “Company”) as of January 31, 2026 and January 25, 2025, and the related consolidated statements of operations, of comprehensive income, of stockholders’ equity and of cash flows for each of the three years in the period ended January 31, 2026, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of January 31, 2026, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of January 31, 2026 and January 25, 2025, and the results of its operations and its cash flows for each of the three years in the period ended January 31, 2026 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 31, 2026, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

### **Basis for Opinions**

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management’s Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As described in Management’s Report on Internal Control over Financial Reporting, management has excluded Power Solutions, LLC from its assessment of internal control over financial reporting as of January 31, 2026, because it was acquired by the Company in a purchase business combination during fiscal 2026. We have also excluded Power Solutions, LLC from our audit of internal control over financial reporting. Power Solutions, LLC is a wholly-owned subsidiary whose total assets and total revenues excluded from management’s assessment and our audit of internal control over financial reporting represent 6.7% and 1.7%, respectively, of the related consolidated financial statement amounts as of and for the year ended January 31, 2026.

### **Definition and Limitations of Internal Control over Financial Reporting**

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the

company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Critical Audit Matters**

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

#### *Revenue Recognition*

As described in Notes 2 and 20 to the consolidated financial statements, the Company's total contract revenue was \$5.5 billion for the year ended January 31, 2026. The Company performs a significant amount of its services under master service agreements and other contracts that contain customer-specified service requirements. Contract revenue is recognized over time as the Company's services are performed and customers simultaneously receive and consume the benefits provided. Output measures, such as units delivered, are utilized to assess progress against specific contractual performance obligations for the majority of the Company's master service agreements and other contracts. The output method captures the amount of units delivered pursuant to master service agreements and other contracts and is used only when the Company's performance does not produce significant amounts of work in process prior to complete satisfaction of the performance obligation. For certain contracts, the Company uses the cost-to-cost measure of progress, under which the extent of progress toward completion is measured based on the ratio of costs incurred to date to the total estimated costs. Contract costs include direct labor, direct materials, and subcontractor costs, as well as an allocation of indirect costs. Contract revenues are recorded as costs are incurred. The Company accrues the entire amount of a contract loss, if any, at the time the loss is determined to be probable and can be reasonably estimated.

The principal consideration for our determination that performing procedures relating to revenue recognition is a critical audit matter is a high degree of auditor effort in performing procedures related to the Company's revenue recognition.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the revenue recognition process, including controls over the recording of revenue once the customer simultaneously receives and consumes the benefits. These procedures also included, among others, (i) testing revenue recognized for a sample of revenue transactions by obtaining and inspecting source documents, such as signed master service agreements and other contracts, records of units delivered and work performed, invoices, and payment receipts and (ii) testing a sample of outstanding customer invoice balances as of January 31, 2026 by obtaining and inspecting source documents, such as signed master service agreements and other contracts, records of units delivered and work performed, and payment receipts subsequent to January 31, 2026.

#### *Acquisition of Power Solutions, LLC - Valuation of Customer Relationships*

As described in Note 5 to the consolidated financial statements, during the fourth quarter of fiscal 2026, the Company acquired Power Solutions for approximately \$2 billion, which resulted in the recognition of \$775 million of intangible assets, including \$580 million of customer relationships. The fair value of the customer relationships was estimated using the multi-period excess earnings method. Significant judgments and assumptions included projected revenue growth rates, profit margins, discount rate, and customer attrition rates.

The principal considerations for our determination that performing procedures relating to the valuation of customer relationships acquired in the acquisition of Power Solutions is a critical audit matter are (i) the significant judgment by management when developing the fair value estimate of the customer relationships acquired; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to projected revenue growth rates, profit margins, discount rate, and customer attrition rates; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the

acquisition accounting, including controls over management's valuation of the customer relationships acquired. These procedures also included, among others (i) reading the purchase agreement; (ii) testing management's process for developing the fair value estimate of the customer relationships acquired; (iii) evaluating the appropriateness of the multi-period excess earnings method used by management; (iv) testing the completeness and accuracy of the underlying data used by management in the multi-period excess earnings method; and (v) evaluating the reasonableness of the significant assumptions used by management related to projected revenue growth rates, profit margins, discount rate, and customer attrition rates. Evaluating management's assumptions related to projected revenue growth rates and profit margins involved considering (i) Power Solutions' historical performance; (ii) the consistency with economic and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the multi-period excess earnings method and (ii) the reasonableness of the significant assumptions related to the discount rate and customer attrition rates.

/s/ PricewaterhouseCoopers LLP  
Miami, Florida  
March 9, 2026

We have served as the Company's auditor since 2014.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.**

None.

**Item 9A. Controls and Procedures.**

**Disclosure Controls and Procedures**

The Company carried out an evaluation under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of January 31, 2026, the end of the period covered by this Annual Report on Form 10-K. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of January 31, 2026, the Company's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms, and (2) accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

**Changes in Internal Control Over Financial Reporting**

There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the Company's fourth quarter of fiscal 2026 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**Management's Report on Internal Control Over Financial Reporting**

Management of Dycom Industries, Inc. and subsidiaries is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15(d)-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The SEC's general guidance permits the exclusion of an assessment of the effectiveness of a registrant's internal control over financial reporting for an acquired business during the first year following such acquisition if, among other circumstances and factors, there is not adequate time between the acquisition date and the date of assessment. As previously noted in this Form 10-K, we acquired Power Solutions on December 23, 2025 and management's assessment and conclusion on the effectiveness of the Company's internal control over financial reporting as of January 31, 2026 excludes an assessment of internal control over financial reporting of Power Solutions. This acquisition represents approximately 6.7% of our total assets (excluding goodwill and other identifiable intangibles, which are included within the scope of the assessment) as of January 31, 2026 and 1.7% of our total contract revenues for the fiscal year ended January 31, 2026.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of January 31, 2026.

The effectiveness of the Company's internal control over financial reporting as of January 31, 2026 has been audited by PricewaterhouseCoopers LLP, the Company's independent registered public accounting firm. Their report, which is set forth in Part II, Item 8, *Financial Statements*, of this Annual Report on Form 10-K, expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of January 31, 2026.

**Item 9B. *Other Information.***

**Rule 10b5-1 and Non-Rule 10b5-1 Trading Arrangements by our Directors and Officers**

During the three months ended January 31, 2026, our directors and officers (as defined in Rule 16a-1(f) of the Securities and Exchange Act of 1934, as amended) did not adopt, terminate or modify Rule 10b5-1 or non-Rule 10b5-1 trading arrangements (as defined in Item 408 of Regulation S-K).

**Item 9C. *Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.***

Not Applicable.

## PART III

### **Item 10. *Directors, Executive Officers and Corporate Governance.***

Information with respect to the executive officers of the Company is provided in Part I, Item 1. Business above under the heading “Information About Our Executive Officers” and information required by Item 406 and Item 408(b) of Regulation S-K is below. All other information required by this Item is hereby incorporated by reference from the Company’s definitive proxy statement to be filed with the SEC pursuant to Regulation 14A and is incorporated by reference herein.

We have adopted an insider trading policy related to the purchase, sale and other transactions in our securities entered into by our directors, officers, employees and the Company itself. The insider trading policy is designed to promote compliance with the securities laws and related rules and regulations, NYSE listing standards and our own Code of Business Conduct and Ethics and Code of Ethics for Senior Financial Officers. Our insider trading policy is filed as Exhibit 19 to this Report.

#### **Code of Ethics**

The Company has adopted a Code of Ethics for Senior Financial Officers, which is a code of ethics as that term is defined in Item 406(b) of Regulation S-K and which applies to its Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer, Controller, and other persons performing similar functions. The Code of Ethics for Senior Financial Officers is available on the Company’s website at [www.dycomind.com](http://www.dycomind.com). If the Company makes any substantive amendments to, or a waiver from, provisions of the Code of Ethics for Senior Financial Officers, it will disclose the nature of such amendment, or waiver, on its website or in a report on Form 8-K. Information on the Company’s website is not deemed to be incorporated by reference into this Annual Report on Form 10-K.

Information concerning directors and nominees of the Registrant and other information as required by this item are hereby incorporated by reference from the Company’s definitive proxy statement to be filed with the Securities and Exchange Commission pursuant to Regulation 14A. The information set forth under the caption “*Information About Our Executive Officers*” in Part I, Item 1 of this Annual Report on Form 10-K is incorporated herein by reference.

### **Item 11. *Executive Compensation.***

The information required by Item 11 regarding executive compensation is included under the headings “*Compensation Discussion and Analysis*,” “*Compensation Committee Report*,” and “*Compensation Committee Interlocks and Insider Participation*” in the Company’s definitive proxy statement to be filed with the Commission pursuant to Regulation 14A, and is incorporated herein by reference.

### **Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.***

Information concerning the ownership of certain of the Registrant’s beneficial owners and management and related stockholder matters is hereby incorporated by reference from the Company’s definitive proxy statement to be filed with the Commission pursuant to Regulation 14A.

### **Item 13. *Certain Relationships, Related Transactions and Director Independence.***

Information concerning relationships and related transactions is hereby incorporated by reference from the Company’s definitive proxy statement to be filed with the Commission pursuant to Regulation 14A.

### **Item 14. *Principal Accountant Fees and Services.***

Information concerning principal accountant fees and services is hereby incorporated by reference from the Company’s definitive proxy statement to be filed with the Commission pursuant to Regulation 14A.

## PART IV

### Item 15. Exhibits and Financial Statement Schedules.

(a) The following documents are filed as a part of this report:

1. *Consolidated financial statements*: the consolidated financial statements and the Report of Independent Registered Certified Public Accounting Firm are included in Part II, Item 8, *Financial Statements and Supplementary Data*, of this Annual Report on Form 10-K.
2. *Financial statement schedules*: All schedules have been omitted because they are inapplicable, not required, or the information is included in the above referenced consolidated financial statements or the notes thereto.
3. *Exhibits furnished pursuant to the requirements of Form 10-K*:

# EXPLANATION OF NON-GAAP FINANCIAL MEASURES

The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). In quarterly results releases, conference calls, webcasts, slide presentations and other materials, the Company may use or discuss non-GAAP financial measures, as defined by Regulation G of the Securities and Exchange Commission. The Company believes that the presentation of certain non-GAAP financial measures in these materials provides information that is useful to investors because it allows for a more direct comparison of the Company's performance for the period reported with the Company's performance in prior periods. The Company cautions that non-GAAP financial measures should be considered in addition to, but not as a substitute for, the Company's reported GAAP results. Management defines the Non-GAAP financial measures used as follows:

- **Non-GAAP Organic Contract Revenues** - contract revenues from businesses that are included for the entirety of both the current and prior year periods, excluding contract revenues from certain non-recurring items, adjusted for the additional week in the fourth quarter of fiscal 2026, the quarter ended January 31, 2026, as a result of the Company's 52/53 week fiscal year. Non-GAAP Organic Contract Revenue change percentage is calculated as the change in Non-GAAP Organic Contract Revenues from the comparable prior year period divided by the comparable prior year period Non-GAAP Organic Contract Revenues.
- **Non-GAAP Adjusted EBITDA** - EBITDA (earnings before interest, taxes, depreciation and amortization) adjusted for gain on sale of fixed assets, stock-based compensation expense, and certain non-recurring items.
- **Non-GAAP Adjusted Net Income** - GAAP net income before amortization of intangible assets as well as certain non-recurring items and the related tax impact.
- **Non-GAAP Adjusted Effective Tax Rate** - provision for income taxes adjusted for the tax impacts of certain non-recurring items.
- **Non-GAAP Adjusted Diluted Earnings per Common Share** - Non-GAAP Adjusted Net Income divided by weighted average diluted shares outstanding.
- **Free Cash Flow** - net cash provided by operating activities less capital expenditures, net of proceeds from the sale of property and equipment.

Management excludes or adjusts each of the items identified below from Non-GAAP Adjusted EBITDA, Non-GAAP Adjusted Net Income and Non-GAAP Adjusted Diluted Earnings per Common Share

- **Stock-based compensation modification** - In connection with the Company's CEO succession plan and transition completed in November 2024, the Company incurred stockbased compensation modification expense. The Company excludes the impact of the modification because the Company believes it is not indicative of its underlying results or ongoing operations.
- **Acquisition and integration costs** - Acquisition and integration costs include transaction related costs of recently acquired businesses and costs associated with integration activities. The Company excludes these costs from its non-GAAP financial measures because the Company believes it is not indicative of its underlying results or ongoing operations.
- **Loss on debt extinguishment** - Loss on debt extinguishment includes the write-off of deferred financing fees in connection with amendments of the Company's credit agreement. Management believes excluding the loss on debt extinguishment from the Company's non-GAAP financial measures assists investors' overall understanding of the Company's current financial performance and provides management with a consistent measure for assessing the current and historical financial results."
- **Tax impact of pre-tax adjustments** - The tax impact of pre-tax adjustments reflects the Company's estimated tax impact of specific adjustments and the effective tax rate used for financial planning for the applicable period.

# NOTES

1. Source: IDC: Worldwide IDC Global DataSphere Forecast, 2025–2029, #US53363625, May 2025
2. The Company excludes amortization of intangible assets from its Non-GAAP Adjusted Net Income beginning with the results reported for the fourth quarter and fiscal year ended January 31, 2026. Amortization of intangible assets are impacted by the Company's acquisition activities and therefore can vary from period to period. The exclusion of the amortization expense from the Company's non-GAAP financial measures provides management with a consistent measure for assessing financial results. Prior periods have been adjusted for comparability with the current presentation as follows: Amortization expense of \$31.4 million, \$19.8 million, \$15.3 million, \$17.5 million and \$20.6 million has been excluded from the original reported Non-GAAP Adjusted Net Income for the fiscal years ended January 25, 2025, January 27, 2024, January 28, 2023, January 29, 2022 and January 30, 2021 respectively. The effective tax rate used for financial planning of 26.5% was used to estimate the tax impact of the pretax amortization adjustment for the fiscal year ended January 27, 2024 and the effective tax rate used for financial planning of 27.0% was used to estimate the tax impact of pre-tax amortization adjustments for the fiscal years ended January 28, 2023, January 29, 2022 and January 30, 2021, respectively.
3. The impacts of a change order and the closeout of several projects increased contract revenues by \$26.5 million for fiscal year ended January 27, 2024. After the impacts of certain other costs, these items contributed \$23.6 million to Adjusted EBITDA for the fiscal year ended January 27, 2024. As a result, reported Adjusted EBITDA was increased by 0.6% as a percentage of contract revenues for the fiscal year ended January 27, 2024. On an after-tax basis, these items contributed approximately \$17.5 million to reported net income, or \$0.59 per common share diluted for the fiscal year ended January 27, 2024. Non-GAAP Organic Revenue Growth %, Non-GAAP Adjusted EBITDA, Non-GAAP Adjusted EBITDA %, Non-GAAP Adjusted Net Income and Non-GAAP Adjusted Diluted Earnings per Common Share exclude the impact of these items for the fiscal year ended January 27, 2024. Beginning in the quarter ended October 26, 2024, the Company excluded the impact of the change order from the prior year amount for calculations of Non-GAAP Organic Contract Revenues.
4. The Company's backlog represents an estimate of services to be performed pursuant to master service agreements and other contractual agreements over the terms of those contracts. These estimates are based on contract terms and evaluations regarding the timing of the services to be provided. In the case of master service agreements, backlog is estimated based on the work performed in the preceding 12-month period, when available. When estimating backlog for newly initiated master service agreements and other long and short-term contracts, the Company also considers the anticipated scope of the contract and information received from the customer during the procurement process. A significant majority of the Company's backlog comprises services under master service agreements and other long-term contracts. Backlog is not a measure defined by United States generally accepted accounting principles ("GAAP") and should be considered in addition to, but not as a substitute for, information provided in accordance with GAAP. Participants in the Company's industry also disclose a calculation of their backlog; however, the Company's methodology for determining backlog may not be comparable to the methodologies used by others. Dycom utilizes the calculation of backlog to assist in measuring aggregate awards under existing contractual relationships with its customers. The Company believes its backlog disclosures will assist investors in better understanding this estimate of the services to be performed pursuant to awards by its customers under existing contractual relationships.

- 
5. Amounts represent contract revenues from acquired businesses that were not owned for the entirety of both the current and prior year periods.
  6. The Company has a 52/53 week fiscal year. The fiscal year ended January 25, 2025 contained 52 weeks, while the quarter and fiscal year ended January 31, 2026 contained an additional week of operations. The Non-GAAP adjustment for the additional week of operations is calculated independently for the quarter and fiscal year ended January 31, 2026 as (i) contract revenues for the quarter ended January 31, 2026 less (ii) contract revenues from the applicable acquired businesses that were not owned for the entirety of both the current and prior year periods (iii) divided by 14 weeks
  7. The Company incurred costs of approximately \$18.8 million in connection with the acquisition of Power Solutions in the quarter ended January 31, 2026 and approximately \$4.2 million in connection with the integration of a business acquired during the quarter ended October 26, 2024.
  8. During the fiscal years ended January 31, 2026 and January 25, 2025, the Company recognized a loss on debt extinguishment of approximately \$7.3 million and \$1.0 million, respectively, in connection with amendments of its credit agreement. Additionally, During the fiscal year ended January 30, 2021, the Company purchased \$401.7 million aggregate principal amount of its Notes for \$371.4 million, including interest and fees. The purchase price was allocated between the debt and equity components of the Notes. Based on the net carrying amount of the Notes, the Company recognized a net gain on debt extinguishment of \$12.0 million after the write-off of associated debt issuance costs. The Company also recognized the equity component of the settlement of the Notes.
  9. During the fiscal year ended January 30, 2021 the Company incurred a pre-tax charge for a wage and hour litigation settlement.
  10. During the fiscal year ended January 30, 2021, the Company incurred a goodwill impairment charge of \$53.3 million for a reporting unit that performs installation services inside third party premises.
  11. In connection with the Company's CEO succession plan completed in November 2024, the Company incurred approximately \$11.4 million of stock-based compensation modification expense for the fiscal year ended January 25, 2025.
  12. The Company's 2021 Convertible Notes were allocated between debt and equity components. The difference between the principal amount and the carrying amount of the liability component of the 2021 Convertible Notes represented a debt discount. The debt discount was amortized over the term of the 2021 Convertible Notes but did not result in periodic cash interest payments. The Company excludes the non-cash amortization of the debt discount from its Non-GAAP financial measures because it believes it is useful to analyze the component of interest expense for the 2021 Convertible Notes that will be paid in cash.
